diplomatic campaigns to achieve its political goals It argues that the last four decades of military adventurism demonstrates Pyongyang's consistent calculated use of military tools to advance strategic objectives vis vis its adversaries It shows how recent behavior of the North Korean government is entirely consistent with its behavior over this longer period the North Korean government's conduct rather than being haphazard or reactive is rational in the Clausewitzian sense of being ready to use force as an extension of diplomacy by other means The book goes on to demonstrate that North Korea's calculated adventurism has come full circle what we are seeing now is a modified repetition of earlier events such as the Pueblo incident of 1968 and the nuclear and missile diplomacy of the 1990s Using extensive interviews in the United States and South Korea including those with defected North Korean government officials alongside newly declassified first hand material from U S South Korean and former Communist bloc archives the book argues that whilst North Korea's military diplomatic campaigns have intensified its policy objectives have become more conservative and are aimed at regime survival normalization of relations with the United States and Japan and obtaining economic aid

Understanding North Korea Jongwoo Han, Jung Tae-hern, 2013-12-04 Why does North Korea want to possess nuclear capabilities In order to find the answer to this question we must have an accurate understanding of the history and structure of the North Korean regime So far we have only formed conjectures and predictions regarding North Korea based on our own perspectives we now need to deal with and consider North Korea as is to reach viable solutions to the issues North Korea presents This volume contains analyses of the most salient critical issues pertinent to understanding the North Korean regime penned by representative Korean scholars of North Korea As such the book examines the historical formation of North Korea the identities of those power elite and the relative stability or instability as the case may be of the new regime under Kim Jong un Also an important aspect to consider is the possibility of socio economic change in North Korea Though North Korea has remained relatively static vis vis its political and military systems it is in the process of becoming rapidly marketized having continued various attempts to modify its economic policy In the social realm said economic shift has elicited the polarization of the disparate classes and the expansion of individualism Such social transformations obscured by

the easily visible political reality of North Korea can provide solid grounds for determining the future of the North Korea regime. Moreover, it is imperative that we accurately understand the motivation behind North Korea's intention to develop nuclear weapons, namely the expansion of deterrence. We must recognize the reasons for the North Korean hostility toward the United States from the very beginning of the DPRK formation and the North Korean fixation on nuclear weapons development. Further, we need to understand the nature of relations between China and North Korea, relations on which the international community has focused since North Korea began its nuclear testing, as well as the history and structure of relations between North and South Korea. Only when we accurately understand North Korea can we reach solutions to the North Korean nuclear issue. The studies in this volume by Korean scholars will reveal the veiled background of the visible phenomena and thereby help the readers to correctly understand the North Korean behaviors hitherto misunderstood or even those that were impossible to understand.

Whether measured in terms of the total number of personnel in uniform, numbers of special operations soldiers, the size of its submarine fleet, quantity of ballistic missiles in its arsenal, or its substantial weapons of mass destruction programs, Pyongyang is a major military power.
