Territory Of Information Pragmatics And Beyond New Series:

Territory of Information Akio Kamio, 1997-07-03 Most higher animals are said to be territorial as a huge amount of work in ethology has made it clear Human beings are no exceptions They tend to occupy a certain space around them where they claim their own presence and exclude others quite naturally If territory is so prevalent among higher animals including humans then isn't it possible to observe its manifestations in aspects of human language Territory of Information starts from this fundamental question and attempts to demonstrate the key function of the concept of territory in the informational structure and syntax of natural language It offers an analysis of English Japanese and Chinese in terms of territory and shows its fundamental importance in the interface of information and syntax in these languages Moreover it argues that the concept of territory plays a major role in the evidentiality of a number of languages and in the linguistic structure of politeness It also makes much reference to discourse and conversational analysis Thus this is a book which might interest readers concerned with pragmatics in general the relationship between informational structure and syntax evidentiality politeness discourse analysis and conversational analysis *Certainty-uncertainty - and the Attitudinal Space in Between* Sibilla

Cantarini, Werner Abraham, Elisabeth Leiss, 2014-11-15 The selected papers of this volume cover five main topics namely Certainty The conceptual differential Un Certainty as attitudinality Dialogical exchange and speech acts Onomasiology and Applications in exegesis and religious discourse By examining the general theme of the communication of certainty and uncertainty from different scientific fields theoretical approaches and perspectives this compendium of state of the art research papers provides both an interdisciplinary comparison of the latest investigations methods and findings and new advances and theoretical insights with a common focus on human communication *A Grammar of Bunan* Manuel

Widmer, 2017-09-11 This book provides a comprehensive grammatical description of Bunan a Tibeto Burman languages that is spoken by approximately 4 000 people in the North Indian Himalayas The grammar offers a systematic analysis of a wide range of grammatical phenomena ranging from phonetics and phonology to complex syntactic constructions Moreover it contains a wealth of historical annotations annotated texts and a Bunan English glossary **Egophoricity** Simeon

Floyd, Elisabeth Norcliffe, Lila San Roque, 2018-04-15 Egophoricity refers to the grammaticalised encoding of personal knowledge or involvement of a conscious self in a represented event or situation Most typically a marker that is egophoric is found with first person subjects in declarative sentences and with second person subjects in interrogative sentences This person sensitivity reflects the fact that speakers generally know most about their own affairs while in questions this epistemic authority typically shifts to the addressee First described for Tibeto Burman languages egophoric like patterns have now been documented in a number of other regions around the world including languages of Western China the Andean region of South America the Caucasus Papua New Guinea and elsewhere This book is a first attempt to place detailed descriptions of this understudied grammatical category side by side and to add to the cross linguistic picture of how ideas of

self and other are encoded and projected in language The diverse but conceptually related egophoric phenomena described in its chapters provide fascinating case studies for how structural patterns in morphosyntax are forged under intersubjective interactional pressures as we link elements of our speech to our speech situation

Usage-based Approaches to Japanese Grammar Kaori Kabata,Tsuyoshi Ono,2014-06-15 This volume brings together papers that take usage based approaches to study the nature of human language with a focus on the grammar of Japanese The 12 chapters provide a rich array of data and methodologies with topics ranging from phonology modality and grammatical morphemes to sentential construction and discourse level phenomena such as turn taking speech register and language change As a whole they demonstrate that usage based linguistics illuminates various phenomena in the language that could not have been well accounted for by resorting solely to a formal theory such as the Universal Grammar based approach Reflecting theoretical methodological and technological advancements made in and outside the field of cognitive functional linguistics in recent years the papers contained in this volume both individually and collectively have significant implications towards linguistics in general and Japanese linguistics in particular as well as Japanese language teaching

The Pragmatics of Modals in Shakespeare Minako Nakayasu,2009 Modals and related phenomena are without doubt one of the most complicated issues in the grammar of language This study provides a reappraisal of the modals in Shakespeare's language from the pragmatic viewpoint both micropragmatic and macropragmatic The material selected for analysis are modals SHALL SHOULD WILL WOULD and their contracted forms Micropragmatic aspects such as speech acts seem relatively easily accessible to historical researchers however this study moves further into the macropragmatic dimensions of language use than the earlier ones and covers politeness dialogue and discourse analysis

system as it is evolving Evidentials in Ryukyuan: the Shuri Variety of Luchuan Tomoko Arakaki, 2013-07-15 Evidentiality the linguistic category which marks the source of the speaker's information has often been overlooked in studies of Luchuan Ryukyuan the only sister language of Japanese In this book Arakaki provides the first comprehensive analysis of Luchuan evidentials She proposes that Luchuan has a grammatical evidential system which contains one Direct evidential and three indirect evidentials Inference Assumed and Reportative The discussion includes cross linguistic issues such as how evidentiality is related to epistemic modality with the intention that this work should constitute a contribution to the typological and theoretical study of evidentiality This work will open new horizons for the study of evidentiality

Bolden, John Heritage, Marja-Leena Sorjonen, 2023-12-15 This book is about one of the most fundamental action sequences found across human societies and socio cultural contexts polar questions and their responses Question answer sequences are among the most basic building blocks for sequences of action in interaction and are ubiquitous among the languages of the world Among different types of questions polar questions are the most common occurring with greater frequency in all studied languages This volume presents a collection of conversation analytic studies into responses to polar questions across ten different typologically diverse languages in a range of action environments and social contexts The studies explore different ways in which speakers can respond to polar questions and the relationships between response design the action implemented by the response and the context in which it occurs Taken together the studies assembled in the volume present a nuanced view of polar responses as a situated social action

Insubordination Nicholas Evans, Honoré Watanabe, 2016-11-18 The phenomenon of insubordination can be defined diachronically as the recruitment of main clause structures from subordinate structures or synchronically as the independent use of constructions exhibiting characteristics of subordinate clauses Long marginalised as uncomfortable exceptions insubordinated clause phenomena turn out to be surprisingly widespread and provide a vital empirical testing ground for various central theoretical issues in current linguistics the interplay of langue and parole the emergence of structure the question of where productive syntactic rules give way to constructions the role of prosody in language change and the question of how far grammars are produced by isolated speakers as opposed to being collaboratively constructed in dialogue This volume the first book length treatment on the topic assembles studies of languages on all continents by scholars who bring a range of approaches to bear on the topic from historical linguistics to corpus studies to typology to conversational analysis

Focus and Background in Romance Languages Andreas Dufter, Daniel Jacob, 2009-06-18 Focus background structure has taken center stage in much current theorizing about sentence prosody syntax and semantics However both the inventory of focus expressions found cross linguistically and the interpretive consequences associated with each of these continue to be insufficiently described This volume aims at providing new observations on the availability and the use of focus markings in Romance languages In doing so it documents the

plurality of research on focus in Spanish Portuguese French Italian and Romanian Topics covered include constituent fronting and clefting the position of subjects and focus particles clitic doubling of objects and information packaging in complex sentences In addition some contributions explore focus background structure from acquisitional and diachronic angles while others adopt a comparative perspective studying differences between individual Romance and Germanic languages Therefore this volume is of interest to a broad audience within linguistics including syntacticians semanticists and historical linguists

Intention, Common Ground and the Egocentric Speaker-Hearer Istvan Kecskes, Jacob Mey, 2008-11-03 This book presents current research that discusses some of the major issues in pragmatics from new perspectives and directs attention to aspects of fundamental tenets that have been investigated only to a limited extent Current pragmatic theories emphasize the importance of intention cooperation common ground mutual knowledge relevance and commitment in executing communicative acts However recent research in cognitive psychology linguistic pragmatics and intercultural communication has raised questions that warrant some revision of these major tenets Debates about the place of intention in pragmatics have indicated that Gricean intentions may play a less central role in communication than traditionally assumed Cognitive psychologists pointed out that individual egocentric endeavors of interlocutors play a much more decisive role in the initial stages of production and comprehension than current

pragmatic theories envision Some researchers criticized the Clark and Brennan s common ground model and Clark s contribution theory arguing that these approaches retain a communication as transfer between minds view of language and treat intentions and goals as pre existing psychological entities that are later somehow formulated in language All these developments are addressed in the papers of the volume written by prominent scholars representing several disciplines
