The Engines Of Light:

Engine City Ken MacLeod, 2024-03-26 The Concluding Volume of the Engines of Light With Cosmonaut Keep and Dark Light both finalists for science fiction's Hugo Award Ken MacLeod launched a new interstellar epic with all the engaging characters and ingenious SF inventiveness of his earlier Fall Revolution novels Now MacLeod delivers the culmination of his epic of a human future crammed with innumerable varieties of intelligent alien life and in which humans find themselves involved in the politics of aliens as powerful and inscrutable as gods and entangled in their wars For ten thousand years Nova Babylonia has been the greatest city of the Second Sphere an interstellar civilization of human and other beings who have been secretly removed throughout history from Earth Now humans from the far reaches of the Sphere have come to offer immortality and to urge them to build defenses against the alien invasion they know is coming As humans and aliens compete and conspire the wheels of history will lathe all the players into shapes new and surprising The alien invasion will reach New Babylon at last led by the most alien figure of all

Dark Light Ken MacLeod, 2004-06-01 In this science fiction sequel to *Cosmonaut Keep* a human and his friends travel to another planet to interrogate gods and solve a mystery Intelligence it turns out is rare on planetary surfaces It thrives everywhere else from the Oort cloud fringes of star systems to the magma furnaces beneath planetary crusts And among the most powerful of the galaxy's intelligences there are profound differences of opinion about how to deal with surface life forms such as human beings For untold light years from Earth the powers that rule the universe have been for millennia plucking humans and other intelligent beings from Earth and forcibly resettling them in a number of star systems close to one another leaving them to develop on their own A few generations ago a small cadre of humans from Earth's twenty first century arrived in this Second Sphere on their own power the first humans ever to do so Their descendants have formed the *Cosmonaut* class that dominates Mingulay Now two hundred years later Gregor Cairns and a small group of associates have rediscovered faster than light travel and traveled to the star system next door They're determined to find more of the original mysteriously long lived cosmonauts They want answers And for those answers they intend to interrogate the gods

Cosmonaut Keep Ken MacLeod, 2010-04-01 A portal to a deeply imagined future history that parlays X-Files paranoia about Area 51 and alien Greys into a vast interstellar community Paul McAuley *Interzone* A Hugo Award Nominee for Best Novel Ranging from a gritty near future Earth to a distant alien world Ken MacLeod's *Cosmonaut Keep* is contemporary science fiction at its highest level A visionary epic filled with daring individuals seeking a place for themselves in a vast complex and enigmatic universe Matt Cairns is a twenty first century outlaw Programmer who takes on the shady jobs no one else will touch Against his better judgment he accepts an assignment to crack the Marshall Titov a top secret orbital station operated by the European Space Agency But what Matt will discover there will propel him on an extraordinary and quite unexpected journey Gregor Cairns is an exobiology student and descendant of one of Terra Nova's first families Hopelessly infatuated with a lovely young trader's daughter he is unaware

that his research partner Elizabeth has fallen in love with him Together Gregor and Elizabeth confront the great work his family began three centuries earlier to rediscover the secret of interstellar travel MacLeod handles the strands of the plot deftly weaving one beautifully realized world with the other and highlighting the parallels between the two Rarely does a book demand so much of the reader and then deliver Publishers Weekly One of the more original sf writers at work today Booklist
