**Dismantling the Memory Machine** H.A. Bursen,2012-12-06 The subject of the following study is theories of memory The first part is a study of one broad type of theory which is very widely adhered to at this time It enjoys great popularity

among neuro physiologists neuropsychologists and more generally among scientifically oriented people who have directed their attention to questions about memory Further this way of looking at the matter is not confined to scientific professionals Indeed we can find popularized versions of the view in magazines like Time and Reader s Digest So in the first part of the book I will give a presentation of the view in its general form The theory will be presented in such a way as to reveal the features which make it tempting which make it seem to be a very natural way to explain the phenomena of memory And clearly from the number of adherents the view has won it is tempting and it does seem to be to go about explaining memory After setting forth a natural way this generalized version of the theory I will next present material by various authors who hold this view This will allow the reader to get some idea of the different forms which the theory the memory trace or engram theory takes The last step is a criticism of the theory In the second part of the book the attack on trace theory will be strengthened by a further criticism

**Poems** Siddharth Shrivastav,2020-12-02 Ever had coffee at 3 AM while staring at the rain and wondered about the person you loved or the fact that randomness is omnipresent like God but we never saw it or spent time on a bench and enjoyed the view of lonely path Read about all these and much more in this book Psychotic Temptation Liliane Abensour,2013-02-11 How can we understand the pull towards that which we fear psychosis In this thought provoking book Abensour proposes the idea of a temptation towards psychosis rather than a regression as a response to the hatred or denial of the subject s origins

She shares her reflections on her psychoanalytic work with psychotic patients focusing on their struggle to achieve a coherent sense of a self that can inhabit a shared world Abensour locates this struggle within the universal human struggle to achieve a balance between what we can and cannot allow ourselves to know about the reality of death and of our insignificance in the world
