The Ecopolitics Of Development In The Third World Politics And Environment In Brazil:

The Ecopolitics of Development in the Third World Roberto Pereira Guimarães, 1991-01-01 Equally a study of the ecological foundations of political systems and an analysis of how a particular Third World political system Brazil s addresses environmental issues this book explores the institutional and political dimensions of environmental problems in developing countries Roberto Guimaraes discusses the theoretical linkage between ecology and political science presents a historical analysis of those linkages in Brazil and looks at the structure for environmental policy formation and implementation in Brazil through a case study of the Special Secretariat for the Environment SEMA *Third World Political Ecology* Sinead Bailey, Raymond Bryant, 2005-08-08 An effective response to contemporary environmental problems demands an approach that integrates political economic and ecological issues Third World Political Ecology provides an introduction to an exciting new research field that aims to develop an integrated understanding of the political economy of environmental change in the Third World The authors review the historical development of the field explain what is distinctive about Third World political ecology and suggest areas for future development Clarifying the essentially politicised condition of environmental change today the authors explore the role of various actors states multilateral institutions businesses environmental non governmental organisations poverty stricken farmers shifting cultivators and other grassroots actors in the development of the Third World s politicised environment Third World Political Ecology is the first major attempt to explain the development and characteristics of environmental problems that plague parts of Asia Africa and Latin America Drawing on examples from throughout the Third World the book will be of interest to all those who wish to understand the political and economic bases of the Third World s current predicament *Routledge Handbook of Brazilian Politics* Barry Ames, 2018-10-25 With contributions from leading international scholars this Handbook offers the most rigorous and up to date analyses of virtually every aspect of Brazilian politics including inequality environmental politics foreign policy economic policy making social policy and human rights The Handbook is divided into three major sections Part 1 focuses on mass behavior while Part 2 moves to representation and Part 3 treats political economy and policy The Handbook proffers five chapters on mass politics focusing on corruption participation gender race and religion three chapters on civil society assessing social movements grass roots participation and lobbying seven chapters focusing on money and campaigns federalism retrospective voting partisanship ideology the political right and negative partisanship five chapters on coalitional presidentialism participatory institutions judicial politics and the political character of the bureaucracy and eight chapters on inequality the environment foreign policy economic and industrial policy social programs and human rights This Handbook is an essential resource for students researchers and all those looking to understand contemporary Brazilian politics **Security, the Environment and Emancipation** Matt McDonald, 2012-01-30 This book offers an examination of the role of emancipation in the study and practice of security focusing on the issue of environmental change The end of the Cold War created a context in which

traditional approaches to security could be systematically questioned This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security This book argues that such a notion is problematic as it suggests that a universal definition of security is possible which prevents a recognition of security as a site of contestation in which a range of actors articulate alternative visions of who or what is in need of being secured If security is understood and approached in traditional terms as the territorial preservation of the nation state from external threat then it is indeed difficult to see how environmental issues would benefit from being placed on states security agenda If however security is defined in terms of the emancipation of the most vulnerable individuals from contingent structural oppressions then drawing a relationship between environmental change and security may be beneficial for redressing those environmental issues and prioritising the needs of those most at risk from the manifestations of global environmental change This book takes the limitations of contemporary approaches to the relationship between the environment and security as its starting point and seeks to do two things First it aims to illustrate the ways in which arguments over approaches to environmental issues can be viewed as contestation over the meaning of security in particular political contexts Central here is the composition and assumptions of the dominant security discourse to emerge regarding those issues a framework of meaning for the most important forms of action on behalf of a particular group defining the terms for meaningful contestation and negotiation about security itself within that group As such the book attempts to illustrate the dynamics of competition over the meaning of security with reference to environmental issues particularly focusing on instances of political change in the dominant security discourse through which that issue is approached In the process the author points to the central role of these dominant security discourses in underpinning the most practically significant actions regarding environmental issues such as deforestation and global climate change The book employs methodological tools that enable a focus on how particular frameworks of meaning are constituted and become dominant how they provide a lens through which various issues are approached and how discourses most consistent with redressing environmental change and the suffering of the most vulnerable might come to provide the framework through which security is viewed in particular contexts This book will be of much interest to students of Critical Security Studies geography sociology IR and Political Science in general

The South, the North, and the Environment Peter Calvert, Susan Calvert, 1999-01-01 Six years after the Rio Summit the international politics of the environment have already become bogged down in a dispute between Southern and Northern states as to who if anyone is responsible for environmental degradation Meanwhile the scientific evidence continues to accumulate and shows that continuing and possibly irreversible changes are already well advanced The purpose of this book is to give a clear overview of the environmental politics of the South in each of the key problem areas drawing on first hand experience of five continents The conclusion reviews the overall situation discusses South North relations and examines both optimistic and pessimistic scenarios for the future Book jacket

Environmental Strategies for Sustainable Developments in Urban Areas

Edesio Fernandes, 2019-07-23 First published in 1998 this collaboration responds to the rapid urbanization of African and Latin American countries and features ideas for sustainable urban development in these areas from specialists in environmental engineering sustainable cities urban and environmental planning air pollution mega cities and environmental law Scholarship has explored issues of politics and the economy such as re democratization and decentralization economic conditions and privatization policies imposed by international donors but the impact of the urban setting of these areas remains understudied despite the major environmental changes brought about by these urban contexts Environmental Strategies seeks to solve this gap It will be of particular interest for policy makers and urban planners

Depositions
 Catherine Seavitt Nordenson, 2018-05-01 Burle Marx created a new and modern grammar for international landscape design Lauro Cavalcanti quoted in the New York Times The real creator of the modern garden American Institute of Architects Roberto Burle Marx 1909 1994 is internationally known as one of the preeminent modernist landscape architects He designed renowned public landscapes in Brazil beginning with small plazas in Recife in the 1930s and culminating with large public parks in the early 1960s most significantly the Parque do Flamengo in Rio de Janeiro Depositions explores a pivotal moment in Burle Marx's career the years in which he served as a member of the Federal Cultural Council created by the military dictatorship in the mid 1960s Despite the inherent conflict and risk in working with the military regime Burle Marx boldly used his position to advocate for the protection of the unique Brazilian landscape becoming a prophetic voice of caution against the regime's policies of rapid development and resource exploitation Depositions presents the first English translation of eighteen environmental position pieces that Burle Marx wrote for the journal Cultura a publication of the Brazilian Ministry of Education and Culture from 1967 through 1973 Catherine Seavitt Nordenson introduces and contextualizes the depositions by analyzing their historical and political contexts as well as by presenting pertinent examples of Burle Marx's earlier public projects which enables a comprehensive reading of the texts Addressing deforestation the establishment of national parks the place of commemorative sculpture and the unique history of the Brazilian cultural landscape Depositions offers new insight into Burle Marx's outstanding landscape oeuvre and elucidates his transition from prolific designer to prescient counselor

The New Politics of Inequality in Latin America Douglas A. Chalmers, 1997-01-30 Against a broader backdrop of globalization and worldwide moves toward political democracy The New Politics of Inequality in Latin America examines the unfolding relationships among social change equity and the democratic representation of the poor in Latin America Recent Latin American governments have turned away from redistributive policies at the same time popular political and social organizations have been generally weakened inequality has increased and the gap between rich and poor has grown Hanging in the balance is the consolidation and the quality of new or would be democracies this volume suggests that governments must find not just short term programmes to alleviate poverty but long term means to ensure the effective integration of the poor into political life The New Politics of Inequality in Latin America bridges the intellectual

chasm between on the one hand studies of grassroots politics and on the other explorations of elite politics and formal institution building It will be of interest to students and scholars of contemporary Latin American politics and society and more generally in the vicissitudes of democracy and citizenship in the late twentieth century global system **A Trip Too Far** Rosaleen Duffy,2013-06-17 Environmentally sustainable tourism or ecotourism has become a major area of interest for governments the private sector and international lending institutions It is regarded as a way of allowing economic development whilst protecting against environmental degradation especially in those countries with fragile ecosystems However despite the beneficial intentions of ecotourism it tends to be regarded uncritically by environmental organizations governments and the private sector alike Rosaleen Duffy presents this analysis of ecotourism linking it with environmental ideologies and the politics of North South relations By the extensive use of case study and interview material she formulates ideas and proposals that should be important for the development of ecotourism around the globe *The Cambridge Economic History of Latin America: Volume 2, The Long Twentieth Century* Victor Bulmer-Thomas,John Coatsworth,Roberto Cortés Conde,2006-01-23 An indispensable reference work for anyone interested in Latin America s economic development
