Spil Plus 13 On The Interface Of Morphology And Syntax:

The Cambridge Handbook of Chinese Linguistics Chu-Ren Huang, Yen-Hwei Lin, I-Hsuan Chen, Yu-Yin Hsu, 2022-08-18 The linguistic study of Chinese with its rich morphological syntactic and prosodic tonal structures its complex writing system and its diverse socio historical background is already a long established and vast research area With contributions from internationally renowned experts in the field this Handbook provides a state of the art survey of the central issues in Chinese linguistics Chapters are divided into four thematic areas writing systems and the neuro cognitive processing of Chinese morpho lexical structures phonetic and phonological characteristics and issues in syntax semantics pragmatics and discourse By following a context driven approach it shows how theoretical issues in Chinese linguistics can be resolved with empirical evidence and argumentation and provides a range of different perspectives Its dialectical design sets a state of the art benchmark for research in a wide range of interdisciplinary and cross lingual studies involving the Chinese language It is an essential resource for students and researchers wishing to explore the fascinating field of Chinese linguistics

Beyond Morphology Peter Ackema, Ad Neeleman, 2004-10-07 The phenomena discussed by the authors range from synthetic compounding in English to agreement alternations in Arabic and complementizer agreement in dialects of Dutch Their exposition combines insights from lexicalism and distributed morphology and is expressed in terms accessible to scholars and advanced students unique exploration of interfaces of morphology with syntax and phonology wide empirical scope with many new observations theoretically innovative and important accessible to students with chapters designed for use in teaching

Complex Predicates Leila Lomashvili, 2011-03-16 Complex predicates present different levels of complexity at the syntactic and morphological levels crosslinguistically The focus of this book is a subset of these constructions causative and applicative in three polysynthetic languages of the South Caucasian language family in which the functional morphology associated with the argument structure of these constructions is unusually rich Due to such focus the syntax morphology interface in causative and applicative constructions is subject to scrutiny in two main chapters of the book The analysis includes the argument structure of causatives and applicatives along with the morpho phonological instantiation of the functional heads involved in these constructions The book is written very clearly and is accessible for a wide audience including undergraduate students in the introductory syntax and morphology courses as well as graduate students in basic syntax courses and seminars in linguistics It naturally appeals to a general linguistic audience interested in theoretical linguistics

The Syntax-Morphology Interface Matthew Baerman, Dunstan Brown, Greville G. Corbett, 2005-09-15 Syncretism where a single form serves two or more morphosyntactic functions is a persistent problem at the syntax morphology interface It results from a mismatch whereby the syntax of a language makes a particular distinction but the morphology does not This pioneering book provides a full length study of inflectional syncretism presenting a typology of its occurrence across a wide range of languages The implications of syncretism for the syntax morphology interface have long

been recognised it argues either for an enriched model of feature structure thereby preserving a direct link between function and form or for the independence of morphological structure from syntactic structure This book presents a compelling argument for the autonomy of morphology and the resulting analysis is illustrated in a series of formal case studies within Network Morphology It will be welcomed by all linguists interested in the relation between words and the larger units of which they are a part

Morphology at the Interfaces Jason D. Haugen, 2008-01-21 This monograph addresses morphology and its interfaces with phonology and syntax by examining comparative data from the Uto Aztecan language family and analyses involving reduplication as well as noun incorporation and related derivational morphology are provided within the framework of Distributed Morphology Reduplication is treated by analyzing reduplicative morphemes reduplicants as morphological pieces Vocabulary Items inserted into syntactic slots at Morphological Structure Noun incorporation constructions are analyzed as involving either incorporation head movement in syntax a la Baker 1988 or conflation involving direct merger of a nominal root into verbal position a la Hale and Keyser 2002 It is argued that denominal verb constructions should be treated as a sub case of NI as in Hale and Keyser 1993 Finally the historical development of the polysynthesis parameter in Nahuatl is discussed and a reconstruction of the likely stages of development each of which is attested elsewhere in the family is presented

Theoretical Issues at the Morphology-syntax Interface Amaya Mendikoetxea, 1997 Morphology syntax interface Generalized person case constraint Causation hierarchy semantic control and eventivity in Nisgha Deep unaccusativity and zero syntax in St t imcets Out of control in Salish and event de composition Spanish event infinitives Feature licensing morphological words and phonological domains in Basque The limits of argument structure Verb incorporation and causation types Parameter variation in determiner systems Salish vs English Argument structure and animacy entailment Nested paths in syntactically ergative languages Disagreement between adults and children Locative sentences and related constructions in Catalan
