Terra Cognita The Mental Discovery Of America:

Terra Cognita ,2003-01-01 Most of us are fascinated by the conventional storybook account of Christopher Columbus heroic discovery of America in 1492 Yet should the credit for discovering America go to a man who insisted it was but a few islands off the shores of China In *Terra Cognita* Eviatar Zerubavel argues that physical encounters are only one part of the complex multifaceted process of discovery Such encounters must be complemented by an understanding of the true identity of what is being discovered The small group of islands claimed by Columbus to have been discovered off the shores of Asia was a far cry from what we now call America The discovery of the New World was not achieved in a single day but was a slow process mental as well as physical that lasted almost three hundred years By celebrating 1492 as a year of discovery we inevitably distort the reality of history In vividly documenting how a slowly emerging New World gradually forced itself into Europe's consciousness Zerubavel shows that Columbus did not discover America on October 12 1492 Supplemented by fascinating old maps and a new preface written for this paperback edition *Terra Cognita* will be of interest to historians geographers cognitive scientists sociologists and students of culture Eviatar Zerubavel is professor of sociology at Rutgers University He is also the author of *Patterns of Time in Hospital Life* *The Seven Day Circle* *Social Mindscapes* *The Clockwork Muse* and *Time Maps* *Imperialism and the Origins of Mexican Culture* Colin M. MacLachlan,2015-04-13 Their empire unmatched in military and cultural might the Aztecs were poised on the brink of a golden age when the arrival of the Spanish changed everything Colin MacLachlan explains why Mexico is culturally Mestizo while ethnically Indian and why Mexicans remain orphaned from their indigenous heritage the adopted children of European history **Talk of Love** Ann Swidler,2013-06-25 Talk of love surrounds us and romance is a constant concern of popular culture Ann Swidler's *Talk of Love* is an attempt to discover how people find and sustain real love in the midst of that talk and how that culture of love shapes their expectations and behavior in the process To this end Swidler conducted extensive interviews with Middle Americans and wound up offering us something more than an insightful exploration of love *Talk of Love* is also a compelling study of how much culture affects even the most personal of our everyday experiences **Time Maps** Eviatar Zerubavel,2020-03-04 The pioneering sociologist and author of *The Seven Day Circle* continues his analysis of time with this fascinating look at history as social construct Who were the first people to inhabit North America Does the West Bank belong to the Arabs or the Jews Why are racists so obsessed with origins Is a seventh cousin still a cousin Why do some societies name their children after dead ancestors As Eviatar Zerubavel demonstrates in *Time Maps* we cannot answer burning questions such as these without a deeper understanding of how we envision the past In a pioneering attempt to map the structure of collective memory Zerubavel considers the cognitive patterns we use to organize the past and the social grammar of conflicting interpretations of history Drawing on fascinating examples that range from Hiroshima to the Holocaust and from ancient Egypt to the former Yugoslavia Zerubavel shows how we construct historical origins how we tie

discontinuous events together into stories how we link families and entire nations through genealogies and how we separate distinct historical periods from one another through watersheds such as the invention of fire or the fall of the Berlin Wall Time Maps extends beyond all of the old clichés about linear circular and spiral patterns of historical process and provides us with models of the actual legends used to map history brilliant and elegant Hayden White University of California Santa Cruz

Writing a New France, 1604-1632 Dr Brian Brazeau, 2013-04-28 The focus of this study is the exciting period of French overseas exploration directly following the stagnation caused by the Wars of Religion The book examines the early period of French involvement in Northeastern America through readings of key texts principally travel and missionary accounts Among the works examined are travel writings by Marc Lescarbot *Histoire de la Nouvelle France* and Samuel de Champlain *Voyages* and missionary works by Gabriel Sagard *Dictionnaire de la Langue Huronne* *Histoire du Canada* Jean de Brébeuf and Paul le Jeune early *Relations de Jésuites* Through a careful examination of these texts the author discerns a French rewriting of the self in relation to the American other represented by both land and people America Brazeau argues allowed a consolidation of past markers of identity and forced a radical rereading of others due to the difficulties presented by the Canadian wilderness and its natives *Writing a New France 1604-1632* sheds fresh light on a significant moment in French colonial history while providing an innovative contribution to the understanding of early modern French identity and cultural contact

Geopolitics John Agnew, 2004-03-01 *Geopolitics* identifies and scrutinizes the central features of geopolitics from the sixteenth century to the present The book focuses on five key concepts of the modern geopolitical imagination Visualising the world as a whole The definition of geographical areas as advanced or primitive The notion of the state being the highest form of political organization The pursuit of primacy by competing states The necessity for hierarchy

The Sea Voyage Narrative Robert Foulke, 2013-10-11 From *The Odyssey* to *Moby Dick* to *The Old Man and the Sea* the long tradition of sea voyage narratives is comprehensively explained here supported by discussions of key texts

The Spanish Pacific, 1521-1815 Christina Lee, Ricardo Padrón, 2025-10-01 *The Spanish Pacific* designates the space Spain colonized or aspired to rule in Asia between 1521 with the arrival of Ferdinand Magellan and 1815 the end of the Manila Acapulco galleon trade route It encompasses what we identify today as the Philippines and the Marianas but also Spanish America China Japan and other parts of Asia that in the Spanish imagination were extensions of its Latin American colonies This reader provides a selection of documents

relevant to the encounters and entanglements that arose in the Spanish Pacific among Europeans Spanish Americans and Asians while highlighting the role of natives mestizos and women A first of its kind each of the documents in this collection was selected translated into English and edited by a different scholar in the field of early modern Spanish Pacific studies who also provided commentary and bibliography States of Memory Jeffrey K. Olick,2003-07-21 A journal into book collection on national memory focusing on commemorations collective apologies and historical revisions now enhanced by the addition of 6 essays by senior historical sociologists **The Geography of the Ocean** Anne-Flore Laloë,2016-04-14 Despite the fact that the vast majority of the earth s surface is made up of oceans there has been surprisingly little work by geographers which critically examines the ocean space and our knowledge and perceptions of it This book employs a broad conceptual and methodological framework to analyse specific events that have contributed to the production of geographical knowledge about the ocean These include but are not limited to Christopher Columbus first transatlantic journey the mapping of nonexistent islands the establishment of transoceanic trade routes the discovery of largescale water movements the HMS Challenger expedition the search for the elusive Terra Australis Incognita the formulation of the theory of continental drift and the mapping of the seabed Using a combination of original empirical archival material and cartographic and theoretical sources this book uniquely brings together fascinating narratives throughout history to produce a representation and mapping of geographical oceanic knowledge It questions how we know what we know about the oceans and how this knowledge is represented and mapped The book then uses this representation and mapping as a way to coherently trace the evolution of oceanic spatial awareness In recent years particularly in historical geography discovering and knowing the ocean space has been a completely separate enterprise from discovering and colonising the lands beyond it There has been such focus on studying colonised lands yet the oceans between them have been neglected This book gives the geographical ocean a voice to be acknowledged as a space where history geography and indeed historical geography took place **The Global Historical and Contemporary Impacts of Voluntary Membership Associations on Human Societies** David Horton Smith,2018-07-17 Reviewed here is global research on how 13 types of Voluntary Membership Associations MAs have significantly or substantially had global impacts on human history societies and life Such outcomes have occurred especially in the past 200 years since the Industrial Revolution circa 1800 CE and its accompanying Organizational Revolution Emphasized are longer term historical and societal or multinational impacts of MAs rather than more micro level individual or meso level organizational outcomes MAs are distinctively structured with power coming from the membership not top down The author has characterized MAs as the dark matter of the nonprofit third sector using an astrophysical metaphor Astrophysicists have shown that most physical matter in the universe is dark in the sense of being unseen not stars or planets Insatiable Appetites Kelly L Watson,2015-04-24 Compelling By focusing on cannibalism sex and gender presents the relationship between discourse and power in the unfolding of empire Carole Blackburn The University of British Columbia

Cannibalism for medieval and early modern Europeans was synonymous with savagery. Humans who ate other humans they believed were little better than animals. The European colonizers who encountered Native Americans described them as cannibals as a matter of course and they wrote extensively about the lurid cannibal rituals they claim to have witnessed. In this definitive analysis Kelly L. Watson argues that the rumors of cannibalism surrounding Native Americans served a practical purpose. European colonizers had to forge new identities in the Americas and find ways to not only subdue but also co-exist with native peoples. In her close read of letters, travel accounts, artistic renderings, and other descriptions of cannibalism, Watson focuses on how gender, race, and imperial power intersect within the figure of the cannibal. Watson reads cannibalism as a part of a dominant European binary in which civilization is rendered as male and savagery is seen as female, and she argues that as Europeans came to dominate the New World, they continually rewrote the cannibal narrative to allow for a story in which the savage, effeminate cannibalistic natives were overwhelmed by the force of virile European masculinity.

Original and historically grounded, Insatiable Appetites uncovers the ways in which difference is understood in the West. An engaging comparative study of how a long-standing trope became a mainstay of European imperial thought. *Journal of Interdisciplinary History*. This fine book follows untraveled paths, combining fascinating discoveries in new primary sources with refreshing interpretations. *Journal of American History*. Insightful Choice. **Seascapes** by Jerry H. Bentley, Renate Bridenthal, Kären Wigen, 2007-01-01. Historians have begun to chart the experiences of maritime regions and penetrate the historical processes at work there. This book aims to contribute to these efforts by bringing together original scholarship on historical issues arising from maritime regions around the world. *Europe* by Peter Rietbergen, 2020-12-30. Fully revised, updated, and extended to include the momentous developments of 2020, this fourth edition of Peter Rietbergen's highly acclaimed *Europe: A Cultural History* is a major and original contribution to the study of Europe. The book examines the structures of culture in this part of Eurasia from the beginnings of human settlement on to the genesis of agricultural society, of greater polities, of urban systems, and the slow transitions that resulted in a post-industrial society and the individualistic mass culture of the present. Using both economic and socio-political analytical concepts, the volume outlines cultural continuity and change in Europe through the lenses of literature, the arts, science, technology, and music, to show the continent's ever-changing identities. In a highly readable style, it expertly contextualizes such diverse and wide-ranging topics as Celtic society, the Roman legal system, the oppositions between elite and popular culture in pre-industrial Europe, Michelangelo's world view, the interaction between the Enlightenment and Romanticism, the growth of a society of time and money, the appeal of fascism and other totalitarian ideologies, and the ways the songs of Sting express late twentieth-century thinking. Structured both chronologically and thematically, the text is distinctive in the attention consistently paid to the many ways Europe has been formed through its contacts with non-European cultures, especially those of Asia and the Americas. This edition concludes with an epilogue that discusses the ways Europe's recent past, including the long-term efforts at further

unification and the various forms of opposition against it has been both interpreted and misinterpreted the importance of globalization and the major challenges facing Europe in the present amongst which are the consequences of the pandemic of 2020 With a wide selection of illustrations maps excerpts from primary sources and even lyrics from contemporary songs to support its arguments the text remains the definitive cultural history of Europe for both the general reader and students of European history and culture

Early Visions and Representations of America M. Carmen Gomez-Galisteo, 2012-11-22 When the Europeans first arrived in America they had a number of preconceptions prejudices expectations and hopes about what life in the New World would be like This book examines the different visions and representations of America conveyed in the writings of Spanish conquistador lvar N ez Cabeza de Vaca and the Pilgrim leader William Bradford taking both writers within their respective literary and historical contexts Anthologies of American literature have consistently ignored Spanish language achievements on the grounds of a restrictive interpretation of American literature based on linguistic boundaries Consequently Spanish language texts such as Cabeza de Vaca s or the account by the Hidalgo de Elvas to name but two examples have been marginalized in the narrative of American literary history In seeking to redress this neglect Galisteo contributes to scholarship which seeks to analyze Early America as a whole including not only Anglo American perspectives but also the Spanish American aspect of the colonization process
