Self-Deception's Puzzles and Processes Jason Kido Lopez,2016-08-16 The contemporary literature on self deception was born out of Jean Paul Sartre s work on bad faith lying to oneself As time has progressed the conception of self deception has moved further and further away from Sartre s conception of bad faith In Self Deception s Puzzles and Processes A Return to a Sartrean View Jason Kido Lopez argues that this departure is a mistake and that we should return to thinking about self deception in a Sartrean fashion in which we are self deceived when we intentionally use the strategies and methods of interpersonal deception on ourselves Since literally tricking ourselves cannot work we will always see through our own self deception after all self deception merely consists of the attempt to trick ourselves in this way Other scholars have rejected this notion of self deception historically dismissing it as paradoxical Lopez argues first that it isn t paradoxical and he further suggests that moving away from this notion of self deception has caused the contemporary literature on the topic to be littered with disparate and conflicting theories Indeed there are a great many ways to avoid the allegedly paradoxical Sartrean notion of self deception and the resulting plethora of accounts lead to a fragmented picture of self deception If however the Sartrean view isn t paradoxical then there was no need for the host of contradictory theories and most researchers on self deception have missed what was originally so intriguing about self deception that it like bad faith is the process of literally trying to trick oneself into believing what is false or unwarranted Self Deception s Puzzles and Processes will be of great interest to students and scholars of epistemology philosophy of mind psychology and continental philosophy and to anyone else interested in the problems of self deception

Baker,2019-08-23 This book explores the shifting role of the minister in light of the experiences of college men in the United States Young men frequently struggle to know what it means to be a man and doubt that churches can supply the meaning and direction for which they hunger These men are not necessarily lost but they do need a certain kind of spiritual accompaniment that is likely to push many ministers outside of postures and practices with which they have grown comfortable This interdisciplinary work draws together feminist and masculinist theories contemporary practices in campus ministry recent literature on religious deconversion and individual interviews with college men in order to argue for new ways amid the practice of ministry This work invites ministers to become more apophatic to grow comfortable with moving away from clarity and to adopt ungrasping postures of ministry that attend to the unfolding theology of the individual This repositions campus ministers to support young adults from a range of spiritual commitments *Disaffiliating Ministry* invites ministers to eliminate wasteful ministerial habits to explore new ministry practices and to enjoy the freedom of accompanying young men in processes of leaving behind attitudes and actions that cease to be life giving while deepening in faith courage and responsibility for others *Innovative Practices in Teacher Preparation and Graduate-Level Teacher Education Programs* Polly, Drew,Putman, Michael,Petty, Teresa M.,Good, Amy J.,2017-12-15

Recognition and the Self in Hegel's

Phenomenology of Spirit Timothy L. Brownlee, 2022-12-15 Hegel's Phenomenology of Spirit is famed for its account of the problem of recognition Yet while readers agree about the importance of its influential accounts of the struggle to the death and the master slave relation in developing that problem there is no consensus regarding what sorts of relations among subjects would count as successful forms of recognition Timothy Brownlee articulates the essential connections between Hegel's concepts of recognition and the self and presents a novel interpretation of the Phenomenology that traces the emergence of actual relations of reciprocal recognition through the work as a whole He focuses on the distinctive social constitution conception of the self that Hegel develops in his account of spirit and demonstrates that the primary significance of recognition lies in its contribution to self knowledge His book will be valuable for scholars and students interested in Hegel German Idealism and philosophical conceptions of recognition

in other important areas of life social emotional and physical health Fostering motivation and engagement is thus a meaningful educational purpose both in and of itself and as a pathway to holistic student development However motivation and engagement do not develop in a vacuum and effort seeking to facilitate them cannot be effectively pursued without understanding their underpinning sociocultural influences In the first edition of this volume *Big Theories Revisited* McInerney Van Etten 2004 authors of major models of school motivation and engagement were challenged to look into their theoretical work through a sociocultural lens The volume has been well received as objectively reflected in the number of citations of its chapters Significant progress has since been made in the theorizing and research of big theories of school motivation and engagement In this volume we invited a group of internationally renowned scholars to re examine their theoretical and conceptual work by highlighting the what factors and how processes of sociocultural influences in association with the key motivation and or engagement constructs of their expertise We made it clear to our contributors that we solicited new chapters rather than chapters with merely rehashed materials As a result this volume *Big Theories Revisited 2* Liem McInerney 2018 contains chapters that critically discuss sociocultural influences on school motivation and engagement constructs as viewed from focal theories including self determination theory achievement goal theory personal investment theory expectancy value theory self efficacy theory self and co regulated learning models and many others Whereas some of the chapter topics covered in the initial edition are also part of this edition some are new and provide fresh sociocultural angles on achievement relevant processes and outcomes Likewise whereas some of the authors contributed to the earlier edition of the Volume many of them are different What appears to be the same across the two editions is the scholarly distinction of the authors and the substantive rigor of the chapters in advancing our current understanding of this field of enquiry Readers will learn much from and be inspired by stimulating ideas presented in this volume

Mapping the Edges and the In-between Nancy Nyquist Potter, 2009-06-25 *Borderline Personality Disorder* BPD is a diagnosis given to ten percent of all those seen in outpatient mental health facilities and twenty percent of those seen in inpatient psychiatric units This is a significant number of people in the Western world Yet many of the core

concepts and symptoms that underlie this diagnosis are questionable Many of the attitudes and actions of carers are based on assumptions about those with BPD that cry out for analysis with both cultural and gender norms interacting with clinical diagnosis and treatment to the detriment of both carers and patients This book considers how we diagnose BPD looking at the key constructs identity disturbance inappropriate or excessive anger unstable relationships impulsivity self injurious behaviour and manipulativity It starts by looking at the cultural and gender assumptions and norms behind BPD drawing upon philosophical clinical anthropological and sociological literature Combining philosophical analysis with clinical experience and patients writings it clarifies the constructs so that the reader can understand the messiness and complexity that frames this diagnosis and treatment After examining the current state of these constructs and their effects on carer patient interactions Part II sees an application of virtue theory to therapeutic treatment with BPD patients It looks at three virtues that are particularly important for clinicians and other carers to cultivate when working with BPD patients trustworthiness the virtue of giving uptake and empathy It argues that in their absence not only are clinicians attitudes harmful to patients but that the status of the diagnosis is actually compromised Mapping the Edges and the In Between presents a compelling argument that Borderline Personality Disorder needs to be approached in a new light one that will benefit patients

Being Gay in Ireland Gerard Rodgers, 2018-06-20 In Being Gay in Ireland Resisting Stigma in the Evolving Present Gerard Rodgers argues that existing theory and research on the lives of gay men often exhibits a social weightlessness such that self beliefs are frequently decoupled from an analysis of society History and conventions inform and shape gay men s self beliefs yet psychology as a discipline rarely dialogues with historical or political scholarship Rodgers corrects this oversight with a critical analysis of the decades of socio political struggle in Ireland and elsewhere Rodgers captures the lives of gay men who are situated in varied contexts and who all despite their different situations possess self beliefs that are shaped by wider historical traditions and evolving social change Rodgers argues that the nuances and particulars of self beliefs are significantly affected by wider historical traditions and evolving social and political changes Through his reconstruction Rodgers provides practitioners of applied psychological and therapeutic disciplines with an in depth picture of how historical context and social justice successes have interacted with gay men s self beliefs with a particular focus on how prosocial resistances against prejudice have incrementally eroded historical standards of gay stigma
