three volume set This introduction into a rich and expanding academic and practical world of international economic integration also provides a theoretical and analytical framework to the reader presenting select analytical studies and encouraging further research International Handbook on the Economics of Integration Volume I covers two broad themes general integration issues and regional integration groups The first part discusses topics that range from an overview of the regional integration deals registered with the World Trade Organization to multilateralism and regionalism hub and spoke integration networks limits to integration rules of origin and globalization The second part of the Han The Economics of Saving James H. Gapinski, 2013-03-09 This book began when a letter reached my desk in November 1989 Written by Warren Samuels professor of economics at Michigan State University and editor for Kluwer Academic Publishers the letter reviewed the philosophy behind Kluwer s series on recent economic thought and accordingly expressed interest in the controversies that surround con temporary topics in the discipline It graciously went on to invite me to organize consonant with that philosophy a volume of chapters on saving Soon thereafter I learned that the chapters were to be original compositions I also learned that I would have substantial flexibility in structuring the volume and in recruiting contributors who logically would be authorities in the field Succinctly Samuels was inviting me to work with leading scholars in exploring the current controversies in saving one of my favorite subjects That invitation was simply too tempting to refuse Preparation of the book s outline went smoothly It was obvious that the statistics of saving should be covered along with the theories of saving It was equally obvious that special issues must be addressed Ricardian Equivalence supply side doctrine and economic development among others These themes should be handled so as to bring out the ideological tensions in the profession and that criterion helped to shape the list of potential contributors That is both sides of a conflict should be represented and both should be given the same treatment The Economics of International Payments Unions and Clearing Houses Byron G. Auguste, 2016-07-27 International payments unions and clearing houses have been employed by 88 countries in Europe Asia Africa Latin America and the Caribbean to liberalise regional trade and payments during the past 50 years Yet their impact on participating countries has not been well understood When the republics of the former Soviet Union were deciding on new monetary regimes many economists proposed a payments union but could not estimate its potential benefits or risks This book presents the first fully articulated theory of international payments unions and clearing houses in order to answer the questions When should a country choose to participate in a payments union What benefits and costs have actually resulted from existing and past clearing houses When should countries in a clearing house seek to form a payments union The Polish Road from Socialism: The Economics, Sociology and Politics of Transition Walter D. Connor, Piotr Ploszajski, 2019-07-26 What the contributors to this volume offer is neither a romantic version of the course of Polish history nor a jubilant account of the recovery of national independence and political choice Rather they offer a variety of tough minded analytic perspectives on what comes when the party s over not just the PSPR but the celebration marking its downfall

They focus on Poland's movement toward an internationally competitive market economy a political democracy in which plural interests compete and the constitution of a civil society that both tolerates and ameliorates conflict The multidisciplinary contributors include Jan Muzel Keith Crane Benjamin Slay Kazimierz Poznanski Jan Bossak Wojciech Bienkowski Włodzimierz Wesolowski Edmund Wnuk Lipinski Adam Sarapata Andrzej Sicinski Piotr Lukasiewicz Krzysztof Nowak David S Mason Andrzej Rychard Krzysztof Jasiewicz Jack Bielasia Janusz Reykowski Stanislaw Gebethner Mirosława Marody Edmund Mokrzycki and Michael D Kennedy Economics Blue Book of the People's Republic of China, 1999 Liu Guoguang, 2019-07-23 This is the preeminent and most authoritative annual report and forecast on the Chinese economy now ranked among the three largest economies in the world as well as one of the most swiftly changing Researched and written by a quasi official organ of the Chinese government it devotes many chapters to structural reforms that are drawing attention around the world Coverage includes general forecasts and policy analyses on the Chinese economy reports on specific regions within China including Hong Kong reviews of the global economic situation and prospects for the future of China

The Economics of Creative Destruction Ufuk Akcigit, John Van Reenen, 2023-08-22 Leading social scientists explore pressing issues monopoly and inequality growth and innovation climate change and fraying social safety nets through the lens of creative destruction Far more than a theory of capitalist dynamics creative destruction proves an important idea for illuminating a wide range of social and political challenges **The World Bank Research Program 2001** World Bank, World Bank Staff, 2001-01-01 This publication is a compilation of reports on research projects initiated under way or completed in fiscal year 2001 July 1 2000 through June 30 2001 The abstracts cover 150 research projects from the World Bank and grouped under 11 major headings including poverty and social development health and population education labor and employment environment infrastructure and urban development and agriculture and rural development The abstracts detail the questions addressed the analytical methods used the findings to date and their policy implications Each abstract identifies the expected completion date of each project the research team and reports or publications produced
