Rivalry and Alliance Politics in Cold War Latin America Christopher Darnton, 2014-06-30 The success or failure of foreign policy initiatives in Latin America is heavily influenced by bureaucratic and military background players Rivalry and Alliance Politics in Cold War Latin America Christopher Darnton's comparative study of the nature of conflict between Latin American states during the Cold War provides a counterintuitive and shrewd explanation of why diplomacy does or doesn't work Specifically he develops a theory that shows how the parochial interests of state bureaucracies can overwhelm national leaders foreign policy initiatives and complicate regional alliances His thorough evaluation of several twentieth century Latin American conflicts covers the gamut of diplomatic disputes from border clashes to economic provocations to regional power struggles Darnton examines the domestic political and economic conditions that contribute either to rivalry continued conflict or rapprochement diplomatic reconciliation while assessing the impact of U S foreign policy Detailed case studies provide not only a robust test of the theory but also a fascinating tour of Latin American history and Cold War politics including a multilayered examination of Argentine Brazilian strategic competition and presidential summits over four decades three rivalries in Central America following Cuba's 1959 revolution and how the 1980s debt crisis entangled the diplomatic affairs of several Andean countries These questions about international rivalry and rapprochement are of particular interest to security studies and international relations scholars as they seek to understand what defuses regional conflicts creates stronger incentives for improving diplomatic ties between states and builds effective alliances The analysis also bears fruit for contemporary studies of counterterrorism in its critique of parallels between the Cold War and the Global War on Terror its examination of failed rapprochement efforts between Algeria and Morocco and its assessment of obstacles to U S coalition building efforts

Presidents and the Politics of Agency Design David E. Lewis, 2004-09-02 The administrative state is the nexus of American policy making in the postwar period The vague and sometimes conflicting policy mandates of Congress the president and courts are translated into real public policy in the bureaucracy As the role of the national government has expanded the national legislature and executive have increasingly delegated authority to administrative agencies to make fundamental policy decisions How this administrative state is designed its coherence its responsiveness and its efficacy determine in Robert Dahl's phrase who gets what when and how This study of agency design thus has implications for the study of politics in many areas The structure of bureaucracies can determine the degree to which political actors can change the direction of agency policy Politicians frequently attempt to lock their policy preferences into place through insulating structures that are mandated by statute or executive decree This insulation of public bureaucracies such as the National Transportation Safety Board the Federal Election Commission and the National Nuclear Security Administration is essential to understanding both administrative policy outputs and executive legislative politics in the United States This book explains why when and how political actors create administrative agencies in such a way as to
