The Elements of Non-Euclidean Geometry, by D. M. Y. Sommerville Duncan M'Laren Young Sommerville, 2004-01-01

Elements of Non-Euclidean Geometry ... Duncan M'Laren Young Sommerville, 1919 **The Elements of Non-euclidean Geometry** D. M. Y. Sommerville, 1958 The Elements of Non-euclidean Geometry D. M. Y.

Sommerville, 1958 The Elements of Non-Euclidean Geometry D. M. Y. Sommerville, 2012-05-24 Renowned for its lucid yet meticulous exposition this classic allows students to follow the development of non Euclidean geometry from a fundamental analysis of the concept of parallelism to more advanced topics 1914 edition Includes 133 figures **Elements of Non-euclidean Geometry** Sommerville D. M. Y., 1901 **Elementary Geometry in Hyperbolic Space** Werner Fenchel, 2011-04-20 The series is devoted to the publication of monographs and high level textbooks in mathematics mathematical methods and their applications Apart from covering important areas of current interest a major aim is to make topics of an interdisciplinary nature accessible to the non specialist The works in this series are addressed to advanced students and researchers in mathematics and theoretical physics In addition it can serve as a guide for lectures and seminars on a graduate level The series de Gruyter Studies in Mathematics was founded ca 30 years ago by the late Professor Heinz Bauer and Professor Peter Gabriel with the aim to establish a series of monographs and textbooks of high standard written by scholars with an international reputation presenting current fields of research in pure and applied mathematics While the editorial board of the Studies has changed with the years the aspirations of the Studies are unchanged In times of rapid growth of mathematical knowledge carefully written monographs and textbooks written by experts are needed more than ever not least to pave the way for the next generation of mathematicians In this sense the editorial board and the publisher of the Studies are devoted to continue the Studies as a service to the mathematical community Please submit any book proposals to Niels Jacob **Projective Geometry** Oswald Veblen, John Wesley Young, 1918 **A New Perspective on Relativity** Bernard H. Lavenda, 2012 Starting off from noneuclidean geometries apart from the method of Einstein s equations this book derives and describes the phenomena of gravitation and diffraction A historical account is presented exposing the missing link in Einstein s construction of the theory of general relativity the uniformly rotating disc together with his failure to realize that the Beltrami metric of hyperbolic geometry with constant curvature describes exactly the uniform acceleration observed This book also explores these questions How does time bend Why should gravity propagate at the speed of light How does the expansion function of the universe relate to the absolute constant of the noneuclidean geometries Why was the Sagnac effect ignored Can Maxwell s equations accommodate mass Is there an inertia due solely to polarization Can objects expand in elliptic geometry like they contract in hyperbolic geometry Philosophical Problems of Space and Time Adolf Grünbaum, 2012-12-06 It is ten years since Adolf Grünbaum published the first edition of this book It was promptly recognized to be one of the few major works in the philosophy of the natural sciences of this generation In part

this is so because Grünbaum has chosen a problem basic both to philosophy and to the natural sciences the nature of space and time and in part this is so because he so admirably exemplifies that Aristotelian devotion to the intimate and mutual dependence of actual science and philosophical understanding More than this however the quality of his work derives from his achievement in combining detail with scope The problems of space and time have been among the most difficult in contemporary and classical thought and Grünbaum has been responsible to the full depth and complexity of these difficulties This revised and enlarged second edition is a work in progress in the tradition of reflective analysis of modern science of such figures as Ehrenfest and Reichenbach In publishing this work among the Boston Studies in the Philosophy of Science we hope to contribute to and encourage that broad tradition of natural philosophy which is marked by the close collaboration of philosophers and scientists To this end we have published the proceedings of our Colloquia of meetings and conferences here and abroad as well as the works of single authors
