Spherical Astronomy For Astrologers:

Spherical Astronomy for Astrologers George C. Noonan, 1974-01-01 Provides those interested in astrology with much of the astronomical knowledge necessary for a thorough understanding Extensive examples are included to help the reader understand the theory of astrology calculate important points such as the Midheaven Ascendant with [Astronomy and Astrology in the Medieval Islamic World](#) Edward S. Kennedy, 2024-12-11 This collection of studies by Edward Kennedy looks first at questions of spherical astronomy celestial mapping and planetary models and then deals with astrological calculations Throughout the author emphasises the importance of advances in mathematics for understanding the development of medieval Arabic sciences This collection of studies based on previously unexploited manuscript sources in Arabic and Persian They were written by authors from the 9th through the 15th centuries whose locations reached from south China in the east through Central Asia the Middle and Near East and North Africa to Spain in the west The topics are predominately astronomical rather than astrological The former include eclipse predictions problems in spherical astronomy non ptolemaic planetary theory and the achievements of Ulugh Beg and his observatory Astrological subjects treated are the method of calculating the ascendant and how to determine astrological houses and lots An astrological history of the career of Genghis Khan is also described *Fixed Stars and Judicial Astrology* George C. Noonan, 2009-08 Perhaps the least understood and most misused elements in astrology today are the fixed stars Current practice is to consider the stars as no more than mini manifestations of the planets whose nature they are presumed to hold The locations of the stars projected onto the ecliptic are then considered valid points for aspectual relationships No special significance is attributed to the non zodiacal constellations nor is a star's location within a constellation given any weight whatsoever Finally modern astrology places no distinction on the use of the stars and constellations in genethliacal astrology and the other branches of the ancient art In this book the natures of the fixed stars and constellations as known by the classicists are discussed in detail Methods of delineating the fixed stars are indicated with special emphasis on the applications to judicial astrology Included are chapters on the nature of the fixed stars the northern southern and zodiacal constellations genethliacal applications of the fixed stars judicial astrology and three appendices with information on mathematics and rulership and a complete listing of the fixed stars [Light on Life: An Introduction to the Astrology of India](#) Dr. Robert Svoboda, Hard de Fouw, 2019-05-01 Light on Life brings the insight and wisdom of Indian astrology to the Western reader Jyotish or Indian astrology is an ancient and complex method of exploring the nature of time and space and its effect upon the individual Formerly a closed book to the West the subject has now been clarified and explained by Hart de Fouw and Dr Robert Svoboda two experts and long term practitioners In Light on Life they have created a complete and thorough handbook that can be appreciated and understood by those with very little knowledge of astrology [World-maps for Finding the Direction and Distance to Mecca](#) David King, 2021-09-06 Two remarkable Iranian world maps were discovered in 1989 and 1995 Both are made of brass and date

from 17th century Iran Mecca is at the centre and a highly sophisticated longitude and latitude grid enables the user to determine the direction and distance to Mecca for anywhere in the world between Andalusia and China Prior to the discovery of these maps it was thought that such cartographic grids were conceived in Europe ca 1910 This richly illustrated book presents an overview of the ways in which Muslims over the centuries have determined the sacred direction towards Mecca qibla and then describes the two world maps in detail The author shows that the geographical data derives from a 15th century Central Asian source and that the mathematics underlying the grid was developed in 9th century Baghdad

Classical Scientific Astrology George C. Noonan, 2005-07 Reconstructs the astrology of the classicists 200 BC to 1600 AD so the reader may gain an appreciation for what astrology really was lay to rest any misconceptions so modern astrology can once again take its rightful place The classicists predictions about the economy business military ventures national leadership were no less accurate than those of astrologers today Their scientific principles Aristotelean physics psychology Ptolemaic astronomy are outlined in the text *Aimed solar and lunar returns. What you can do when you cannot leave* *Ciro Discepolo*, 2009 English speaking readers fond of Astrology already know the Author thanks to his previous works *Transits and Solar Returns and Lunar Returns and Earth Returns* which have also been translated into several other languages In a practice of almost forty years of astrological research the Author has studied and guided over twenty thousand aimed birthdays he has also published a dozen books specifically on Solar Returns and Lunar Returns This is his fifth work in English two of them can be downloaded free from his webpage www.cirodiscepolo.it In this volume *Ciro Discepolo* deals with the second resource on which his Active Astrology is based the first one being the aimed birthday the so called exorcism of symbols In these pages the Author suggests to the Reader about what can be done when you cannot aim i.e. actively relocate your birthday either your Solar or Lunar Return by a practical application of the notion of activating or constellating a symbol For example *Ciro Discepolo* claims that if you can not leave for an aimed birthday to avoid Saturn being placed in the 5th House of your next Solar Return during the twelve months covered by the SR you had better devote more time to your kids help them in their studies or in their sporting activities pay the fee to enrol them in a course perhaps abroad where they could learn new subjects and or nurture and improve their condition in a broad sense Planet by planet House by House this volume contains all the suggestions of the Author on the exorcism of symbols a useful practice also in the case you do relocate your Solar and or Lunar Returns for example if you have willingly left some dissonant position in your map of Aimed SR or of Aimed LR and you wish to lower the threshold of risk a little more The volume also explains the philosophical and psychological roots justifying the practice of the exorcism of symbols *A History of Horoscopic Astrology* James H. Holden, 2006 This thoroughly researched book is a history of the development of Western horoscopic astrology from its origin among the Babylonians and its subsequent creation in its present form by the Alexandrians down to modern times Special attention is given to background history and to the working conditions and techniques used by astrologers during the last

two thousand years Numerous footnotes provide additional information and bibliographic references A separate bibliography lists reference sources of particular importance Two comprehensive indices containing more than 2 800 individual entries enable the reader to locate persons publishers topics and book and periodical titles that are mentioned in the history The book also contains discussions of several questions and topics relating to astrology James Herschel Holden is Research Director of the American Federation of Astrologers and has been especially interested in the history of astrology

Llewellyn's Complete Book of Predictive Astrology Kris Brandt Riske, 2025-05-23 Being able to forecast your future gives you a remarkable edge Whether it s taking advantage of approaching opportunities or preparing for challenges that are heading your way predictive astrology helps you maximize your innate potential and make choices that will lead to a more satisfying life The perfect companion to Llewellyn s Complete Book of Astrology popular astrologer Kris Brandt Riske lends her signature easy to understand style to this definitive guide to predictive astrology Step by step she lays out clear instructions for performing each major predictive technique including solar arcs progressions transits lunar cycles and planetary returns She also provides a basic introduction to horary astrology the method used to obtain answers to specific questions Discover how to read all elements of a predictive chart and pinpoint when changes in your career relationships finances and other important areas of life are on the horizon To make learning even easier this astrology book includes examples that illustrate major events in the lives of the author s clients as well as celebrities such as Marilyn Monroe Jimmy Carter Martha Stewart and Pamela Anderson

Creators of Mathematical and Computational Sciences Ravi P Agarwal, Syamal K Sen, 2014-11-11 The book records the essential discoveries of mathematical and computational scientists in chronological order following the birth of ideas on the basis of prior ideas ad infinitum The authors document the winding path of mathematical scholarship throughout history and most importantly the thought process of each individual that resulted in the mastery of their subject The book implicitly addresses the nature and character of every scientist as one tries to understand their visible actions in both adverse and congenial environments The authors hope that this will enable the reader to understand their mode of thinking and perhaps even to emulate their virtues in life
