Teoría de la información y encriptamiento de datos Raúl Ibarra Quevedo, Miguel Ángel Serrano López, Carlos Calixto García y González, Instituto Politécnico Nacional (México), 2001 **Teoría de la información y encriptamiento de datos** Raúl Ibarra Quevedo, Miguel Ángel Serrano López, Carlos Calixto García y González, 2001 **Introducción a la teoría de números** Zaldívar, Felipe, 2024-05-24 Nacida de la necesidad primaria del hombre de contar y medir la aritmética al igual que la geometría tiene su origen en los tiempos prehistóricos Las grandes civilizaciones antiguas desarrollaron un sistema propio de numeración y operaciones básicas pero el creado en la India se impuso por su aparente sencillez la utilización del cero y de la notación con valor numérico posicional Desde entonces comenzó el desarrollo de la teoría de números Este libro es una introducción elemental a la teoría de números o aritmética superior comienza con un análisis de la noción de divisibilidad e introduce las propiedades elementales de las congruencias las congruencias cuadráticas y las raíces primitivas para concluir con el estudio de algunas ecuaciones diofánticas de segundo y tercer grado El capítulo final es una introducción elemental a la aritmética de curvas elípticas Una novedad del libro es la inclusión de algunas aplicaciones de interés actual tales como el intercambio de claves Diffie Hellman y los criptosistemas de clave pública RSA ElGamal y de Rabin **Proceso electoral federal 1997** Instituto Federal Electoral (México), 1998 Qué pasa , 2011 **Introducción a la teoría de la información y codificación** José María Hernando Rábanos, 1974 **Monografía fundamentos teóricos, matemáticos y estado del arte de las teorías base de la encriptación de datos** Andrés Felipe Vásquez Henao, 2011 Introduccion Desde sus inicios el hombre desarrolló maneras de comunicarse con los demás y desde entonces surge la necesidad que parte de su información sea secreta conocida por las personas a quienes está destinada Esta necesidad de poder enviar mensajes de modo que únicamente fueran entendidos por los destinatarios hizo que cada civilización utilizara códigos secretos y métodos de ocultar la información que se considera valiosa de modo que no sea descifrable por aquellas personas que puedan interceptar estos mensajes En Egipto por ejemplo la criptografía se encuentra en jeroglíficos no estatuas talladas en monumentos Sin embargo no se piensa que sean intentos serios de comunicación secreta En la Grecia clásica los espartanos transmitían sus mensajes utilizando el la escitala método que consistía en enrollar en un bastón una cinta de papel y sobre la cual se escribía el mensaje a ser transmitido posteriormente se desenrollaba y así se mandaba a su destino lugar en el cual se enrollaba en otro bastón idéntico al primero para así poder entender el mensaje original En la época del imperio romano en el siglo I a.C Julio César empleó un código secreto que consistía en sustituir cada letra del mensaje por otra que en el alfabeto estuviese desplazada tres lugares este método se conoce como cifrado de César Con características similares a este cifrado siglos más tarde se generaron otros cifrados como el cifrado de Vigenère 1586 Cifrado de Beaufort 1710 y el cifrado de Vernam 1917 el cual empleaba un alfabeto binario *Teoría de la información y codificación* Norman Abramson, 1966 *Problemas resueltos de teoría de la información, codificación y criptología* Antonio Zamora Gómez, 1996-01-01 *Teoría de la*

información y de la codificación Gonzalo Cuevas Agustín, 1981 *Introducción a la teoría de la información y de la codificación* Antonio Zamora Gómez, 1996 El título del libro obedece naturalmente a que lo pretendido es introducir al lector en esta extensa disciplina. Primero se realiza un estudio de la Teoría que Shannon introdujo en su artículo *A Mathematical Theory of Communication* a finales de la década de los cuarenta. Teoría de Código de una manera muy superficial dedicándose exclusivamente al caso de códigos lineales binarios y otras técnicas de codificación permiten la detección y corrección de los errores que se producen en la transmisión a través de un canal. Finalmente se aborda el secreto y seguridad en la transmisión y almacenamiento de la información. Se realiza un breve viaje por la historia de la Criptología y una introducción a los distintos sistemas de cifrado tanto de clave privada como pública. **Teoría de la información y codificación, 2a ed.** Cándido López García, Manuel Fernández Veiga, 2013-10 **Teoría de la información y codificación** Norman Abramson, 1986 La información y sus fuentes. Propiedades de los códigos. Codificación de fuentes de información. Teoría de la información y codificación. Canales e información mutua. Mensajes confiables transmitidos por canales no confiables. **Teoría de la información, codificación y lenguajes** Gonzalo Cuevas Agustín, 1987 **Teoría de la información** Julio P. Lafuente López, Gustavo Ochoa Lezáun, 2021 *Introducción a la teoría de la información y codificación*, 1967* **Teoría de la información** Santiago Montes, 1976 *Teoría de la información y codificación* Norman Abramson, 1969 **Una teoría de la información** Oscar Johansen Bertoglio, 2003 **Teoría de la información y codificación** Ernesto Mercado Escutia, 2016
