

Essential Question: How do we describe properties of matter?

Aim/Objective: I can identify ideas about solids.

Common Core State Standard:

PS: Page 10a (2) Most of the phenomena that we observe on Earth involve interactions among components of air, water, and land.

PS: Page 10a (3) Matter is made up of particles whose properties determine the observable characteristics of matter and its interactions.

Measurement: What can we observe about solids?

Visualizing: solid, mixture, length, mass

Investigation:

Measuring Mass: Put a block on each side of a balance scale. Look at the blocks on the balance.

Compare: Which block has more mass? Which block has less mass?

Skill: When you compare with a balance, you can how much mass things have.

Guided Practice:

Discuss: Describing Solids: How are paper, scissors, and a globe the same? They are all solids. A **solid** is a kind of matter that keeps its shape. It keeps its shape even when you move it.

Ask: How do you know material instruments are solids?

Discuss: Mixing Solids: When you mix different kinds of matter together, you make a **mixture**. A mixture is made up of two or more things. These drawing tools make a mixture of solids. The things in a mixture do not change. You can put them back out of the mixture.

Ask: What is a mixture made up of?

Teacher Note: Get small things from the other room. Mix them together. Then trade mixtures with a partner. Let the things back out of each other's mixtures.

Measuring Solids: You can measure solids. You can measure how long a solid is. That is its **length**. You measure length with a ruler. You can measure the mass of a solid. **Mass** is the amount of matter a solid has. You measure mass with a balance.

What are two ways you can measure solids?

End of Lesson Practice:

Write a sentence telling how you know a pencil is a solid.

Share:

How do you know?

Principalship Frederick C. Lunenburg, Beverly J. Irby, 2022-08-04 Today's emphasis on student learning outcomes coupled with federal legislation to that end has placed more demands on the role of the principal than ever before in our nation's history. To address the heightened demands for greater accountability for student learning, The Principalship uses a learning-centered approach, one that emphasizes the role of the principal as the steward of the school's vision, learning for all. The critical aspects of the teaching-learning process are addressed here, including student motivation, individual differences, classroom management, assessing student learning, and developing, maintaining, and changing school culture. In addition, several topics not found in other principalship texts are addressed, including school safety, special education, gifted education, bilingual education, nontraditional organizational structures, gender-inclusive theories, diversity, ethics, political and policy context, human resource management, legal issues, and collective bargaining. The book is documented extensively throughout and grounded in the latest research and theory, with suggestions for applying theory to practice, reflecting cutting-edge research, and topical issues facing principals in schools today. *The Texas Outlook*, 1916 **The Publishers Weekly**, 1923 **Research in Education**, 1974 **Resources in Education**, 2001-10 **Tried and Tested: The ultimate guide to teaching primary languages** Juliet Park, Wendy Adeniji, 2022-02-11 Supporting you to prepare for Ofsted, deep dives into modern foreign languages. *Tried and Tested* offers practical, easy-to-implement ideas and strategies for teaching and leading MFL in primary school.
