The Fourth Wave Herman Maynard, Susan E. Mehrtens, 1996-08-31 Applying the concept of historical waves originally propounded by Alvin Toffler in *The Third Wave* Herman Maynard and Susan Mehrtens look toward the next century and foresee a fourth wave an era of integration and responsibility far beyond Toffler's revolutionary description of third wave postindustrial society Whether we attain this stage of global well being however will depend on how well our business institutions adapt and change *The Fourth Wave* examines the ways business has changed in the second and third waves and must continue to change in the fourth The changes concern the basics how an institution is organized how it defines wealth how it relates to surrounding communities how it responds to environmental needs and how it takes part in the political process Maynard and Mehrtens foresee a radically different future in which business principles concern for the environment personal integrity and spiritual values are integrated The authors also demonstrate the need for a new kind of leadership managers and CEOs who embrace an attitude of global stewardship who define their assets as ideas information creativity and vision and who strive for seamless boundaries between work and private lives for all employees *Quality of Life for People with Disabilities* Roy I. Brown, 1997 Interest in quality of life has increased considerably over recent years and is now making considerable impact amongst all practitioners concerned with people with disabilities This book looks critically at the concepts assessment and practice as they relate to quality of life issues in many fields of disability The issues for professional training and practice are evaluated and the benefits of involvement in creative activities are examined Vocational social and leisure implications for quality of life considerations are also explored in a number of chapters Case studies and examples are used throughout the book to make this edition accessible and of real practical use to all those working with people with disabilities **Hearings, Reports and Prints of the House Committee on Education and Labor** United States.

Professional Practice of Environmental Management Robert S. Dorney, 2012-12-06 This series is dedicated to serving the growing community of scholars and practitioners concerned with the principles and applications of environmental management Each volume is a thorough treatment of a specific topic of importance for proper management practices A fundamental objective of these books is to help the reader discern and implement man's stewardship of our environment and the world's renewable resources For we must strive to understand the relationship between man and nature act to bring harmony to it and nurture an environment that is both stable and productive These objectives have often eluded us because the pursuit of other individual and societal goals has diverted us from a course of living in balance with the environment At times therefore the environmental manager may have to exert restrictive control which is usually best applied to man not nature Attempts to alter or harness nature have often failed or backfired as exemplified by the results of imprudent use of herbicides fertilizers water and other agents Each book in this series will shed light on the fundamental and applied aspects of environmental management It is hoped that each will help solve a practical and serious environmental problem
