The Emergence Of Dialectical Theory Philosophy And Political Inquiry:

The Emergence of Dialectical Theory Scott Warren, 2008-09-15 Scott Warren's ambitious and enduring work sets out to resolve the ongoing identity crisis of contemporary political inquiry. In *The Emergence of Dialectical Theory* Warren begins with a careful analysis of the philosophical foundations of dialectical theory in the thought of Kant, Hegel, and Marx. He then examines how the dialectic functions in the major twentieth-century philosophical movements of existentialism, phenomenology, neo-Marxism, and critical theory. Numerous major and minor philosophers are discussed, but the emphasis falls on two of the greatest dialectical thinkers of the previous century: Maurice Merleau-Ponty and Jürgen Habermas. Warren's shrewd critique is indispensable to those interested in the history of social and political thought and the philosophical foundations of political theory. His work offers an alternative for those who find postmodernism to be at a philosophical impasse.

The Restructuring of International Relations Theory Mark A. Neufeld, 1995-09-14 Arguing for a theory of international politics committed to human emancipation, this text suggests that international relations theory must move in a nonpositivist direction. It explores recent developments in the discipline, including critical Gramscian, postmodernist, feminist, and normative approaches.

Leo Strauss and His Legacy John Albert Murley, 2005-01-01 With over 10,000 entries identifying work of hundreds of Strauss's students and their students, this bibliography is the most, indeed the only, comprehensive guide to published writing in the tradition of Leo Strauss. Murley includes Strauss's own complete bibliography and that of one of his most revered students, George Anastaplo.

The Logic of the Living Present Anna-Teresa Tymieniecka, 1994-12-31 Some might ask: Why Locke's theory of knowledge now? Though appreciated for his social philosophy, Locke has been criticized for his work in the field of epistemology ever since the publication of the *Essay*. It is even as if Locke serves only as an example of how not to think. When people criticize Locke, they usually cite the hostile commentaries of Berkeley, Kant, Husserl, or Sellars. But one might ask: are they not all so eager to show the excellence of their own epistemological views that they distort and underestimate Locke's thought? Russell aptly noted in his *History of Western Philosophy* that "No one has yet succeeded in inventing a philosophy at once credible and self-consistent. Locke aimed at credibility and achieved it at the expense of consistency. Most of the great philosophers have done the opposite. A philosophy which is not self-consistent cannot be wholly true, but a philosophy which is self-consistent can very well be wholly false. The most fruitful philosophies have contained glaring inconsistencies, but for that very reason have been partially true. There is no reason to suppose that a self-consistent system contains more truth than one which like Locke's is obviously more or less wrong." B. Russell, *A History of Western Philosophy* (New York: Simon and Schuster, 1945), p. 613. Here Russell is uncommonly charitable with Locke.

Dark Traces of the Past Jürgen Straub, Jörn Rüsen, 2011-12-01 The relationship between historical studies and psychoanalysis remains an open debate that is full of tension in both a positive and a negative sense. In particular, the following question has not been answered satisfactorily: what distinguishes a psychoanalytically oriented study

of historical realities from a historical psychoanalysis Skepticism and fear of collaboration dominate on both sides Initiating a productive dialogue between historical studies and psychoanalysis seems to be plagued by ignorance and at times a sense of helplessness Interdisciplinary collaborations are rare Empirical research formulation of theory and the development of methods are essentially carried out within the conventional disciplinary boundaries This volume undertakes to overcome these limitations by combining psychoanalytical and historical perspectives and thus exploring the underlying unconscious dimensions and by informing academic and nonacademic forms of historical memory Moreover it puts special emphasis on transgenerational forms of remembrance on the notion of trauma as a key concept in this field and on case studies that point the way to further research

Cultural Representation in Native America Andrew Joliv  tte,2006-08-11 Today as in the past there are many cultural and commercial representations of American Indians that thoughtlessly or otherwise negatively shape the images of indigenous people Joliv  tte and his co authors challenge and contest these images demonstrating how Native representation and identity are at the heart of Native politics and Native activism In portrayals of a Native Barbie Doll or a racist mascot disrespect of Native women misconceptions of mixed race identities or the commodification of all things Indian the authors reveal how the very existence of Native people continues to be challenged with harmful repercussions in social and legal policy not just in popular culture The authors re articulate Native history religion identity and oral and literary traditions in ways that allow the true identity and persona of the Native person to be recognized and respected It is a project that is fundamental to ethnic revitalization and the recognition of indigenous rights in North America This book is a provocative and essential introduction for students and Native and non Native people who wish to understand the images and realities of American Indian lifeways in American society

Computation and Human Experience Philip Agre,1997-07-28 By paying close attention to the metaphors of artificial intelligence and their consequences for the field s patterns of success and failure this text argues for a reorientation of the field away from thought and toward activity It offers a critical reconstruction of AI research

Total Freedom Chris Matthew Sciabarra,2000-11-01 Building upon his previous books about Marx Hayek and Rand Total Freedom completes what Lingua Franca has called Sciabarra s epic scholarly quest to reclaim dialectics usually associated with the Marxian left as a methodology that can revivify libertarian thought Part One surveys the history of dialectics from the ancient Greeks through the Austrian school of economics Part Two investigates in detail the work of Murray Rothbard as a leading modern libertarian in whose thought Sciabarra finds both dialectical and nondialectical elements Ultimately Sciabarra aims for a dialectical libertarian synthesis highlighting the need not sufficiently recognized in liberalism to think of the totality of interconnections in a dynamic system as the way to ensure human freedom while avoiding totalitarianism such as resulted from Marxism

Knowing and History Michael S. Roth,2019-06-30 Knowing and History charts the development of Hegelian philosophy of history in France from the 1930s through the postwar period and critically assesses its significance for an understanding of our cultural present and of the possibilities for making

meaning out of change over time Michael Roth provides detailed analyses of the works of three of the most important Hegelian thinkers Jean Hyppolite Alexandre Kojve and Eric Weil These philosophers turned to history as the source of truths and criteria of judgment they forged connections between history and knowing as a means of confronting key modern philosophical problems and of engaging their contemporary political concerns By the 1950s however they had withdrawn from the historical in search of a more secure hopeful subject for reflection According to Roth the French Hegelians work illuminates the power and limitations of the philosophical approach to history Further he finds in the development of their philosophies one of the crucial transformations in modern intellectual history the shift from a concern with questions of significance to a concern with questions of use or function He seeks to explicate the contemporary retreat from questions of significance by situating our cultural moment in relation to its intellectual antecedents In an Afterword devoted to French post structuralism the author discusses Hegel's replacement by Nietzsche as the locus of philosophical authority in France in the 1960s and examines how this shift informs the work of Michel Foucault Roth argues that the use of Nietzsche against a dialectical philosophy of history contributes to a serious disjunction between philosophical reflection and political judgment Relevant to a wide variety of disciplines Knowing and History will appeal to those specializing in intellectual history and political theory as well as philosophers of history critical theorists and students of modern French thought and culture **A**

Theology of Preaching and Dialectic Aaron P. Edwards, 2018-07-12 How does the preacher know what God might say now based upon the many things God said then Preachers and theologians throughout Christian history have grappled with Scripture's diverse emphases alongside the urgent task of declaring the authoritative Word of God in the contemporary pulpit Aaron Edwards offers a new way of engaging with this problem by exploring the theological relationship between biblical dialectics and heraldic proclamation Edwards highlights the theological necessity of dialectical variety without forfeiting assertiveness in the prophetic moment of preaching A vast array of key voices from the theological tradition are drawn upon including Augustine Aquinas Eckhart Luther Calvin Hegel Kierkegaard Chesterton Barth Bultmann Tillich Ebeling and others to navigate the connection between Scriptural unity clarity and paradoxical plurivocality leading to a nuanced account of dialectic Applying this to the homiletically neglected concept of heraldic confidence in preaching Edwards examines the theological possibility of preaching in light of dialectical complexity via its prophetic dimension He shows how the uniquely revelatory relationship of Word and Spirit enables Scriptural illumination prophetic discernment and dialectical decisiveness in the momentary encounter which undergirds all Christian proclamation
