**Special Issue on Water Transport Across Biological Membranes** R. Greger, 2014-09-01 **Special Issue on Water Transport Across Biological Membranes** R. Greger, 2014-08-23 **Special Issue on Water Transport Across Biological Membranes** Aquaporins Baohue Yang, 2017-03-03 This book provides a state of the art report on our current understanding of aquaporins and the future direction of the field Aquaporins AQP are a group of water channel proteins that are specifically permeable to water and other small molecules such as glycerol and urea To date thirteen water channel proteins AQP0 AQP12 have been cloned and the mechanisms and physiological functions of water transport across biological membranes have long been the subject of interest Recent advances in the molecular biology and physiology of water transport have yielded new insights into how and why water moves across cell membranes and studies on aquaporin knockout mouse models suggest that aquaporins are involved in the development of some diseases and they may be useful targets of research into selective inhibitor drugs By focusing on the advances made over the last 20 years in the biophysics genetics protein structure molecular biology physiology pathophysiology and pharmacology of aquaporins in mammalian cell membranes this book provides novel insights into further mechanisms and the physiological significance of water and some small molecule transport in mammals in order to stimulate further research in new directions **Special Issue Structure, Dynamics and Function of Proteins in Biological Membranes** Fritz K. Winkler, 2004 Special Issue on 3rd International Conference on Structure, Dynamics and Function of Proteins in Biological Membranes Andreas Engel, 2007 *Molecular Mechanisms of Water Transport Across Biological Membranes* Wilfred D. Stein, Thomas Zeuthen, 2002-04-02 International Review of Cytology presents current advances and comprehensive reviews in cell biology both plant and animal Authored by some of the foremost scientists in the field each volume provides up to date information and directions for future research This volume looks at water movements from a wide range of levels It examines how water interacts with the major components of the cell including proteins and lipids It discusses how water moves across cell membranes by diffusion how it is channelled across these membranes or in certain cases pumped across and how water movements are controlled This book demonstrates how water and ion movements are closely linked in order to provide a better understanding of their behavior Essential Physical chemistry of water at biological interfaces Up to date reviews of water behavior in cells Water in integrated systems Current information on water channels across membranes *Special Issue Membranes* David R. Dixon, 2007 Special Issue on Domain Organization in Biological Membranes L. D. Bergel'son, John E. Fogarty International Center for Advanced Study in the Health Sciences, 1995 Special Issue on Biological Membranes and Biotechnology Graham G. Stewart, Inge Russell, 1997 **Molecular Biology and Physiology of Water and Solute Transport** Stefan Hohmann, Søren Nielsen, 2012-12-06 Biophysical studies in the 1950ies and 1960ies led to the realization that the water permeability of certain biological membranes must be due to the presence of water transporting proteins This hypothesis was

confirmed in 1991 and 1992 with the pioneering discovery of the first molecular membrane water channel CHIP28 by Agre and coworkers. This integral membrane protein which is abundant in the erythrocyte membrane and in many epithelial cells is now called aquaporin 1 or AQP1. Thus the terms water channel or aquaporin are synonymous. In July 2000 more than 200 researchers came together in Gothenburg, Sweden for the 3rd International Conference on the Molecular Biology and Physiology of Water and Solute Transport to discuss progress in this emerging research field. 58 different presentations from this conference are the basis for this book. Cumulatively these 58 short chapters provide a balanced overview complementing numerous recent reviews in this field.
