Read, 2020-11-17 Since the first spacecraft launched in 1957 there have been many ground breaking missions that have expanded our knowledge of the solar system The 50 featured in this collection include Voyager's Grand Tour Apollo 8 and the first crewed mission to the Moon the first woman in space and the first communication satellite that brought live television to the world You can also find information on spy satellites space tourism and climate change In the early days of space exploration the focus was on military dominance Today most missions require the collaboration of several different countries and there's a broader range of research This is an exciting time we are living in Space history is unfolding right before our eyes Human Physiology in Space Barbara Frae Lujan, 1994 *Final Frontier* Brian Clegg, 2014-08-19 Star Trek was right there is only one final frontier and that is space Human beings are natural explorers and nowhere is this frontier spirit stronger than in the United States of America It almost defines the character of the US But the Earth is running out of frontiers fast In Brian Clegg's *The Final Frontier* we discover the massive challenges that face explorers both human and robotic to uncover the current and future technologies that could take us out into the galaxy and take a voyage of discovery where no one has gone before but one day someone will In 2003 General Wesley Clark set the nation a challenge to produce the technology that would enable new pioneers to explore the galaxy That challenge is tough the greatest we've ever faced But taking on the final frontier does not have to be a fantasy In a time of

recession escapism is always popular and what greater escape from the everyday can there be than the chance of leaving Earth's bounds and exploring the universe. With a rich popular culture heritage in science fiction movies, books, and TV shows, this is a subject that entertains and informs in equal measure.
