

The background of the slide is a sepia-toned illustration of a landscape. In the foreground, there is a dark, silhouetted area that appears to be a body of water or a path. Above this, a fence made of horizontal wooden rails runs across the frame. Several large, diagonal wooden posts are driven into the ground, crossing the rails. In the middle ground, there is a dense line of dark evergreen trees. In the background, a large, rounded mountain rises against a sky filled with soft, white clouds. The overall style is that of a 19th-century engraving or painting.

Territorial Ambition S. Charles Bolton,2020-04-10 Both modern historians and early nineteenth century observers have emphasized the wild and picturesque aspects of the Arkansas Territory suggesting that the settlers here were more preoccupied with indolence or brawling than with economic progress This study first published in 1993 demonstrates that despite all its frontier roughness Arkansas was characterized by a restless ambition that transformed the area from frontier and subsistence living to a highly productive agricultural society This ambition with its brutal Indian removal and expansion of slave labor rendered Arkansas more similar to its southern neighbors than contemporary and modern portrayals would make it seem

Old South Frontier: Cotton Plantations and the Formation of Arkansas Society (c) , In this deeply researched and well written study Donald P McNeilly examines how moderately wealthy planters and sons of planters immigrated into the virtually empty lands of Arkansas seeking their fortune and to establish themselves as the leaders of a new planter aristocracy west of the Mississippi River These men sometimes alone sometimes with family and usually with slaves sought the best land possible cleared it planted their crops and erected crude houses and other buildings Life was difficult for these would be leaders of society and their families and especially hard for the slaves who toiled to create fields in which they labored to produce a crop McNeilly argues that by the time of Arkansas s statehood in 1836 planters and large farmers had secured a hold over their frontier home and that between 1840 and the Civil War planters solidified their hold on politics economics and society in Arkansas The author takes a topical approach to the subject with chapters on migration slavery non planter whites politics and the secession crisis of 1860 1861 McNeilly offers a first rate analysis of the creation of a white cotton based society in Arkansas shedding light not only on the southern frontier but also on the established Old South before the Civil War

Looney,2016-08-01 During the period from 1836 to 1874 the legal system in the new state of Arkansas developed amid huge social change While the legislature could and did determine what issues were considered of importance to the populace the Arkansas Supreme Court determined the efficacy of legislation in cases involving land titles banks transportation slavery family law property debt contract criminal law and procedure Distinguishing the Righteous from the Roguish examines the court s decisions in this era and shows how Arkansas as a rural slave holding state did not follow the transformational patterns typical of some other states during the nineteenth century Rather than using the law to promote broad economic growth and encourage social change the Arkansas court attempted to accommodate the interests of the elite class by preserving the institution of slavery The ideology of paternalism is reflected in the decisions of the court and Looney shows how social and political stability an emphasis on preserving the status quo of the so called righteous came at the expense of broader economic development **Fetching the Old**

Everett,2014-05-27 Boundaries lines imposed on the landscape shape our lives dictating everything from which candidates we vote for to what schools our children attend to the communities with which we identify In Creating the American West historian Derek R Everett examines the function of these internal lines in American history generally and in

the West in particular Drawing lines to create states in the trans Mississippi West he points out imposed a specific form of political organization that made the West truly American Everett examines how settlers lobbied for boundaries and how politicians imposed them He examines the origins of boundary making in the United States from the colonial era through the Louisiana Purchase Case studies then explore the ethnic sectional political and economic angles of boundaries Everett first examines the boundaries between Arkansas and its neighboring Native cultures and the pseudo war between Missouri and Iowa He then traces the lines splitting the Oregon Country and the states of California and Nevada and considers the ethnic and political consequences of the boundary between New Mexico and Colorado He explains the evolution of the line splitting the Dakotas and concludes with a discussion of ways in which state boundaries can contribute toward new interpretations of borderlands history A major theme in the history of state boundaries is the question of whether to use geometric or geographic lines in other words lines corresponding to parallels and meridians or those fashioned by natural features With the distribution of western land Everett shows geography gave way to geometry and transformed the West The end of boundary making in the late nineteenth century is not the end of the story however These lines continue to complicate a host of issues including water rights taxes political representation and immigration Creating the American West shows how the past continues to shape the present
