**Expository Discourse in Children, Adolescents, and Adults** Marilyn A.

Nippold, Cheryl M. Scott, 2013-03-07 School success in the 21st century requires proficiency with expository discourse the use and understanding of informative language in spoken and written modalities This occurs for example when high school students read their textbooks and listen to their teachers lectures and later are asked to demonstrate their knowledge of this complex topic through oral reports and essay examinations Although many students are proficient with the expository genre others struggle to meet these expectations This book is designed to provide information on the use and understanding of expository discourse in school age children adolescents and young adults Recently researchers from around the world have been investigating the development of this genre in typical students and in those with language disorders Although many books have addressed the development of conversational and narrative discourse by comparison books devoted to the topic of expository discourse are sparse This crossdisciplinary volume fills that gap in the literature and makes a unique contribution to the study of language development and disorders It will be of interest to a range of professionals including speech language pathologists teachers linguists and psychologists who are concerned with language development and disorders

Survey Research provides an introduction to the theory and practice of sample survey research. It addresses both the student who desires to master these topics and the practicing survey researcher who needs a source that codifies, rationalizes, and presents existing theory and practice. The handbook can be organized into three major parts. Part 1 sets forth the basic theoretical issues involved in sampling, measurement, and management of survey organizations. Part 2 deals mainly with hands-on how to do it issues: how to draw theoretically acceptable samples, how to write questionnaires, how to combine responses into appropriate scales and indices, how to avoid response effects and measurement errors, how actually to go about gathering survey data, how to avoid missing data, and what to do when you cannot, and other topics of a similar nature. Part 3 considers the analysis of survey data, with separate chapters for each of the three major multivariate analysis modes and one chapter on the uses of surveys in monitoring overtime trends. This handbook will be valuable both to advanced students and to practicing survey researchers seeking a detailed guide to the major issues in the design and analysis of sample surveys, and to the current state of the art practices in sample surveys.
