Spinal Vascular Malformations Hardcover:

Spinal Vascular Malformations Daniel L. Barrow, Issam A. Awad, 1999 *Spinal Vascular Malformations* is a comprehensive text detailing the historical perspective and evolution of current understanding of the various vascular malformations involving the spinal cord. Contributing authors are recognized experts in the fields of anatomy, pathophysiology, hemodynamics, imaging, and the surgical and endovascular treatment of vascular malformations of the spinal cord. Distributed by Thieme for the American Association of Neurological Surgeons. **Endovascular and Neurovascular Surgery for**

Spinal Vascular Malformations Xianli Lv, 2024-08-29 This book introduces the great advances made in the techniques, devices, and treatment concepts which benefit for spinal vascular malformations. It also covers several spinal vascular malformations that can be treated successfully with minimally invasive therapy. Spinal vascular malformations constitute rare pathological entities characterized by considerable angioarchitectural variation. Insufficient understanding of normal spinal vascular anatomy and abnormal vascular anatomy constituting these lesions restricts the development of surgical treatments specifically tailored to type of malformation. Spinal vascular malformation therapy should include conservative, microsurgical, endovascular, stereotactic, and/or multimodal therapy. Attendings, fellows, residents, medical students, or anyone interested in sharpening their diagnostic and therapeutic skill set will benefit from reading this text. Advances and Technical Standards in Neurosurgery F. Cohadon, V. V. Dolenc, J. Lobo Antunes, J. D. Pickard, H.-J. Reulen, M. Sindou, A. J. Strong, N. de Tribolet, C. A. F. Tulleken, M. Vapalahti, 2012-12-06 As an addition to the European postgraduate training system for young neurosurgeons, we began to publish in 1974 this series of *Advances and Technical Standards in Neurosurgery* which was later sponsored by the European Association of Neurosurgical Societies. This series was first discussed in 1972 at a combined meeting of the Italian and German Neurosurgical Societies in Taormina, the founding fathers of the series being Jean Brihaye, Bernard Pertuiset, Fritz Loew, and Hugo Krayenbühl. Thus were established the principles of European co-operation which have been born from the European spirit, flourished in the European Association, and have throughout been associated with this series. The fact that the English language is well on the way to becoming the international medium at European scientific conferences is a great asset in terms of mutual understanding. Therefore we have decided to publish all contributions in English regardless of the native language of the authors. All contributions are submitted to the entire editorial board before publication of any volume. Our series is not intended to compete with the publications of original scientific papers in other neurosurgical journals. Our intention is rather to present fields of neurosurgery and related areas in which important recent advances have been made. The contributions are written by specialists in the given fields and constitute the first part of each volume. **Advances and Technical Standards in Neurosurgery** J. D. Pickard, V. V. Dolenc, J.
