**Logical Methods** John N. Crossley, Jeffrey B. Remmel, Richard Shore, Moss E. Sweedler, 1994-01-26 The twenty six papers in this volume reflect the wide and still expanding range of Anil Nerode's work A

conference on Logical Methods was held in honor of Nerode's sixtieth birthday 4 June 1992 at the Mathematical Sciences Institute Cornell University 1-3 June 1992 Some of the conference papers are here but others are from students co-workers and other colleagues The intention of the conference was to look forward and to see the directions currently being pursued in the development of work by or with Nerode Here is a brief summary of the contents of this book We give a retrospective view of Nerode's work A number of specific areas are readily discerned recursive equivalence types recursive algebra and model theory the theory of Turing degrees and  $\mathbf{r.e.}$  sets polynomial time computability and computer science Nerode began with automata theory and has also taken a keen interest in the history of mathematics All these areas are represented The one area missing is Nerode's applied mathematical work relating to the environment Kozen's paper builds on Nerode's early work on automata Recursive equivalence types are covered by Dekker and Barback the latter using directly a fundamental metatheorem of Nerode Recursive algebra is treated by Ge Richards group representations Recursive model theory is the subject of papers by Hird Moses and Khoussainov Dadajonov while a combinatorial problem in recursive model theory is discussed in Cherlin Martin's paper Cenzer presents a paper on recursive dynamics

**ECOOP '95 - Object-Oriented Programming** Walter Olthoff, 2003-05-16 For the ninth time now the European Conference on Object Oriented Programming provides a mid summer gathering place for researchers practitioners students and newcomers in the field of object technology Despite fierce competition from an increasing number of attractive conferences on object related topics ECOOP has successfully positioned itself as the premier European object technology conference One reason is without doubt the composition of the conference week and the nature of its events Running in parallel on the first two days a comprehensive tutorial program and a very selective workshop program are offered to attendees This is followed by a three day technical program organized in a single track providing a highly communicative atmosphere of scientific exchange and learning Overlapping with these events are a two day industrial

exhibition and a two day opportunity for non industrial system dev opers to demonstrate their software Thus ECOOP is not just a conference on programming but an event touching on the full spectrum of object technology This volume constitutes the proceedings of the Ninth European Conference on Object Oriented Programming ECOOP held in Aarhus Denmark August 7 11 1995 Previous ECOOP conferences were held in Paris France Oslo Norway Nottingham England Ottawa Canada jointly with OOPSLA Geneva Switzerland Utrecht the Netherlands Kaiserslautern Germany and Bologna Italy Object technology continues to increase its impact on the corporate world      *Perspectives of System Informatics* Dines Bjørner, Manfred Broy, Alexandre V.
