

The background of the entire image is a painting of a nude woman reclining on a grassy slope. She is looking towards the viewer with a slight smile. The landscape behind her features rolling hills and a body of water under a soft, hazy sky. The painting style is soft and impressionistic, with visible brushstrokes and a warm color palette.

Making Moral Sense Logi Gunnarsson, 2000-09-18 Is it rational to be moral Can moral disputes be settled rationally Which criteria determine what we have a good reason to do In this innovative book Logi Gunnarsson takes issue with the assumption made by many philosophers faced with the problem of reconciling moral norms with a scientific world view namely that morality must be offered a non moral justification based on a formal concept of rationality He argues that the criteria for the rationality of an action are irreducibly substantive rather than purely formal and that assuming that morality must be given a non moral justification amounts to a distortion of both rationality and morality His discussion includes substantial critical engagement with major thinkers from two very different philosophical traditions and is notable for its clear and succinct account of Habermas discourse ethics It will appeal to anyone interested in practical reason and the rational credentials of morality

The Oxford Handbook of Russian Religious Thought Caryl Emerson, George Pattison, Randall A. Poole, 2020-09-04

The Oxford Handbook of Russian Religious Thought is an authoritative new reference and interpretive volume detailing the origins, development and influence of one of the richest aspects of Russian cultural and intellectual life: its religious ideas. After setting the historical background and context, the Handbook follows the leading figures and movements in modern Russian religious thought through a period of immense historical upheavals including seventy years of officially atheist communist rule and the growth of an exiled diaspora with, e.g., its journal *The Way*. Therefore, the shape of Russian religious thought cannot be separated from long-running debates with nihilism and atheism. Important thinkers such as Losev and Bakhtin had to guard their words in an environment of religious persecution whilst some views were shaped by prison experiences. Before the Soviet period, Russian national identity was closely linked with religion, linkages which again are being forged in the new Russia. Relevant in this connection are complex relationships with Judaism. In addition to religious thinkers such as Philaret, Chaadaev, Khomiakov, Kireevsky, Soloviev, Florensky, Bulgakov, Berdyaev, Shestov, Frank, Karsavin and Alexander Men, the Handbook also looks at the role of religion in aesthetics, music, poetry, art, film and the novelists Dostoevsky and Tolstoy. Ideas, institutions and movements discussed include the Church, academies, Slavophilism and Westernism, theosis, the name glorifying *imiaslavie* controversy, the God-seekers and God-builders, Russian religious idealism and liberalism and the Neopatristic school. Occultism is considered as is the role of tradition and the influence of Russian religious thought in the West.

The Value of Humanity in Kant's Moral Theory Richard Dean, 2006-05-11

The humanity formulation of Kant's Categorical Imperative demands that we treat humanity as an end in itself. Because this principle resonates with currently influential ideals of human rights and dignity, contemporary readers often find it compelling even if the rest of Kant's moral philosophy leaves them cold. Moreover, some prominent specialists in Kant's ethics have recently turned to the humanity formulation as the most theoretically central and promising principle of Kant's ethics. Nevertheless, it has received less attention than many other aspects of Kant's ethics. Richard Dean offers the most sustained and systematic examination of the humanity formulation to date. He presents an original analysis of what it means to treat humanity as an end in itself and examines the implications both for Kant scholarship and for practical guidance on specific moral issues.

Morals from Motives Michael Slote, 2003

Morals from Motives defends its approach against criticisms that naturally occur to those skeptical of basing the morality of right and wrong action in independently admirable motives. It also argues that ideally good people will in general be concerned about helping people rather than about conscientiously doing their duty. But the book's largest positive aim is to show that virtue ethics isn't limited to ancient

prototypes and can especially benefit from ideas deriving from eighteenth century moral sentimentalism and from recent thinking about the feminine morality of caring

***Living Faithfully in a Fragmented World* Jonathan R Wilson, 2011-05-26**

The first edition of *Living Faithfully in a Fragmented World* became one of the founding and guiding texts for new monastic communities In this revised edition Jonathan Wilson focuses more directly on lessons for these communities from Alasdair MacIntyre's *After Virtue* In the midst of the unsettling cultural shifts from modernity to postmodernity a new monastic movement is arising that strives to be a faithful witness to the gospel These new monastic communities seek to participate in Christ's life in the world and bear witness by learning to live intentionally as the church in Western culture This movement is about finding the church's center in Christ in the midst of a fragmented world overcoming the failure of the Enlightenment project and our complicity with it resisting the temptation to Nietzschean power and building communities of disciples This new edition is greatly enlarged from the original volume It includes responses to critics of the new monasticism such as D A Carson an entirely new chapter on the Nietzschean temptation an afterword on properly understanding the new monastic movement the dangers it faces and the work yet to be done as well as an appendix on the supposed post modern agenda of Jonathan Wilson and Brian McLaren For those striving to understand the path the church should take in this fragmented world this book is essential reading

***The Intelligent Design Debate and the Temptation of Scientism* Erkki Vesa Rope Kojonen, 2016-04-28**

The controversy over Intelligent Design ID has now continued for over two decades with no signs of ending For its defenders ID is revolutionary new science and its opposition is merely ideological For its critics ID is both bad science and bad theology But the polemical nature of the debate makes it difficult to understand the nature of the arguments on all sides A balanced and deep analysis of a controversial debate this volume argues that beliefs about the purposiveness or non purposiveness of nature should not be based merely on science Rather the philosophical and theological nature of such questions should be openly acknowledged
