Machines in Our Hearts Kirk Jeffrey, 2003-04-01 Today hundreds of thousands of Americans carry pacemakers and implantable cardioverter defibrillators ICDs within their bodies These battery powered machines small computers in fact deliver electricity to the heart to correct dangerous disorders of the heartbeat But few doctors patients or scholars know the history of these devices or how heart rhythm management evolved into a multi billion dollar manufacturing and service industry Machines in Our Hearts tells the story of these two implantable medical devices Kirk Jeffrey a historian of science and technology traces the development of knowledge about the human heartbeat and follows surgeons cardiologists and engineers as they invent and test a variety of electronic devices Numerous small manufacturing firms jumped into pacemaker production but eventually fell by the wayside leaving only three American companies in the business today Jeffrey profiles pioneering heart surgeons inventors from the realms of engineering and medical research and business leaders who built heart rhythm management into an industry with thousands of employees and annual revenues in the hundreds of millions As Jeffrey shows the pacemaker first implanted in 1958 and the ICD 1980 embody a paradox of high tech health care these technologies are effective and reliable but add billions to the nation's medical bill because of the huge growth in the number of patients who depend on implanted devices to manage their heartbeats

The Tell-Tale Heart Edgar Poe, 2020-05-23 The Tell Tale Heart is a short story by Edgar Allan Poe first published in 1843 It follows an unnamed narrator who insists on his sanity after murdering an old man with a vulture eye The murder is carefully calculated and the murderer hides the body by cutting it into pieces and hiding it under the floorboards Ultimately the narrator s guilt manifests itself in the hallucination that the man s heart is still beating under the floorboards It is unclear what relationship if any the old man and his murderer share It has been suggested that the old man is a father figure or perhaps that his vulture eye represents some sort of veiled secret The ambiguity and lack of details about the two main characters stand in stark contrast to the specific plot details leading up to the murder The story was first published in James Russell Lowell s The Pioneer in January 1843 The Tell Tale Heart is widely considered a classic of the Gothic fiction genre and one of Poe s most famous short stories

TRUE nervous very very dreadfully nervous I had been and am but why will you say that I am mad The disease had sharpened my senses not destroyed not dulled them Above all was the sense of hearing acute I heard all things in the heaven and in the earth I heard many things in hell How then am I mad Hearken and observe how healthily how calmly I can tell you the whole story It is impossible to say how first the idea entered my brain but once conceived it haunted me day and night Object there was none Passion there was none I loved the old man He had never wronged me He had never given me insult For his gold I had no desire I think it was his eye yes it was this He had the eye of a vulture a pale blue eye with a film over it Whenever it fell upon me my blood ran cold and so by degrees very gradually I made up my mind to take the life of the old man and thus rid myself of the eye forever Now this is the point You fancy me mad Madmen know nothing But you should have seen me You should have seen how wisely I proceeded with what caution with what foresight with what dissimulation I went to work I was never kinder to the old man than during the whole week before I killed him And every night about midnight I turned the latch of his door and opened it oh so gently And then when I had made an opening sufficient for my head I put in a dark lantern all closed closed so that no light shone out and then I thrust in my head Oh you would have laughed to see how cunningly I thrust it in I moved it slowly very very slowly so that I might not disturb the old man s sleep

sound possibly hallucinatory of the old man's heart still beating under the floorboards **My Autobiography the Prequel: Volume 1, the Conception of "thy Death Valley House" for Beatty, Nevada** Martin J. Blahnik, MD, the Desert Doc, 2024-07-24 This is the first of a three volume memoir in the author's provocative tell all journey to feature the artistic side of the human condition As such there are matters that go well beyond Dr Blahnik's professional career as a physician and scientist Yet they are the unbreakable rules of the Scientific Method that guide our deep understanding of the Darwinian evolution of the human mind the DNA driven emergence of the psychotic mental illnesses and what we call human creativity In this first volume the lively narrative quickly connects us to the author's True Love for the American desert lands indeed the desert is his mistress in particular Death Valley National Park Then the whimsical adventure travels to Europe to Paris and Berlin but also elsewhere along the way always with a keen interest and focus on thought provoking matters of history All three books have the words in their titles thy Death Valley House for Beatty Nevada It is the artist's legacy objective to build this house in the small historic mining town certified as the Gateway to Death Valley called Beatty Given the author's decades of experience in Death Valley as a professional landscape photographer his very long Chapter Six dramatically profiling the 1960s Charles Manson hippie cult in Death Valley Country is something whereby Dr Blahnik has been duly authorized to make the claim with confidence No one can tell this story of Charles Manson in Death Valley in the manner that I have Furthermore it is decidedly engaging and indeed surprising to observe the extent to which the history of some members of the cult serves as a foil to the author's character Imagine that Nevermore! Julian Wiles, 1995 On September 27 1849 Edgar Allan Poe boarded a ship in Baltimore Harbor for an overnight voyage to New York City He never arrived Five days later he was found delirious on a Baltimore street and shortly thereafter without regaining his senses he died What had transpired over those missing five days has remained forever a mystery until now Cover *The Investigative Enterprise* William Coleman, Frederic L. Holmes, 2024-03-29 The seven distinguished contributors to this volume illuminate not only the history of the biological and medical sciences but also the relationship between institutes and ideas which characterized the explosion of scientific investigation especially in Germany Besides William Coleman and Frederic L Holmes they include Robert G Frank Jr Timothy Lenoir John E Lesch Kathryn M Olesko and Arlene M Tuchman Scientific investigation was not new to the nineteenth century but it was during that period that it began to be carried out on a scale large enough to become crucial to the welfare of nations Much remains to be learned about how the forms of organization characteristic of the modern investigative enterprise originated This book explores such questions in relation to one of the dominant experimental sciences of the century physiology Each author shows through the examination of a specific institute or a specific subject that the interplay between research pedagogy personal vision and state or public interests can be studied to particular advantage in localized settings This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist
