Speculative Capital The Invisible Hand Of International Finance:

Speculative Capital Nasser Saber,1999 The New Architecture of the International Monetary System Paolo Savona,2013-03-09 Two years ago the Guido Carli Association in collaboration with the Aspen Institute Italia charged a group of distinguished economists to examine the problems created by the unsatisfactory functioning of the International Monetary System The two resulting conferences were sponsored by the Fondazione della Cassa di Risparmio di Firenze CESIFIN and the Permanent Advisory Committee on the Euro and the Dollar PACE D Their research had a two fold aim The first was an examination of the basic function of the International Monetary System with a special focus on the role the Euro would and should have The second was the preparation of a list of recommendations on how to resolve the problems financial problems in particular affecting the entire world community Last year the group focused on efforts taking place in diverse financial institutions and universities to construct what has been called the New International Financial Architecture This group considered the legal problems arising from European and international integration and more generally from the new architecture of the International Monetary System This book *The New Architecture of the International Monetary System* is the final result of their efforts It will be an invaluable resource for academics professionals and students alike *Fragile Finance* A. Nesvetailova,2007-10-17 *Fragile Finance* examines financial crisis in the era of global credit Drawing on the work of Hyman Minsky the book discusses the global financial system over the past decade suggesting that financial fragility stems from an explosive combination of financial innovation over borrowing and progressive illiquidity of financial structures

Globalization and the Gulf John W. Fox,Nada Mourtada-Sabbah,Mohammed Al Mutawa,2006-09-27 For centuries the Arabian Gulf has been a crossroads where seafaring people and Bedouins alike travelled great distances transacting business Events of the past few years both good and bad have directed the world s attention to the Arabian Peninsula where a rich cultural tradition is rapidly incorporating the latest innovations from around the world This is the process of globalization New economies create enormous potential but it will require great care for the people of the region to steer through a period of profound change Political and economic interests intent on maintaining the flow of petroleum products on one hand and people in the Gulf region who assess their won interests from quite a different perspective on the other exert pressures from conflicting directions Reconciling these interests in a time of rapid globalization poses enormous challenges This timely volume brings together the work of scholars from both the Middle East and the West who have the expertise to evaluate the interaction of new ideas new technologies and new economies Brought together by the American University of Sharjah and the Sociological Association of the UAE the contributors reflect on both the process of globalism and on the traditions of Gulf society and culture offering views on how these trends interact within the global system A Calculus of Power Peter Gowan,2020-05-05 In this wide ranging and incisive collection Peter Gowan traces the contours of the world order that emerged after the end of the Cold War and assesses its prospects in the light of the global economic downturn Arguing that

the present inter state system was shaped from the outset by Washington's drive to maintain its status as global hegemon Gowan dissects several cherished myths of the liberal mainstream offering a radical counter history of the UN and a sharp critique of the West's interventions in the Balkans He provides a forceful response to advocates of a new cosmopolitanism and engages with neo realist theories of international relations asking whether the US invasions of Iraq and Afghanistan have resulted in a crisis for their visions of American power and discussing what the lineaments of a future order might be Closing with an interview conducted just before his death which discusses his life's work *A Calculus of Power* is a penetrating look at contemporary world politics by one of the most renowned thinkers of the New Left

World Financial Orders Paul Langley, 2003-08-27 *World Financial Orders* challenges the predominance of neo liberalism as a mode of knowledge about contemporary world finance and claims that it neglects the social and political bases as well as the malign consequences of change He looks to the field of International Political Economy IPE to construct an alternative mode one that critically restores society and politics An historical approach to IPE is advanced that accounts for modern world finance since the seventeenth century as a succession of structurally distinct hierarchical social orders This book will be of interest to those working in the field of IPE and to those scholars researchers and students from across the social sciences who seek to challenge the common sense neo liberal explanation of contemporary world finance

The Great Credit Crash Jeffrey Sommers, Martijn Konings, 2020-05-05 Most accounts of the current financial crisis tell a story of deregulation out of control markets and irresponsible speculation But few of those works have done more than regurgitate the newspaper coverage In contrast *The Great Credit Crash* digs deeper drawing on some of the most prominent radical analysts of the modern market to foreground the key questions that are still waiting to be answered This volume presents a more complete and convincing analysis of the recent economic disaster which is revealed as a product of a social order built during the triumphalist years of neoliberal capitalism The contributors assess current events and political responses critically examining official rhetoric and hegemonic narratives to point the way to an understanding of the crisis beyond the subprime headlines

Essays on: The Nature and State of Modern Economics Tony Lawson, 2015-04-17 What do modern academic economists do What currently is mainstream economics What is neoclassical economics And how about heterodox economics How do the central concerns of modern economists whatever their associations or allegiances relate to those traditionally taken up in the discipline And how did economics arrive at its current state These and various cognate questions and concerns are systematically pursued in this new book by Tony Lawson The result is a collection of previously published and new papers distinguished in providing the only comprehensive and coherent account of these issues currently available The financial crisis has not only revealed weaknesses of the capitalist economy but also highlighted just how limited and impoverished is modern academic economics Despite the failings of the latter being more widely acknowledged now than ever there is still an enormous amount of confusion about their source and true nature In this collection Tony Lawson also identifies the causes of the discipline's

failings and outlines a transformative solution to its deficiencies Amongst other things Lawson advocates for the adoption of a more historical and philosophical orientation to the study of economics one that deemphasizes the current focus on mathematical modelling while maintaining a high level of analytical rigour In so doing Lawson argues for a return to long term systematic and sustained projects in the manner pursued by the likes of Marx Veblen Hayek and Keynes concerned first and foremost with advancing our understanding of social reality Overall this forceful and persuasive collection represents a major intervention in the on going debates about the nature state and future direction of economics *The Casino, Card and Betting Game Reader* Mark R. Johnson,2021-12-30 Casino games and traditional card games have rich and idiosyncratic histories complex subcultures and player practices and facilitate the flow of billions of dollars each year through casinos and card rooms and between professional players and amateurs They have nevertheless been overlooked by game scholars due to the negative ethical weight of gambling with such games pathologized and labelled as deviance or mental illness few look beyond to unpick the games their players and their communities The Casino Card and Betting Game Reader offers 25 chapters studying the communities playing these games the distinctive cultures and practices that have emerged around them their activities and beliefs and interpersonal relationships and how these games influence both positively and negatively the lives and careers of millions of game players around the world It is the first of a new series of edited collections *Play Beyond the Computer* dedicated to exploring the play of games beyond computers and games consoles *Shaking the Invisible Hand* B. Moore,2006-04-04 This book makes the case that economies are complex systems and in response to this develops a unique dynamic nonequilibrium process analysis of macroeconomics It provides a brief introduction to complex systems chaos theory and unit roots The importance and implications of contingency for economic behaviour are developed
