unprecedented decrease in the average age of onset of these disorders is recorded. The majority of non-communicable disorders carry a chronic character by progressing over a couple of years from a reversible suboptimal health condition to irreversible pathology with collateral complications. The time frame between both conditions is the operational area for predictive diagnosis and identification of persons at risk by innovative screening programmes followed by the most cost-effective personalised treatment possible, namely primary prevention tailored to the person. The book propagates the paradigm change from delayed, costly but frequently ineffective medical services to the holistic approach by predictive, preventive and personalised medicine, clearly demonstrating multifaceted benefits to the individual healthcare sector and society as a whole. The book is focused on the needs of young people, teenagers, adolescents and young adults regardless of the age. Individuals in suboptimal health conditions who are interested in remaining healthy by optimising their modifiable risk factors, both endogenous and exogenous ones, several patient cohorts demonstrating similar phenotype of Flammer syndrome. The book is based on the multi-professional expertise, scientific excellence and practical experiences of the world-acknowledged experts in Flammer syndrome, predictive diagnostics, targeted prevention and personalised medicine, amongst others. The topic of this book is particularly relevant to general practitioners, experts in non-communicable diseases, phenotyping, genotyping, multilevel diagnostics, targeted prevention, personalised medicine, as well as the readers interested in advancing their health literacy.

Advancing Research on Teachers' Professional Vision: Implementing novel Technologies, Methods and Theories Christian Kosel, Tina Seidel, Christian Hartmann, Ann-Sophie Grub, 2024-07-25. A classroom full of students can be overwhelming for teachers. It is critical that teachers are able to filter and meaningfully interpret the relevant information in this complex scenario. Much of this filtering and interpretation occurs through selective visual perception. Over the last decade, a rapidly growing number of studies in empirical educational research used eye tracking to investigate teachers' selective visual perceptual processes in the classroom. Theoretically, visual attention and perception are often conceptualized as knowledge-based noticing coupled with knowledge-based reasoning about what is visually perceived. Recent eye tracking studies have shown that experienced teachers, in particular, show improved selective attention of classroom events through faster detection of relevant information and improved monitoring of learning-relevant situations. Researchers agree that a critical driver of selective attention processes is the professional knowledge, declarative, procedural and metacognitive, of experienced teachers, which controls selective perceptual processes in a top-down process. The findings are significant and provide important insights for research on teacher professionalization.

Eye Fatigue Cassian Pereira, AI, 2025-03-12. Eye Fatigue explores the increasing problem of eye strain caused by digital devices and age-related vision changes. Prolonged screen time can lead to reduced blinking, causing dry eyes, while aging eyes experience decreased focusing ability. This book emphasizes the importance of understanding these factors for maintaining optimal vision health in our modern world. The book begins with the basics of eye anatomy and how screens impact vision, including blue light.

exposure It then examines age related changes like presbyopia Eye Fatigue provides evidence based strategies like ergonomic adjustments proper lighting and eye exercises to prevent and manage eye strain and promote ocular health Drawing from ophthalmology and ergonomics this book offers a unique holistic approach combining research with practical advice It empowers readers to take proactive steps to protect their vision providing actionable guidance to improve workspaces screen time habits and overall eye care routines
