Strategic Management In Developing Countries:

Strategic Management In Developing Countries James E. Austin, 2008-06-30 James E Austin's case studies are designed to help managers effectively compete in the Third World business environment. Designed for business school courses and in-house company training programs, this companion to *Managing in Developing Countries* presents 35 case studies organized around Professor Austin's Environmental Analysis Framework, a powerful field-tested tool designed to help managers examine, prepare for, and compete in the Third World business environment. Through comprehensive and thoroughly tested classroom-tested cases, Austin systematically examines the economic, political, and cultural factors of each country at international, national, industry, and company levels. The cases also reveal the critical strategic issues and operating problems that managers will encounter in developing countries in governmental relations, finance, marketing, production, and organization.

Strategic Management for Government Agencies Navin Girishankar, Migara De Silva, 1998-01-01 This paper presents a conceptual framework for the strategic management of government agencies in developing and transition economies. It delineates a working model of an efficient government agency for which core strategy, internal organizational design, and external environment are aligned. It then demonstrates how the objectives of public sector management are ideally based on assessments of areas of misalignment in government agencies.

Strategic Management from an Islamic Perspective Rodrigue Fontaine, Khaliq Ahmad, 2013-07-16 Fascinating insights into modern strategic management from an Islamic perspective. While strategic management is a cornerstone of any MBA program, it's almost always taught from conventional theories and typically American case studies. This book takes those traditional theories and interprets them from an Islamic perspective using more international case studies. Though primarily intended as a textbook for business students, the book is also extremely useful for any Muslim business leaders who want to transform their businesses while complying with Shariah, with a particular focus on developing corporate cultures and structures in sync with Islamic values. Offers a critical review of conventional strategic management theory, suggesting more effective alternatives based on a combination of conventional and Islamic theories. Includes international case studies, each with a particularly Islamic angle. Written by a successful author team that has written extensively on the subject of business management from an Islamic perspective.
