Territories David Storey, 2024-07-30 Territories are more than simply bounded spaces they reflect the ways in which we think of geographic space Territoriality or laying claim to territory can be seen as the spatial expression of power with borders dividing those inside from those outside The book provides an introduction to the concept of territory the ways in which ideologies and social practices are manifested in space the deployment of territorial strategies and the geographical outcomes of these This revised and updated third edition focuses on both macro scale examples and those less obvious micro scale ones and it explores how territorial strategies are used in the maintaining of power or as a means of resistance Throughout the book key questions emerge concerning geographic space Who is allowed to be in particular spaces and who is excluded or discouraged from being there How are territorial practices utilised in conflicts concerned with socio political power and identity and how are ideologies transposed onto space Written from a geographical perspective the book is interdisciplinary drawing on ideas and material from a range of academic disciplines including history political science sociology international relations and cultural studies Theoretical underpinnings are supported by a variety of historical and contemporary examples drawn from a range of geographic contexts

The Wiley-Blackwell Companion to Human Geography John A. Agnew, James S. Duncan, 2011-03-01 This volume provides an up to date authoritative synthesis of the discipline of human geography Unparalleled in scope the companion offers an indispensable overview to the field representing both historical and contemporary perspectives Edited and written by the world s leading authorities in the discipline Divided into three major sections Foundations the history of human geography from Ancient

Greece to the late nineteenth century The Classics the roots of modern human geography Contemporary Approaches current issues and themes in human geography Each contemporary issue is examined by two contributors offering distinctive perspectives on the same theme *A Guide to Spatial History* Konrad Lawson,Riccardo Bavaj,Bernhard Struck,2022-01-07 This guide provides an overview of the thematic areas analytical aspects and avenues of research which together form a broader conversation around doing spatial history Spatial history is not a field with clearly delineated boundaries For the most part it lacks a distinct unambiguous scholarly identity It can only be thought of in relation to other typically more established fields Indeed one of the most valuable utilities of spatial history is its capacity to facilitate conversations across those fields Consequently it must be discussed in relation to a variety of historiographical contexts Each of these have their own intellectual genealogies institutional settings and conceptual path dependencies With this in mind this guide surveys the following areas territoriality infrastructure and borders nature environment and landscape city and home social space and political protest spaces of knowledge spatial imaginaries cartographic representations and historical GIS research **Dār al-Islām Revisited** Sarah Albrecht,2018-04-24 Where is d r al isl m and who defines its boundaries in the 21st century In D r al Isl m Revisited Territoriality in Contemporary Islamic Legal Discourse on Muslims in the West Sarah Albrecht explores the variety of ways in which contemporary Sunni Muslim scholars intellectuals and activists reinterpret the Islamic legal tradition of dividing the world into d r al isl m the territory of Islam d r al arb the territory of war and other geo religious categories Starting with an overview of the rich history of debate about this tradition this book traces how and why territorial boundaries have remained a matter of controversy until today It shows that they play a crucial role in current discussions of religious authority identity and the interpretation of the shari a in the West *Legal Geography* Matteo Nicolini,2022-12-05 This book invites readers to critically rethink the interrelations between geography and the law Traditionally legal geographical interrelations have been dominated by scholars with backgrounds in geopolitics economics or geography More recently a new interdisciplinary approach has been developed with the aim of offering a fresh perspective on how law and geography intersect There has been a steady growth in cross disciplinary research in this field how legal geographical taxonomies interrelate has attracted attention from scholars and academics with a diverse range of backgrounds namely law anthropology and human physical geography thus giving rise to several publications Against this backdrop the book adopts a legal comparative perspective and assesses normative spatialities which are the outcomes of processes of legal spatial production In addition the comparative analysis offers readers new insights on some traditional geographic features which are essential to legal studies territorial identity regional demarcation territorial alternation and place name policy Examples are drawn from several jurisdictions both from the Global North and the Global South and partly employ a diachronic perspective As its subversive character is ideally suited to revealing policies and agendas comparative law is used to identify the ethnocentric and colonial biases underpinning the use and misuse of legal geographic devices by policymakers and

academics In sum the book presents legal geography as an interdisciplinary undertaking in which geographers and legal scholars can jointly examine common concepts in the historical cultural political and social contexts in which law is practised The book transcends the boundaries between disciplines to engage in a fruitful dialogue on how the law can help to address the current socio geographic and ecological crises

Chronotopes of Law Mariana Valverde, 2015-01-09 This book develops a new framework for analyzing the spatio temporal workings of law and other forms of governance Chronotopes of Law argues that studies of law and governance can be reinvigorated by drawing on a bundle of quite heterogenous analytical tools that do not have a single provenance or a single political or normative aim but that work well in combination Analyses of legal temporality carried out by anthropologists and studies of law and space undertaken by geographers and legal scholars have proliferated in recent years but these research traditions have remained largely separate By adapting notions such as intertextuality dialogism and the chronotope from Mikhail Bakhtin notions designed specifically to synthesize considerations of space and time in a framework that is open ended interactive and dynamic Mariana Valverde develops an anti metaphysical theory and method for legal studies This approach will be useful both to theorists and to researchers seeking to illuminate the actual workings of law and other forms of governance Indeed a key aim of the book is to break down the institutional and disciplinary barriers that prevent theorists from learning from empirical studies and viceversa Written by one of the foremost sociolegal scholars writing today this theoretically innovative work constitutes a major contribution to contemporary studies in law and society

Theories of Resistance Marcelo Lopes de Souza, Richard J. White, Simon Springer, 2016-06-17 Space is never a neutral stage on which social actors play their roles sometimes cooperating with each other sometimes struggling against each other Space has multiple and complex functions in the development of social relations it is a reference for identity building a material condition for existence and an instrument of power This book explores the ways in which space has been used for resistance especially in left libertarian contexts From the early anarchist organizing efforts in the 19th century to the contemporary social movements of the Mexican Zapatistas the chapters examine a range of cases to illustrate both the limits and potentialities of utilizing space within anarchist practice By theorizing the production of anarchist spaces the book aims to foster new geographical imaginations that energetically cultivate alternative practices to challenge the status quo It shows that spatial re organization spatial practices and spatial resources are also a basic condition for human emancipation

autonomy and freedom Migrants and Race in the US Philip Kretsedemas, 2013-10-23 This book explains how migrants can be viewed as racial others not just because they are nonwhite but because they are racially alien This way of seeing makes it possible to distinguish migrants from a set of racial categories that are presumed to be indigenous to the nation In the US these indigenous racial categories are usually defined in terms of white and black Kretsedemas explores how this kind of racialization puts migrants in a quandary leading them to be simultaneously raced and situated outside of race Although the book focuses on the situation of migrants in the US it builds on theories of migrants and race that extend beyond the US and makes a point of criticizing nation centered explanations of race and racism These arguments point toward the emergence of a new field visibility that has transformed the racial meaning of nativity migration and migrant ethnicity It also situates these changing views of migrants in a broader historical perspective than prior theory explaining how they have been shaped by a changing relationship between race and territory that has been unfolding for several hundred years and which crystallizes in the late colonial era

Community of Peace Christopher Courtheyn, 2022-03-29 Achieving peace is often thought about in terms of military operations or state negotiations Yet it also happens at the grassroots level where communities envision and create peace on their own The San Jos de Apartad Peace Community of small scale farmers has not waited for a top down peace treaty Instead they have actively resisted forced displacement and co optation by guerrillas army soldiers and paramilitaries for two decades in Colombia's war torn Urab region Based on ethnographic action research over a twelve year period Christopher Courtheyn illuminates the community's understandings of peace and territorial practices against ongoing assassinations and displacement San Jos's peace through autonomy reflects an alternative to traditional modes of politics practiced through electoral representation and armed struggle Courtheyn explores the meaning of peace and territory while also interrogating the role of race in Colombia's war and the relationship between memory and peace Amid the widespread violence of today's global crisis Community of Peace illustrates San Jos's rupture from the logics of colonialism and capitalism through the construction of political solidarity and communal peace

A History of Diplomacy, Spatiality, and Islamic Ideals Malika Dekkiche, 2024-08-22 Inspired by the spatial turn this volume links for the first time the study of diplomacy and spatiality in the premodern Islamic world to understand practices and meanings ascribed to territory and realms Debates on the nature of the sovereign state as a territorially defined political entity are closely linked to discussions of modernity and to the development of the field of international relations While scholars from different disciplinary backgrounds have long questioned the existence of such a concept as a territorial state rarely have they ventured outside the European context A closer look at the premodern Islamic world however shows that space and territoriality highly mattered in the conception of interstate contacts and in the conduct and evolution of diplomacy This volume addresses these issues over the longue dur e thirteenth to nineteenth centuries and from various approaches and sources including letters chancery manuals notarial records travelogues chronicles and fatwas The contributors also explore the various diplomatic practices and understandings of spatiality that were present throughout the Islamic world from Al Andalus to the Ottoman realms The book will be of interest to students and researchers in a range of disciplines including international relations diplomatic history and Islamic
