Winters - Computation of Chains Terry Winters, Adam Fuss, Judy Linn, Matthew Marks Gallery, 1997 **Terry Winters** Terry Winters, Richard Schiff, Rachel Teagle, 2004-01-01 Terry Winters's work of the past decade weaves disparate strains of idea object and physical operations into the primary logic of his art His art contains an astonishing array of forms and demonstrates the equally surprising breadth of his artistic language This retrospective volume continues where the mid career survey 1992 at the Whitney Museum concluded presenting the past decade of Winters's innovative work in paintings prints drawings and artists books Terry Winters presents the ways in which the artist creates sets and subsets of distinctive works that interact with bodies of previous and current work Also included are images by the artist that have not previously been exhibited or published Winters's work is frequently included in conversations and studies relating to the interplay of art and science and his recent paintings drawings and prints reflect his engagement with scientific and computational systems of thought and presentations of information For Winters abstract art has become a vehicle not for reproducing and inventing form but for harnessing forces By utilizing expressive means data becomes pictorial and spatial This superbly illustrated volume displays the full range of Winters's newest works and the complex relationships that link them to one another

Terry Winters Nan Rosenthal, Terry Winters, Metropolitan Museum of Art (New York, N.Y.), 2001 The American artist Terry Winters b 1949 known for his sensuously abstract paintings and drawings is also a distinguished printmaker He has explored a wide range of printing methods and techniques including intaglio lithography screenprinting woodcut and linoleum cut and has worked at such notable print ateliers as Universal Limited Art Editions in West Islip New York and the Aldo Crommelynck studio in Paris Winters's early works sometimes described as organic abstraction resonate with echoes of the natural world while his more recent prints contain layered abstract fields that address how consciousness relates to visual form This catalogue accompanying a retrospective exhibition of Winters's prints will consist of a short essay a selected bibliography and a checklist of approximately 90 works The prints all from the collection of the Metropolitan Museum will be on display from 12th June to 30th September 2001 **Terry Winters**, 2004 From Head to Hand David Levi Strauss, 2010-02-11 In his third book Strauss delves into the mysterious process whereby an idea is born in the mind and materialized through the hand in the expression of an artwork How exactly does this happen It's a question so basic an act so fundamental to art making that it has rarely received attention It makes an ideal topic for Strauss a writer with an

exceptional ability to animate art's philosophical dimensions in a clear persuasive manner During this time when craft and the direct manipulation of materials by the artist appear to be in eclipse Strauss comes to their defense in a spirited cri de coeur Featuring over 35 illustrations the book examines a wide variety of media and individual examples It explores the works of sculptors Martin Puryear Ursula von Rydingsvard and Donald Lipski painters Leon Golub and Ron Gorchov and writers Robert Duncan Robert Kelly Guy Davenport John Berger and Leo Steinberg In addition there are essays on Joseph Beuys's 7000 Oaks in Ireland contemporary Haida carvers Reg Davidson and Jim Hart Cecilia Vicuña's memory of the fingers and the influence of curators Harald Szeemann and Walter Hopps on the staging of contemporary art exhibitions Known primarily for his writings on photography and politics Strauss here focuses on the least mediated arts painting sculpture and writing His claims are supported by a series of close readings which succeed in recovering the immediacy of the hand and revitalizing contemporary art's connection to the past
