The Economic Development Of The Netherlands Since 1870

Jan Luiten van Zanden, Arthur van Riel

The Economic Development Of The Netherlands Since 1870 Ecdevmode:

The Economic Development of the Netherlands Since 1870 J. L. van Zanden, 1996 The articles in this volume give a balanced picture of the main debates of Dutch economic history after 1870 the slow industrialization in the nineteenth century the protracted character of the depression of the 1930s the Dutch miracle of 1950 to 1973 and the Dutch disease of the 1970s and 1980s Some eminent contributions to these debates have been translated here in to English for the first time

The Economic Development of the Netherlands Since 1870 J. L. van Zanden, 1995 *The Economy and Politics of the Netherlands Since 1945* Richard Griffiths, 2013-03-09 There is relatively little information on The Netherlands written in the English language which is easily accessible to social science students and even less which is systematically assembled between the covers of a single book This is unfortunate not only because The Netherlands is an important part of Western Europe but because the experience of The Netherlands in the way in which it has attempted to resolve the economic and political problems confronting it may help to shed valuable light on similar issues facing other European countries The contributions for this volume were chosen with these considerations in mind On the one hand the selection of topics was intended to provide an overall impression of the political and economic development of The Netherlands since the Second World War Thus separate chapters are devoted to an examination of economic development counter inflation energy regional and planning policies pressure groups electoral performance cabinet formation and colonial and European policies On the other hand these areas for investigation were chosen to invite specific contrast with the experience of other European nations or to illustrate certain problems of political or economic theory It is my pleasure to thank first of all the contributors themselves for the conscientious way in which they prepared their drafts which made my task as editor so much easier Secondly it will be apparent to even the most casual observer that I have contributed two chapters *The Strictures of Inheritance* Jan Luiten van Zanden, Arthur van Riel, 2021-04-13 A major feat of research and synthesis this book presents the first comprehensive history of the Dutch economy in the nineteenth century an important but poorly understood piece of European economic history Based on a detailed reconstruction of extensive economic data the authors account for demise of the Dutch economy's golden age After showing how institutional factors combined to make the Dutch economy a victim of its own success the book traces its subsequent emergence as a modern industrial economy Between 1780 and 1914 the Netherlands went through a double transition Its economy which in the words of Adam Smith was approaching a stationary state in the eighteenth century entered a process of modern economic growth during the middle decades of the nineteenth At the same time the country's sociopolitical structure was undergoing radical transformation as the decentralized polity of the republic gave way to a unitary state As the authors show the dramatic transformation of the Dutch political structure was intertwined with equally radical changes in the institutional structure of the economy The outcome of this dual transition was a rapidly industrializing economy on one side and on the other the neocorporatist sociopolitical structure that would

characterize the Netherlands in the twentieth century Analyzing both processes with a focus on institutional change this book argues that the economic and political development of the Netherlands can be understood only in tandem An *Economic and Social History of the Netherlands, 1800-1920* Michael Wintle,2000-09-21 An Economic and Social History of the Netherlands 1800 1920 provides a comprehensive account of Dutch history from the late eighteenth to the early twentieth century examining population and health the economy and socio political history The Dutch experience in this period is fascinating and instructive the country saw extremely rapid population growth awesome death rates staggering fertility some of the fastest economic growth in the world a uniquely large and efficient service sector a vast and profitable overseas empire characteristic pillarization and relative tolerance Michael Wintle also examines the lives of ordinary people what they ate how much they earned what they thought about public affairs and how they wooed and wed This book will be of central importance to Dutch specialists as well as European historians more generally *Long-term Changes in Growth in the Netherlands Since the Middle of the Nineteenth Century* , Three major subjects are discussed industrialization in the Netherlands the political and economic ties with the Dutch East Indies and their impact on the Netherlands economy the high rate of population growth in the Netherlands in the period 1870 1979 *Academic Economics in Holland 1800-1870* I.H. Butter,2011-10-13 The present study is based on research largely pursued in Holland from December 1956 until July 1957 The inquiry is centered around the development of academic economics in Holland between 1800 and 1870 This period suggested itself as an appropriate unit of time though it became necessary to extend the specified period in certain parts of the study Reasons for the temporal delimitation of the investigation will become apparent as will the reasons for concentrating on academic economics Financial assistance from the Rockefeller Foundation helped to make possible the field research carried out in The Netherlands Most of the material incorporated into the study was found in the following Dutch libraries Bibliotheek der Nederlandsche Economische Hoogeschool Rotterdam Economische Historische Bibliotheek Amsterdam Universiteitsbibliotheek van Amsterdam Handels Economische Bibliotheek Amsterdam and Koninklijke Bibliotheek Den Haag The study was greatly enhanced by suggestions and kind assistance from a number of librarians in charge of the above libraries I further wish to acknowledge cooperation of Professors H Van Stuijvenberg I J Brugmans A M De Jong P Hennipman G M Verrijn Stuart and F De Vries who helped to direct my explorations when sources on Dutch economics were largely unfamiliar to me Helpful advice and suggestions were supplied also by Drs G Koen Drs J oh De Vries and Drs H H Behrens **Modernization and Cleavage in Dutch Society** Erik H. Bax,1990 *Industrial Retardation in the Netherlands 1830-1850* Richard Griffiths,2013-03-09 Much modern Le post 1750 economic history is concerned with success in that a vast body of literature focuses its attention upon the experience of industrialisation and economic growth or upon relative differences in performance once the growth process is underway The explanations advanced frequently hinge on those supply and demand factors perceptible during the growth period itself which may have helped or hindered economic

progress The problem which arises with this approach is whether those forces attributed with having pulled a country forward were the same as those which in their absence had held it back For example the growth of international demand may be seen as a major stimulus in the economic development of a particular country but its effectiveness as a stimulant may have been contingent upon the prior removal of quite different obstacles to growth In these circumstances it would be quite wrong to attribute lack of earlier development to the absence of international demand Thus the study of a period preceeding discernible growth in a sector of the economy may tell historians as much about the reasons for subsequent growth as a study of the growth period itself This was my initial reason for choosing to research into the industrial development in the Netherlands in the first half of the nineteenth century that it was an interval in economic history usually interpreted as one of stagnation of missed opportunities and even of economic decline

Coordination in Transition

Jeroen (L.J.) Touwen, 2014-06-05 This book analyzes the evolution of the institutional structure of the Dutch political economy since 1950 It sketches in broad strokes the origin and economic role of coordination in the Netherlands The Dutch economy is compared with other OECD countries by using the varieties of capitalism theory and distinguishing between coordinated and liberal market economies The author focuses on the constant adaptation of deliberative institutions in the business system in labor relations and in welfare policy The complex institutional setting did not prevent the economy from participating in the globalization of markets and capital that took place since ca 1980 The book is located at the intersection of two quite different literatures modern economic history and the political science literature on varieties of capitalism
