fastening a strap on each end he made us understand that we should hold on to the log with one arm and try to swim with the other arm and our feet While trying to swim I accidentally hit the Father in the stomach At that moment he thought he was lost and I assure you he invoked the patron saint of his order St Francis with all his heart I could not keep from laughing although I could see I was in peril of drowning But the Indians on the other side saw all this and came to our help Still there were others to get across We made the Indians understand that they must go help them but because they had become disgusted by the last trip they did not want to return again This distressed us greatly From Henri Joutel's journal March 23 1687 shortly after La Salle was murdered The La Salle Expedition in Texas presents the definitive English translation of Henri Joutel's classic account of Rene Robert Cavelier Sieur de La Salle's 1684-1687 expedition to establish a fort and colony near the mouth of the Mississippi River Written from detailed notes taken during this historic journey Joutel's journal is the most comprehensive and authoritative account available of this dramatic story of adventure and misadventure in Texas Joutel who served as post commander for La Salle describes in accurate and colorful detail the daily experiences and precise route La Salle's party followed in 1687 from the Texas coast to the Mississippi River By carefully comparing Joutel's compass directions and detailed descriptions to maps and geographic locations Foster has established where La Salle was murdered by his men and has corrected many erroneous geographic interpretations made by French and American scholars during the past century Joutel's account is a captivating narrative set in a Texas coastal wilderness Foster follows Joutel La Salle and their fellow adventurers as they encounter Indians and their unique cultures enormous drifting herds of bison and unknown flora and fauna including lethal flowering cactus fruit and rattlesnakes The cast of characters includes priests and soldiers deserters and murderers Indian leaders and a handful of French women who worked side by side with the men It is a remarkable first hand tale of dramatic adventure as these diverse individuals meet and interact on the grand landscape of Texas Joutel's journal newly translated by Johanna S Warren is edited and annotated with an extensive introduction by William C Foster The account is accompanied by numerous detailed maps and the first published English translation of the testimony of Pierre Meunier one of the most knowledgeable and creditable survivors of La Salle's expedition

Management of Amphibians, Reptiles, and Small Mammals in North America Robert C. Szaro, Kieth E. Severson, David R. Patton, 1988 Historically the management of public lands from a multiple use perspective has led to a system that emphasizes those habitat components or faunal elements that primarily resulted in some sort of definable economic value While this often benefitted other species that were not even considered in the original prescriptions it also negatively impacted others We no longer can afford to take this simplistic view of ecosystem management We need to use a more holistic approach where ecological landscapes are considered as units and land management practices incorporate all elements into an integrated policy This includes examining the impacts of proposed land uses on amphibian reptile and small mammal populations
