*Perceptual Audio Evaluation - Theory, Method and Application* Søren Bech,Nick Zacharov,2007-01-11 As audio and  
telecommunication technologies develop there is an increasing need to evaluate the technical and perceptual performance of  
these innovations A growing number of new technologies e g low bit rate coding are based on specific properties of the  
auditory system which are often highly non linear This means that the auditory quality of such systems cannot be measured  
by traditional physical measures such as distortion frequency response etc but only by perceptual evaluations in the form of  
listening tests Perceptual Audio Evaluation provides a comprehensive guide to the many variables that need to be considered  
before during and after experiments Including the selection of the content of the programme material to be reproduced  
technical aspects of the production of the programme material the experimental set up including calibration and the  
statistical planning of the experiment and subsequent analysis of the data Perceptual Audio Evaluation Provides a complete  
and accessible guide to the motives theory and practical application of perceptual evaluation of reproduced sound Discusses  
all the variables of perceptual evaluation their control and their possible influence on the results Covers in detail all  
international standards on the topic Is illustrated throughout with tables figures and worked solutions Perceptual Audio  
Evaluation will appeal to audio and speech engineers as well as researchers in audio and speech laboratories Postgraduate  
students in engineering or acoustics and undergraduate students studying psychoacoustics speech audio processing and
