Independent scholar Falk analyzes the genesis of Islamic terror from many standpoints including religious cultural historical political social economic and above all psychological Drawing on his training as a clinical psychologist Falk s writings specialize in psychohistory and political psychology Here he examines topics including infantile experience and adult terrorism the meaning of terror terrorists and their mothers narcissistic rage and Islamic terror and whether terrorists are normal people as some scholars claim He also describes the infantile development of terrorist pathology non psychoanalytic theories of terrorism globalization s effect on terrorism and the notion of the clash of civilizations Examining the emotional structure of traditional Muslim families Falk shows us the Muslim child s ambivalence toward his or her parents ways in which Muslims abuse women and children and the roots of Muslim rage and why all of that plays into the development of future terrorism Other topics addressed in this reader friendly analysis include history s first Islamic terrorists and three important cases two recent deadly terrorists and a primary figure in our current war on terror The central idea throughout the book is that a person s attitude toward terror and terrorism as well as whether he or she becomes a murderous terrorist or even who wages a global war on terror has much to do with that person s own terrifying experiences in infancy and childhood Such terror usually experienced first in the earliest interactions with the mother is symbolically expressed as Falk shows in fairy tales and myths about terrifying witches and female monsters Further terror may be experienced in the relationship with the father and also in various other traumatic ways It is these early terrors when extreme and uncontrollable that most often produce terrorists and wars on terror Falk argues Thus his book focuses on the conscious but also on the irrational and unconscious causes of terrorism

Intervention and Secession in South Asia Anne N. Dos Santos, 2007-10-30 From Chechnya in Russia to Kashmir in India to the Basque region in Spain secessionist movements remain a serious threat to international security Despite the importance of this issue the causes that bring about external military intervention in a secessionist war have not until now been adequately addressed In this book Dos Santos identifies the conditions that make international military intervention in a secessionist war more or less likely South Asia being fraught with secessionist movements Bangladesh Sri Lanka Kashmir and Punjab provides an ideal laboratory for the examination of this compelling issue Dos Santos argues that a shift in the balance of power between a secessionist group and its central government will lead to a preventive war on the secessionists by the central government In turn a preventive war of this nature may lead to an alliance between the secessionist group and an external power The stronger the alliance the greater the chances of an international military intervention Understanding the conditions under which secessionist movements expand become secessionist wars and invite international military intervention on behalf of the secessionists has strong policy implications It can go a long way toward guiding policymakers who may want to mitigate or avoid these conditions in their states Dos Santos views both states and secessionist groups as primary actors and she examines both the distribution of power among states and the balance of power between central government and groups within states
