The Economic Development Of East And Southeast Asia:

The Economic Development of East and Southeast Asia Shinichi Ichimura, 1972 *Economic Development in East and Southeast Asia* Seiji Naya, Akira Takayama, 1990 This volume reflects the wide range of development issues and problems of the economies of East and Southeast Asia whose dynamic performances have caught the attention of many around the world It also serves to honour Professor Shinichi Ichimura for his dedication and many contributions to creating a better understanding of the development issues faced by the countries in the region Both the editors and all of the contributors in this book have worked with Professor Ichimura at one time or another

Colonial Legacies Anne E. Booth, 2007-09-30 It is well known that Taiwan and South Korea both former Japanese colonies achieved rapid growth and industrialization after 1960 The performance of former European and American colonies Malaysia Singapore Burma Vietnam Laos Cambodia Indonesia and the Philippines has been less impressive Some scholars have attributed the difference to better infrastructure and greater access to education in Japan's colonies Anne Booth examines and critiques such arguments in this ambitious comparative study of economic development in East and Southeast Asia from the beginning of the twentieth century until the 1960s Booth takes an in depth look at the nature and consequences of colonial policies for a wide range of factors including the growth of export oriented agriculture and the development of manufacturing industry She evaluates the impact of colonial policies on the growth and diversification of the market economy and on the welfare of indigenous populations Indicators such as educational enrollments infant mortality rates and crude death rates are used to compare living standards across East and Southeast Asia in the 1930s Her analysis of the impact that Japan's Greater Asian Co Prosperity Sphere and later invasion and conquest had on the region and the living standards of its people leads to a discussion of the painful and protracted transition to independence following Japan's defeat Throughout Booth emphasizes the great variety of economic and social policies pursued by the various colonial governments and the diversity of outcomes Lucidly and accessibly written Colonial Legacies offers a balanced and elegantly nuanced exploration of a complex historical reality It will be a lasting contribution to scholarship on the modern economic history of East and Southeast Asia and of special interest to those concerned with the dynamics of development and the history of colonial regimes

The Economic Development of East and Southeast Asia. Ed. by S. Ichimura S. Ichimura, 1975 *Southeast Asia beyond Crises and Traps* Boo Teik Khoo, Keiichi Tsunekawa, Motoko Kawano, 2017-09-18 This book examines five countries in South East Asia that are instructive case studies of how the region has had to negotiate pathways of development beyond crises and traps At two ends of just one decade 1997 2007 Indonesia Malaysia the Philippines Thailand and Vietnam all had to weather the shocks of an East Asian financial crisis and a global financial crisis Some economies might have buckled completely under those shocks and been condemned to long term stagnation Yet these five economies part of the larger Asian region emerged with continued if slower economic growth An important theme of this book is that their resilience has been partly derived from the

pursuit of growth and competitiveness along less known or recommended pathways The chapters of this book take a novel approach to South East Asia's search for growth and improvement They do not begin by evaluating how far macro level performances would take a particular country towards high income status Instead they provide original insights into actual cases of intermediate ways of achieving growth upgrading and income improvement in non privileged sectors Such cases may hold more relevant lessons for the majority of developing countries than the experiences of highly developed economies

East Asian Development Dwight H. Perkins, 2013-10-21 In the early 1960s fewer than five percent of Japanese owned automobiles China's per capita income was among the lowest in Asia and living standards in rural South Korea put it among the world's poorest countries Today these are three of the most powerful economies on earth Dwight Perkins draws on extensive experience in the region to explain how Asia sustained such rapid economic growth in the second half of the twentieth century East Asian Development covers Japan South Korea Hong Kong Singapore and Taiwan as well as Indonesia Vietnam Thailand Malaysia and China a behemoth larger than the other economies combined While the overall picture of Asian growth is positive no single economic policy has been effective regionwide Perkins uncovers why some initially egalitarian societies have ended up in very different places with Japan for example maintaining a modest gap between rich and poor while China has become one of Asia's most unequal economies With Korean and Japanese growth sluggish and China losing steam Perkins asks whether this is a regional phenomenon or typical of all economies at this stage of development His inquiry reminds us that the uncharted waters of China's vast economy make predictions speculative at best

The Economic Development of South-East Asia C. D. Cowan, 2012 First published in 1964 The Economic Development of South East Asia Studies in economic history and political economy contains eight papers originally written for a study group at the School of Oriental and African Studies in London The papers edited by Professor C D Cowan are written against a background of economic underdevelopment in large parts of Asia Economic problems increasingly plagued the governments of Asia after the Second World War and while Western governments were willing to help foster economic development relations with Asian governments were somewhat hindered by the heritage of their colonial past Problems also related to the growth of traditional trading ports and export crops and to the importation of colonial regimes western funds and skills in the nineteenth century Such developments come under the loosely generalised concept of imperialism with its strongly emotional overtones whose use impedes the objective assessment and analysis of facts While we understand a good deal about conditions of economic growth in the West much of what has fostered or retarded growth in other parts of the world remains less clear

Southeast Asia's Misunderstood Miracle Jomo K.S., 2019-06-04 The debate on the major factors contributing to Southeast Asian industrialization continues unabated As might be expected there is much at stake in this debate The debate is largely ideological in nature and partly centers on the role and contribution of state interventions and other institutions in market processes in the context of late industrialization At the risk of caricaturing the debate on the one

hand one finds the dominant and more influential position held by those who blame the state for all that has gone wrong and credit the market for all that has turned out right on the other hand the minority statist extreme position basically credits most major economic achievements in East Asia to appropriate interventions by developmentalist states While very few people would actually fully identify with either of these caricatured extremes much of the discussion actually gravitates around either of these poles Business Networks and Economic Development in East and Southeast Asia Gary Hamilton,1996 Southeast Asia (Routledge Revivals) Richard Higgott,Richard Robison,2013-10-31 The articles in this edited collection first published in 1985 consider the competing theories of the nature of development and underdevelopment in Southeast Asia Each chapter challenges the academic orthodoxies and dominant traditions of Southeast Asian studies particularly in relation to orientalist history behaviourist political science and development economics Overall the contributions offer an alternative framework for analysis which considers the structural changes to the political economy of Southeast Asia as well as the relationship between the state economy and class at a domestic level This is a fascinating collection of value to students and academics with an interest in Southeast Asian politics economics and history
