R. Willison, 1972-12-07 More than fifty specialists have contributed to this new edition of volume 4 of The Cambridge Bibliography of English Literature The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries

Milberg Collection of Irish Poetry Princeton University. Library, 1998 **Building W. B. Yeats's Later Poetry** Tomoko Iwatsubo, 2024-09-09 This book explores Yeats's later poetry through the metaphor of the poetic tower where different kinds of building architectural textual political and symbolic were closely interrelated It chronologically examines

Yeats's tower poems composed during a period of dramatic personal and national transformation from 1915 to 1932. Within a year after the Easter Rising in Dublin, Yeats acquired a half ruined Norman tower in County Galway, Ireland, which had enthralled him for the past two decades and textually and architecturally constructed it into a focus of his life and work. Interweaving the account of the renovation of the actual building and the textual construction in the socio-historical contexts, the book reveals the evolution of Yeats's multiplex tower as an organizing principle of his later poetry. Using the archive of correspondence and manuscript materials of relevant poems, including those which have thus far escaped close attention, the book offers close textual genetic analyses and a diachronic view of Yeats's tower poetry, which with its foundations laid decades earlier, he built in the collections from *The Wild Swans at Coole* (1919) to *The Winding Stair and Other Poems* (1933). Highlighting the delicate exchange between poetry and biography, as well as between the textual architecture and the actual one, identifying a turning point in the making of each tower-oriented poem and proposing some draft dating revisions, this first book-length systematic study on the process of Yeats's creation of the tower casts an unfamiliar light on a familiar yet underexplored landmark in modern poetry and makes his step-by-step construction work come alive.
