Catalogues of Sales Sotheby's (Firm),1994-03-10 **The Constitution of European Democracy** Dieter

Grimm,2017-06-23 Europe is in crisis With rising unrest among citizens of EU member states exemplified by the UK's decision to leave the EU and the growing popularity of anti EU political parties Dieter Grimm presents the argument that Europe has to change its method of further integration or risks failure This book containing essays many of which have not been published in the English language to date explores how the EU has become over constitutionalized Grimm argues that this has left the EU with a democratic deficit leading to the alienation of citizens This book highlights Europe's democracy problem The most prominent argument running throughout is that the EU and its decision making processes have become over constitutionalized This is due to the constitutionalization of European treaties which has occurred by raising them to the eminence of a constitution as a result of the jurisprudence of the European Court of Justice However the treaties contain provisions that would be ordinary law in member states The fact that they enjoy constitutional status in Europe detaches them from the democratic processes in the member states and the EU itself and contributes to the growing independence of the EU's executive and judicial institutions The book also asserts that currently the EU does not have enough sources of legitimation to uphold itself surviving solely on the legitimation provided by member states One popular remedy is the suggestion of parliamentarization of the EU giving the European Parliament the powers typically possessed by national parliaments as a means of heightening its legitimation This is criticized by Grimm as expanding the Parliament's powers would not change the effects of over constitutionalization as the Parliament is inferior to the constitution In order to reduce the EU's legitimacy deficit Grimm makes several recommendations The repoliticization of the decision making processes which can be achieved by reducing treaties to the capacity necessary for their constitutional function the reinvigoration of European Parliament elections by having Europeanized parties to increase engagement with European society and give voters the opportunity to more immediately influence European politics and a new division of powers based on subject matter to restrain European expansionism reserving particular areas of policy to the responsibility of member states even if this affects the common market

Beyond Energy Jacopo Maria Pepe,2017-11-22 Jacopo Maria Pepe examines the rapid development of non energy transport infrastructure in the broader Eurasian space By doing so the author considers the ongoing structural transformation of the Eurasian continent against the backdrop of deepening commercial interconnectivity in Eurasia into broader areas of trade supported by the rapid development of rail connectivity He frames this process in a long wave historical analysis and considers in detail the geopolitical geo economic and theoretical implications of deepening physical connectivity for the relationships among China Russia Central Asia and the European Union Catalogue A. Dulau & Co,1925 Journal of Education ,1917 The Journal of Education ,1917 **Journal of Education and School World**

,1917 **Roman Presences** Catharine Edwards,1999-03-04 This collection of essays explores aspects of the reception of ancient Rome in a number of European countries from the late eighteenth century to the end of the Second World War Rome has been made to stand for literary authority republican heroism imperial power and decline the Catholic Church the pleasure of ruins The studies offered here examine some of the sometimes strange and unexpected places where Roman presences have manifested themselves during this period Scholars from several disciplines including English literature and history of art as well as classics bring to bear a variety of approaches on a wide range of images and texts from statues of Napoleon to Freud s analysis of dreams Rome s seemingly boundless capacity for multiple indeed conflicting signification has made it an extraordinarily fertile paradigm for making sense of and also for destabilizing history politics identity memory and desire

The Golden Ages of the Dark Ages Dr. Nazry Bin Yahya,2021-01-28 The Golden Ages of the Dark Ages is an exciting historical analysis about the civilizations and empires that exist around the globe during the European Dark Ages The use of the maps in the chapters allows readers to visualize the civilizations development away from Europe There are too many civilizations to compile Thus this book is based on two basic philosophies that the time line is limited only to the prominent civilizations within 500 CE to 1500 CE and also to have a minimum of 100 years of history Readers too must acknowledge that there were many other great world civilizations within and outside of the time line We can only pick a handful of the civilizations traditions and empires This is a factual book that might create further interests for readers to explore in depth some of the revelations This book too is hoped to help readers to critically analyze their past readings as history has been proven to be distorted by some of the historians
