The Ecological Perspective On Human Affairs:

The Ecological Perspective on Human Affairs Harold Sprout, Margaret Sprout, 1979 **Ecological Perspective on Human Affairs** Harold Hance Sprout, Margaret T. Sprout, 2015-12-08 of interest and value to all serious students of international politics and indeed of human affairs generally The American Political Science Review Originally published in 1965 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *The Ecological Perspective on Human Affairs* Harold Hance Sprout, Margaret Sprout, 1979 The ecological perspective on human affairs, with special reference to international politics, by H. and M. Sprout Harold Sprout, Margaret Sprout, **Urban Analysis** B.T. Robson, 1969-07-02 For the urban geography **Simon Dalby: A Pioneer in International Relations** Simon Dalby, Roger Boyd, 2025-06-11 This book profiles Simon Dalby's academic contributions in the fields of critical geopolitics environmental security and the intersection of international relations and the Anthropocene It includes reprints of key essays that highlight innovations in critical thought at the intersections between geopolitics environment and security Starting with an analysis of American reconstructions of the Soviet threat in the 1970s an early contribution to the emerging field of critical geopolitics subsequent papers focus on the emergent formulations of environmental security in the aftermath of the Cold War and the environmental costs of globalization Focusing on the implicit geographical framing in discourses of globalization offered a critique that extended the ambit of critical geopolitics to grapple with the issues of environmental security and the rising concern with climate change as well as the political identities invoked in that debate In the aftermath of 9 11 similar arguments about contextualization applied to the American global war on terror and the revival of discussions of empire and its geographies both in arguments for invading Iraq as well as the wider discussions in policy discourse and popular culture Simultaneously the emergence of earth system science and the concept of the Anthropocene offered another way to highlight the dangers of fossil fueled economic activities The necessity of fundamentally rethinking the premises of security policy in light of this recontextualization is emphasized in more recent contributions on climate security and the current ecological crisis Critical geopolitics Environmental security Global war on terror Firepower in the Anthropocene EPA-600/5, 1974-02 Brazil, the United States, and the South American Subsystem Carlos Gustavo Poggio Teixeira, 2012-07-30 The United States has often acted as an empire in Latin America Nevertheless there has been an obvious dissimilarity between U S actions in South America and U S actions in the rest of Latin America which is illustrated by the fact that the United States never sent troops to invade a South American country While geographic distance and strategic considerations may have played a role they

provide at best incomplete explanations for the U S s relative absence south of Panama The fact that the United States has had a distinct pattern of interactions with South America is thus not captured by the typical concept of Latin America In Brazil the United States and the South American Subsystem Regional Politics and the Absent Empire Carlos Gustavo Poggio Teixeira recuperates the virtually neglected literature on regional subsystems In so doing Teixeira maintains that researchers of inter American relations would greatly benefit from a characterization reflecting actual regional realities more than entrenched preconceptions Such a characterization involves subdividing the Western Hemisphere in two regional subsystems North and South America This subdivision allows for uncovering regional dynamics that can help explain the U S s limited interference in South American affairs compared to the rest of Latin America This book argues that the role of Brazil as a status quo regional power in South America is the key to understanding this phenomenon Through a historical analysis focusing on specific cases spanning three centuries this research demonstrates that Brazil regardless of particular domestic settings has deliberately affected the calculations of costs and benefits of a more significant US involvement in South America While in the past Brazil has taken actions that resulted in increasing the benefits of the U S s limited involvement in South America in more recent times it has sought to increase the costs of a more significant U S presence Teixeira then considers some of the theoretical and political implications of the framework laid out by this research Brazil the United States and the South American Subsystem is a groundbreaking investigation of U S Latin American relations and the politics of imperialism

Environmental Politics for a Changing World Ronnie D. Lipschutz, Doreen Stabinsky, 2018-07-12 This book argues that environmental problems are first and foremost political and therefore about power Using a framework of political economy and political ecology the authors deconstruct current environmental problems to identify root causes and address those problems through mobilization of collective action and social power The second edition also offers Updated examples and stories of political struggles and the actors involved Explicit attention to various forms of power in environmental politics including structural and social power Local politics and collective action as related to global environmental politics Discussion of emerging issues such as synthetic biology commodification and financialization of nature including carbon markets and geoeengineering
