Encyclopedia of Health Services Research Ross M. Mullner, 2009-05-15 Today as never before healthcare has the ability to enhance the quality and duration of life At the same time healthcare has become so costly that it can easily bankrupt governments and impoverish individuals and families Health services research is a highly multidisciplinary field including such areas as health administration health economics medical sociology medicine political science public health and public policy The Encyclopedia of Health Services Research is the first single reference source to capture the diversity and complexity of the field With more than 400 entries these two volumes investigate the relationship between the factors of cost quality and access to healthcare and their impact upon medical outcomes such as death disability disease discomfort and dissatisfaction with care Key Features Examines the growing healthcare crisis facing the United States Encompasses the structure process and outcomes of healthcare Aims to improve the equity efficiency effectiveness and safety of healthcare by influencing and developing public policies Describes healthcare systems and issues from around the globe Key Themes Access to Care Accreditation Associations Foundations and Research Organizations Biographies of Current and Past Leaders Cost of Care Economics Finance and Payment Mechanisms Disease Disability Health and Health Behavior Government and International Healthcare Organizations Health Insurance Health Professionals and Healthcare Organizations Health Services Research Laws Regulations and Ethics Measurement Data Sources and Coding and Research Methods Outcomes of Care Policy Issues Healthcare Reform and International Comparisons Public Health Quality and Safety of Care Special and Vulnerable Groups The Encyclopedia is designed to be an introduction to the various topics of health services research for an audience including undergraduate students graduate students and general readers seeking non technical descriptions of the field and its practices It is also useful for healthcare practitioners wishing to stay abreast of the changes and updates in the field **An Administrative Compendium on Trends for Identifying Adequate Blood Donation by African Americans**

Bruce M. Williams MS MS HCA,2015-05-08 The blood collection business was chosen because the arena is central to any effort to save lives with blood and blood products The field needs improvement and innovation There is not a lot of data on this sector of the business community This is not a comparison of the private sector of the business community and the nonprofit sector Earnings are at the top of the list of the foremost concerns The type of workers is at issue as well Many of the nonprofit health care employees were post graduate females The nature of the work performed is important The employees motivation is also a factor worth considering Whether the job was full time or part time did make a difference in nonprofit employee characteristics Participants have several obstacles that prevent them from donating blood They have a few motivators for donating blood Because the needed matching blood types are in the African American community this does not mean that they should know that given the distant behavior of the blood collecting business to the African American Community The Scientific method of observation measurement and documentation theory and test the theory is used In each paper the synthesis method is used to structure the data and information The Sickle cell model will be used herein
