heartrending decisions were largely a result of misinformation disseminated that popularized and legitimized lobotomy Woven into Sternburg's story are notable figures that influenced the family as well as the entire medical field In 1949 Egas Moniz was awarded the Nobel Prize in Medicine for developing the lobotomy and in the three years that followed his acceptance of the award more Americans underwent the surgery than during the previous 14 years By the early 1950s Walter Freeman developed an alternate technique for lobotomy which he proselytized during his travels throughout the country in a van he dubbed the Lobotomobile The phrase prefrontal lobotomy was common currency growing up in Janet Sternburg's family and in *White Matter* she details this scientific discovery that disconnects the brain's white matter leaving a person without feelings and its undeserved legitimization and impact on her family She writes as a daughter consumed with questions about her mother and aunts all well meaning women who decided their siblings' mental health issues would be best treated with lobotomies By the late 1970s the surgical practice was almost completely out of favor but its effects left patients and their families with complicated legacies as well as a stain on American medical history Every generation has to make its own medical choices based on knowledge that will inevitably come to seem inadequate in the future How do we live with our choices when we see their consequences
