

Species of Origins

The background of the slide is a vibrant cosmic scene. It features a central bright light source, possibly a star or a nebula core, emitting a strong glow. This light is surrounded by swirling, ethereal clouds of purple and pink gas, creating a sense of depth and movement. Numerous small, distant stars are scattered throughout the scene, adding to the celestial theme.

Species Of Origins Americas Search For A Creation Story:

Species of Origins Karl Giberson,Donald A. Yerxa,2002 In *Species of Origins* Karl W Giberson and Donald A Yerxa examine America s controversial conversation about creation and evolution While noting that part of the discord stems from the growing cultural and religious diversity of the United States they argue powerfully that the real issue is the headlong confrontation between two seemingly incompatible worldviews upon which millions of Americans rely modern naturalistic science and traditional Judeo Christian religions Visit our website for sample chapters *Species of Origins* Karl W. Giberson,Donald A. Yerxa,2002-10-09 In *Species of Origins* Karl W Giberson and Donald A Yerxa examine America s controversial conversation about creation and evolution While noting that part of the discord stems from the growing cultural and religious diversity of the United States they argue powerfully that the real issue is the headlong confrontation between two seemingly incompatible worldviews upon which millions of Americans rely modern naturalistic science and traditional Judeo Christian religions **Brahmin Prophet** Gillis J. Harp,2003 The Reverend Phillips Brooks was undeniably one of the most popular preachers of Gilded Age America and the author of the beloved Christmas carol O Little Town of Bethlehem However very few critical studies of his life and work exist In this insightful book Gillis J Harp places Brooks s religious thought in its proper historical cultural and ecclesiastical contexts while clarifying the sources of Brooks s inspiration The result is a fuller richer portrait of this luminous figure and of this transitional era in American protestantism **Culture's Vanities** David Steigerwald,2004 Americans want it both ways They are committed to cultural diversity yet demand an endless variety of cheap consumer goods from a global system that destroys distinct ways of life In this groundbreaking work David Steigerwald argues that Americans have papered over this paradox by embracing the rhetoric of diversity and multiculturalism which hides the extent to which they have accepted homogenized ways of working and living Oracles of Science Karl Giberson,Mariano Artigas,2009-02-27 *Oracles of Science* examines the popular writings of the six scientists who have been the most influential in shaping our perception of science how it works and how it relates to other fields of human endeavor especially religion Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science Their controversial often personal sometimes idiosyncratic opinions become widely known and perceived by many to be authoritative Curiously the leading oracles of science are predominantly secular in ways that don t reflect the distribution of religious beliefs within the scientific community Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles This book will be welcomed by many who

are disturbed by the tone of the public discourse on the relationship between science and religion and will challenge others to reexamine their own preconceptions about this crucial topic

Process and Providence Bradley J. Gundlach, 2013-11-30 Charles Hodge James McCosh B B Warfield these leading professors at Princeton College and Seminary in the nineteenth and early twentieth centuries are famous for their orthodox Protestant positions on the doctrine of evolution In this book Bradley Gundlach explores the surprisingly positive embrace of developmental views by the whole community of thinkers at old Princeton showing how they embraced the development not only of the cosmos and life forms but also of Scripture and the history of doctrine even as they defended their historic Christian creed Decrying an intellectual world gone evolution mad the old Princetonians nevertheless welcomed evolution properly limited and explained Rejecting historicism and Darwinism they affirmed developmentalism and certain non Darwinian evolutionary theories finding process over time through the agency of second causes God's providential rule in the world both enlightening and polemically useful They also took care to identify the pernicious causes and effects of antiscientific evolutionisms By the 1920s their nuanced distinctions together with their advocacy of both biblical inerrancy and modern science were overwhelmed by the brewing fundamentalist controversy From the first American review of the pre Darwinian *Vestiges of the Natural History of Creation* to the Scopes Trial and the forced reorganization of Princeton Seminary in 1929 *Process and Providence* reliably portrays the preeminent conservative Protestants in America as they defined contested and answered precisely and incisively the many facets of the evolution question

Science and Faith within Reason Jaume Navarro, 2016-04-01 Scientists historians philosophers and theologians often engage in debates on the limitations and mutual interactions of their respective fields of study Serious discussions are often overshadowed by the mass produced popular and semi popular literature on science and

religion as well as by the political agendas of many of the actors in these debates For some reducing religion and science to forms of social discourse is a possible way out from epistemological overlapping between them yet is there room for religious faith only when science dissolves into one form of social discourse The religion thus rescued would have neither rational legitimisation nor metaphysical validity but if both scientific and religious theories try to make absolute claims on all possible aspects of reality then conflict between them seems almost inevitable In this book leading authors in the field of science and religion including William Carroll Steve Fuller Karl Giberson and Roger Trigg highlight the oft neglected and profound philosophical foundations that underlie some of the most frequent questions at the boundary between science and religion the reality of knowledge and the notions of creation life and design In tune with Mariano Artigas s work the authors emphasise that these are neither religious nor scientific but serious philosophical questions

The Language of Science and Faith Karl W. Giberson, Francis S. Collins, 2011-01-28 World renowned scientist Francis Collins and fellow scientist Karl Giberson show how we can embrace both science and faith without compromising either Their fascinating treatment explains how God cares for and interacts with his creation while science offers a reliable way to understand the world he made

Echoes of Coinherence W. Ross Hastings, 2017-07-28 This book re imagines the universe and the scientific study of it through the lens of a triune Creator three persons of irreducible identity in a perichoretic or coinherent communion It modestly proposes that Trinitarian theology and especially the coinherent natures of the Son in the incarnation provides the metaphysic or theory of everything that manifests itself in the subject matter of science The presence of the image of the triune God in humanity and of traces of this God in the non human creation are discussed highlighting ontological resonances between God and creation resonances between the being of God and his creation such as goodness immensity yet particularity intelligibility agency relationality and beauty This Trinitarian reality suggests there should be a similarity also with respect to how we know in theology and science critical realism something reflected in the history of ideas in each These resonances lead to the conclusion that the disciplines of theology and science are in fact coinherent not conflicted This involves recognition of both the mutuality of these vocations and also importantly their particularity Science its own distinct guild yet finds its place ensconced within an encyclopedic theology and subject to first order credal theology
