Gabriel Lippmann's Colour Photography Hanin Hannouch, 2025-10-01 Physicist Gabriel Lippmann s 1845 1921 photographic process is one of the oldest methods for producing colour photographs So why do the achievements of this 1908 Nobel laureate remain mostly unknown outside niche circles Using the centenary of Lippmann s death as an opportunity to reflect upon his scientific photographic and cultural

legacy this book is the first to explore his interferential colour photography Initially disclosed in 1891 the emergence of this medium is considered here through three shaping forces science media and museums A group of international scholars reassess Lippmann's reception in the history of science where he is most recognised by going well beyond his endeavours in France and delving into the complexity of his colour photography as a challenge to various historiographies Moreover they analyse colour photographs as optical media thus pluralising Lippmann photography's ties to art cultural and imperial history as well as media archaeology The contributors also focus on the interferential plate as a material object in need of both preservation and exhibition one that continues to fascinate contemporary analogue photographers This volume allows readers to get to know Lippmann grasp the interdisciplinary complexity of his colourful work and ultimately expand his place in the history of photography
