

OUR STRATEGY FOR PUBLIC EDUCATION

CHILDREN AND STUDENTS LEARNING AND THRIVING

OUR PURPOSE

Public education is for every child and young person in every community across our state.

Educators and staff work in partnership with families and communities to nurture, develop and empower all South Australian children and young people with the knowledge, skills and capabilities they need to become fulfilled individuals, active, compassionate citizens and lifelong learners.

Our preschools and schools are the heart of local communities. They are safe, inclusive, and collaborative – a place where every child and young person is encouraged to contribute, develops positive relationships, has a say in their learning, and where their needs, interests and cultures are recognised and supported.

We are relentless in our ambition for all children and young people to enter the world beyond the classroom ready to learn and to create opportunities to live a satisfying and fulfilling life of their choosing.

When our children and young people thrive so does South Australia.

The Education Of The Public

William S. Ponder

The Education Of The Public:

School Sarah Mondale, 2002-08-16 Esteemed historians of education David Tyack Carl Kaestle Diane Ravitch James Anderson and Larry Cuban journey through history and across the nation to recapture the idealism of our education pioneers Thomas Jefferson and Horace Mann We learn how in the first quarter of the twentieth century massive immigration child labor laws and the explosive growth of cities fueled school attendance and transformed public education and how in the 1950s public schools became a major battleground in the fight for equality for minorities and women The debate rages on Do today's reforms challenge our forebears' notion of a common school for all Americans Or are they our only recourse today This lavishly illustrated companion book to the acclaimed PBS documentary *School* is essential reading for anyone who cares about public education

The Education of the Public Malcolm L. Warford, 1980 **Public Schooling and the Education of Democratic Citizens** Richard M. Battistoni, 1985 A sound ideologically balanced analysis of civic education its malaise in present day America A much needed contribution to the growing literature on this important question David Mathews

Readings in Public Education in the United States Ellwood Patterson Cubberley, 1934 Public Education in New Mexico John B. Mondragón, Ernest S. Stapleton, 2005 The structure politics and financing of education in New Mexico today

Education and the Public Interest Edward P. St. John, 2007-05-28 Economic globalization has been accompanied by implementation of education reforms linked to accountability and public finance schemes that emphasize student choice in schools and student loans in higher education In the U S these reforms are rationalized based on intermediate variables like the number of math credits completed in high school and net prices However the reforms rationalized based on this research are seldom evaluated in relation to outcomes i.e. measures of student achievement and equal opportunity to attain an education In *Education and the Public Interest* the editor re-examines the political rationales for these reforms John Rawls's theory of justice is reconstructed to develop a framework for assessing the effects of public policy on these outcomes This volume undertakes a comparative study of the states in the U S to examine how education reforms influence student achievement high school graduation and college access and finance schemes influence college access Policies implemented by states in the 1990s were associated with improved achievement as measured by test scores for high school students These policies also correlate with increased high school drop out rates and the widening gap in college enrolment rates across income groups This volume considers how privatization and accountability policies can be reconstructed to reduce inequality while continuing to improve student achievement and college enrolment I enjoyed reading the book and benefited from it and I feel confident others will as well I am particularly taken by its sweep and by the skill and persuasiveness with which the author ties together the broad trends and themes of privatization globalization school reform preparation equity equality and college access Prof James C Hearn Vanderbilt University USA What I especially like about this book is the framing of the importance of the topic in terms of the global political and economic changes and the notion of access to quality education as

a basic right Prof Laura W Perna College of Education University of Maryland USA **Public Education** Myron Lieberman,1993 In this blistering critique of our failing public schools Lieberman explains why public education is in irreversible and terminal decline and tells what we must do to get American schooling back on track A refreshingly clear analysis of our educational crisis and a rallying cry for market system approaches to school reform Annual Report of the Minister of Education, on the Public, Separate, and High Schools, Also on the Normal and Model Schools, of the Province of Ontario, for the Year ... Ontario. Department of Education,1853 **In the Eyes of God** William S. Ponder,2010-12-20 In the Eyes of God takes a hard look at what is being done to improve public education in America The twenty first century finds the United States in a very demanding situation regarding the economy world affairs and the general demise of humanity The education of children in America seems to be the one topic that is getting some attention With documentaries like The Lottery and Waiting for Superman the general public is finally beginning to understand the current state of education in the country a state of which most educators have long been aware There is a real lack of leadership in education today and a real fear of doing anything outside the norm in terms of how students learn The poor selection and retention of talent in the classroom has taken a toll on the ability of schools to educate their students effectively In the Eyes of God challenges the fact that only a small percentage of the school day is used to educate children It also examines cultural proficiency and the need for educators to go beyond just cultural awareness and become more competent and proficient teachers Most importantly we must strive to see that no children fall through the cracks of the system and that every child receives the best education possible **America Goes to School** Robert M. Hardaway,1995-04-30 This book documents the shocking state of public education in the United States including the high rates of school violence the decline in student achievement and the politicization of the educational process By comparing the performance of public schools with private schools which spend less than half per capita than public counterparts the book reveals areas in which public education might reduce administrative overhead eliminate internal segregation of students and provide a safe and disciplined learning environment Also suggested are ways in which public schools might learn from the experience and traditions of the past including the essential elements of learning in the one room schoolhouse and the integration of students of different ages The role of the judiciary is critically reviewed as well as Supreme Court decisions in the areas of racial discrimination school discipline bilingual education special education and school financing
