Internet Congestion Control Subir Varma, 2015-08-18 Internet Congestion Control provides a description of some of the most important topics in the area of congestion control in computer networks with special emphasis on the analytical modeling of congestion control algorithms The field of congestion control has seen many notable advances in recent years and the purpose of this book which is targeted towards the advanced and intermediate reader is to inform about the most important developments in this area The book should enable the reader to gain a good understanding of the application of congestion control theory to a number of application domains such as Data Center Networks Video Streaming High Speed Links and Broadband Wireless Networks When seen through the lens of analytical modeling there are a number of common threads that run through the design and analysis of congestion control protocols in all these different areas which are emphasized in this book The book also cuts a path through the profusion of algorithms in the literature and puts the topic on a systematic and logical footing Internet Congestion Control provides practicing network engineers and researchers with a comprehensive and accessible coverage of analytical models of congestion control algorithms and gives readers everything needed to understand the latest developments and research in this area Examines and synthesizes the most important developments in internet congestion control from the last 20 years Provides detailed description on the congestion control protocols used in four key areas broadband wireless networks high speed networks with large latencies video transmission networks and data center networks Offers accessible coverage of advanced topics such as Optimization and Control Theory as applied to congestion control systems Mobile Networks and Computing Sanguthevar Rajasekaran, Panos M. Pardalos, Derbiau Frank Hsu, 2000 Advances in the technologies of networking wireless communications and miniaturization of computers have lead to rapid development in mobile communication infrastructure and have engendered a new paradigm of computing Users carrying portable devices can now move freely about while remaining connected to the network This portability allows for access to information from anywhere and at any time The flexibility has resulted in new levels of complexity not encountered previously in software and protocol design for wired networking New challenges in designing software systems for mobile networks include location and mobility management channel allocation power conservation and more In this book renowned researchers in the field address these aspects of mobile networking **Wireless Personal Communications** William H. Tranter, Brian D. Woerner, Theodore S. Rappaport, Jeffrey H. Reed, 2006-04-18 The papers appearing in this book were originally presented at the 9 Virginia Tech MPRG Symposium on Wireless Personal Communications The Symposium on Wireless Communications which is an annual event for Virginia Tech was held on June 24 1999 The 1999 symposium was co sponsored by MPRG the Division of Continuing Education University International Programs and the MPRG Industrial Affiliate Sponsors Much of the success of our annual symposium as well as the success of MPRG s research program is due to the support of our industrial affiliates Their support allows us to serve the wireless

community through research education and outreach programs At the time of the 1999 symposium the MPRG affiliates program included the following organizations Army Research Office AT T Corporation Bellsouth Cellular Corporation Comcast Cellular Communications Inc Datum Inc Ericsson Inc Grayson Wireless Hewlett Packard Company Honeywell Inc Hughes Electronics Corporation ITT Industries Lucent Technologies Motorola National Semiconductor Nokia Nortel Networks Qualcomm Inc Radix Technologies Inc Salient 3 Communications Samsung Advanced Institute of Technology Southwestern Bell Tantivy Communications Tektronix Inc Telcordia Technologies Texas Instruments TRW Inc and the Watkins Johnson Company As can be seen from the Table of Contents the papers included in this book are divided into six sections The first five of these correspond to symposium sessions and cover the following topics Propagation and Channel Modeling 4 papers Antennas 6 papers Multiuser Detection 3 papers Radio Systems and Technology 4 papers and Wireless Data 3 papers **Internetworking and Computing Over Satellite Networks** Yongguang Zhang,2012-12-06

Communications via satellite introduces a number of new technical problems for mobile networks and applications Satellite links have fundamentally different properties from terrestrial wired or wireless networks Some of the properties include larger latency bursty error characteristics asymmetric capability and unconventional network architecture These differences have far reaching effects on many satellite communication issues Internetworking and Computing over Satellite Networks s emphasis is on data networking internetworking and distributed computing issues The material surveys recent work in the area of satellite networks introduces certain state of the art technologies and presents recent research results in these areas A variety of issues involving applications network architecture medium access controls multicast routing asymmetric routing transport protocols TCP performance enhancement techniques data broadcast and information disseminations are addressed This is one of the first books to be focused on the internetworking and computing aspect of satellite networks
