contexts of narrative texts produced in English Canada over the last forty years. It takes as its starting point the nationalist movement of the 1960s and 70s when the supposed absence or weakness of a national sense became the touchstone for official discourses on the cultural identity of the country. That type of metaphor provided the nation with the distinctive elements it was looking for and contributed to the creation of a sense of tradition that has survived to the present. In the decades following the 1970s, however, critics, artists, and writers have repeatedly questioned such a model of national identity, still fragile and in need of articulation, by reading the nation from alternative perspectives such as multiculturalism, environmentalism, neo-regionalism, feminism, or postcolonialism. These contributors suggest that the artistic and cultural flowering Canada is experiencing at the beginning of the twenty-first century is to a great extent based on the dismantlement of the images constructed to represent the nation only forty years ago. Through their readings of representative primary texts, their contextual analysis, and their selected methodological tools, the authors offer a tapestry of alternative approaches to that process of dismantlement. Together they read as an unruly Penelopiad; their unravelling readings self-consciously interrogating Canada's lack of ghosts.

A Companion to Textile Culture Jennifer Harris, 2020-08-17. A lively and innovative collection of new and recent writings on the cultural contexts of textiles. The study of textile culture is a dynamic field of scholarship which spans disciplines and crosses traditional academic boundaries. *A Companion to Textile Culture* is an expertly curated compendium of new scholarship on both the historical and contemporary cultural dimensions of textiles, bringing together the work of an interdisciplinary team of recognized experts in the field. Climate Trauma E. Ann Kaplan, 2015-12-04 Each month brings new scientific findings that demonstrate the ways in which human activities from resource extraction to carbon emissions are doing unprecedented perhaps irreparable damage to our world As we hear these climate change reports and their predictions for the future of Earth many of us feel a sickening sense of déjà vu as though we have already seen the sad outcome to this story Drawing from recent scholarship that analyzes climate change as a form of slow violence that humans are inflicting on the environment Climate Trauma theorizes that such violence is accompanied by its own psychological condition what its author terms Pretraumatic Stress Disorder Examining a variety of films that imagine a dystopian future renowned media scholar E Ann Kaplan considers how the increasing ubiquity of these works has exacerbated our sense of impending dread But she also explores ways these films might help us productively engage with our anxieties giving us a seemingly prophetic glimpse of the terrifying future selves we might still work to avoid becoming Examining dystopian classics like *Soylent Green* alongside more recent examples like *The Book of Eli* *Climate Trauma* also stretches the limits of the genre to include features such as *Blindness* *The Happening* *Take Shelter* and a number of documentaries on climate change These eclectic texts allow Kaplan to outline the typical blind spots of the genre which rarely depicts climate catastrophe from the vantage point of women or minorities Lucidly synthesizing cutting edge research in media studies psychoanalytic theory and environmental science *Climate Trauma*
