

How to Become a Tenured Professor?

Tenured Professor

Tenured Professor:

Professing to Learn Anna Neumann, 2009-06 Research teaching service and public outreach all are aspects of being a tenured professor But this list of responsibilities is missing a central component actual scholarly learning disciplinary knowledge that faculty teach explore in research and share with the academic community How do professors pursue such learning when they must give their attention as well to administrative and other obligations *Professing to Learn* explores university professors scholarly growth and learning in the years immediately following the award of tenure a crucial period that has a lasting impact on the academic career Some launch from this point to multiple accomplishments and accolades while others falter their academic pursuits stalled What contributes to these different outcomes Drawing on interviews with seventy eight professors in diverse disciplines and fields at five major American research universities Anna Neumann describes how tenured faculty shape and disseminate their own disciplinary knowledge while attending committee meetings grading exams holding office hours administering programs and departments and negotiating with colleagues By exploring the intellectual activities pursued by these faculty and their ongoing efforts to develop and define their academic interests *Professing to Learn* directs the attention of higher education professionals and policy makers to the core aim of higher education the creation of academic knowledge through research teaching and service The Questions of Tenure Richard P. Chait, Richard Chait, 2002 Children from low income backgrounds often experience fourth year slump despite the fact that their cognitive abilities may be consistent with the norm This book examines the causes of this disparity and outlines an active role for the schools in remedying weaknesses in literacy development *Tenure for Socrates* Jon Huer, 1991 In this provocative criticism of the contemporary American professoriate Jon Huer argues that tenure has created a kind of academic stupor in which those who have it no longer live up to the ideals of their profession In Huer s view the institution of tenure has created an economic sinecure rendering the tenured professor irrelevant to the society that sustains him or her The typical tenured career Huer asserts often degenerates into intellectual boredom the routine publication of a series of narrowly specialized research papers a pervasive dissatisfaction and a search for monetary and other rewards outside the university Huer proposes that the time has come to reexamine the issues surrounding tenure in an attempt to determine the best ways to reinvigorate the professoriate and reestablish a fruitful connection between academic and nonacademic society Divided into four sections Huer s work is written throughout in a refreshingly nonacademic style He begins by examining the institution of academic tenure and its relevance given current market realities Subsequent sections explore the impact of tenure on issues of academic freedom on the relationship between the professor and the larger society and on the professor and his or her career Huer demonstrates that in general those who have tenure do not need it and those who need it do not have it In pursuit of tenure professors are forced to produce meaningless scholarship relevant only to their specialized colleagues and immediate career goals Tenured professors on the other hand far from using their academic freedom in

service of truth and society help perpetuate the academic insulation and irrelevance Certain to spark controversy and debate Tenure for Socrates serves as a much needed reevaluation of both the role of the American professoriate and the impact of tenure on that role

Ending Mandatory Retirement for Tenured Faculty National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Mandatory Retirement in Higher Education, 1991-02-01 The proportion of older faculty is increasing nationwide This book offers guidance not only for dealing with the elimination of mandatory retirement

in higher education but also for current retirement related issues facing all colleges and universities Ending Mandatory Retirement addresses such questions as Do the special circumstances of higher education warrant the continuation of mandatory retirement How would an increase in the number of older faculty affect individual colleges and universities and their faculty members Where there are undesirable effects what could be done to minimize them The book contains analyses of early retirement programs faculty performance evaluation practices pension and benefit policies tenure policies and faculty ages and retirement patterns

The Last Professors Frank Donoghue, 2018-04-03 What makes the modern university different from any other corporation asked Columbia's Andrew Delbanco recently in the New York Times There is more and more reason to think less and less he answered In this provocative book Frank Donoghue shows how this growing corporate culture of higher education threatens its most fundamental values by erasing one of its defining features the tenured professor Taking a clear eyed look at American higher education over the last twenty years Donoghue outlines a web of forces social political and institutional dismantling the professoriate Today fewer than 30 percent of college and university teachers are tenured or on tenure tracks and signs point to a future where professors will disappear Why What will universities look like without professors Who will teach Why should it matter The fate of the professor Donoghue shows has always been tied to that of the liberal arts with the humanities at its core The rise to prominence of the American university has been defined by the strength of the humanities and by the central role of the autonomous tenured professor who can be both scholar and teacher Yet in today's market driven rank and ratings obsessed world of higher education corporate logic prevails faculties are to be managed for optimal efficiency productivity and competitive advantage casual armies of adjuncts and graduate students now fill the demand for teachers Bypassing the distractions of the culture wars and other crises Donoghue sheds light on the structural changes in higher education the rise of community colleges and for profit universities the frenzied pursuit of prestige everywhere the brutally competitive realities facing new Ph D's that threaten the survival of professors as we've known them There are no quick fixes in **The Last Professors** rather Donoghue offers his fellow teachers and scholars an essential field guide to making their way in a world that no longer has room for their dreams First published in 2008 **The Last Professors** have largely had its arguments borne out in the interim as the percentage of courses taught by tenured professors continues to dwindle This new edition includes a substantial Preface that elaborates on recent developments and offers tough but productive analysis that will be crucial for today's academics to heed

Handbook of STEM Faculty Development Sandra M. Linder, Cindy M. Lee, Shannon K Stefl, Karen A. High, 2022-12-01 Faculty in the science technology engineering and mathematics STEM disciplines face intensifying pressures in the 21st century including multiple roles as educator researcher and entrepreneur In addition to continuously increasing teaching and service expectations faculty are engaged in substantive research that requires securing external funding mentoring other faculty and graduate students and disseminating this work in a broad range of scholarly outlets Societal needs of their expertise include

discovery innovation and workforce development It is critical to provide STEM faculty with the professional development to support their complex roles and to base this development on evidence derived from research This edited handbook provides STEM stakeholders with an opportunity to share studies and or experiences that explore STEM faculty development FD in higher education settings More specifically we include work that examines faculty development planning techniques models experiences and outcomes focused on supporting the teaching research service and leadership responsibilities of STEM faculty The Handbook is suited for researchers and practitioners in STEM STEM Education Mathematics Science Technology and Engineering disciplines It is also suited towards faculty developers higher education administrators funding agencies industry leaders and the STEM community at large This handbook is organized around three constructs INPUTS MECHANISMS and OUTPUTS The STEM faculty development inputs construct focuses on topics related to the characteristics of faculty members and institutions that serve as barriers or supports to the adoption and implementation of holistic STEM faculty development programs Questions addressed in the handbook around this topic include What barriers supports exist for STEM faculty How are these barriers supports being addressed through STEM FD How do contexts e g economic political historical influence faculty administrative needs related to STEM FD How do demographics e g gender ethnicity age family background influence faculty administrative needs related to STEM FD The STEM faculty development mechanisms construct focuses on topics related to the actual implementation of STEM faculty development and we consider the potential models or structures of STEM faculty development that are currently in place or conceptualized in theory Questions addressed in the handbook around this topic include What are the processes for developing models of STEM FD What are effective models of STEM FD How is effectiveness determined What roles do stakeholders e g faculty administration consultants play within STEM FD mechanisms The STEM faculty development outputs construct focuses on how to best understand the influence of STEM faculty development on outcomes such as productivity teacher quality and identity in relation to faculty development Questions addressed in the handbook around this topic include How has STEM FD influenced higher education practices and settings What are appropriate output measures and how are they used in practice What collaborations emerge from STEM FD How does STEM FD affect other STEM stakeholders e g students administration business community The aim for this handbook was to examine the multifaceted demands of faculty roles and together with members of the STEM education community envision pathways through which universities and individuals may support STEM colleagues regardless of their experience or rank to enjoy long and satisfying careers Our hope is for these chapters to aid readers in deep reflection on challenges faculty face to contemplate adaptations of models presented and to draw inspiration for creating or engaging in new professional development programs Chapters across this handbook highlight a variety of institutional contexts from 2 year technical colleges to teaching focused institutions in addition to research centric settings Some chapters focus primarily on teaching and learning practices and offer models for improving STEM instruction

Others focus on barriers that emerge for STEM faculty when trying to engage in development experiences There are chapters that examine tenure structures in relation to faculty development and how STEM FD efforts could support research endeavors Mentorship and leadership models are also addressed along with a focus on equity issues that permeate higher education and impact STEM FD It is our sincere hope that this Handbook sparks increased discourse and continued explorations related to STEM FD and in particular the intentional focus of faculty development initiatives to extend to the many facets of academic life
