The Divided Dominion Ethan A. Schmidt, 2015-04-01 In *The Divided Dominion* Ethan A Schmidt examines the social struggle that created Bacon's Rebellion focusing on the role of class antagonism in fostering violence toward native people in seventeenth century Virginia This provocative volume places a dispute among Virginians over the permissibility of eradicating Native Americans for land at the forefront in understanding this pivotal event Myriad internal and external factors drove Virginians to interpret their disputes with one another increasingly along class lines The decades long tripartite struggle among elite whites non elite whites and Native Americans resulted in the development of mutually beneficial economic and political relationships between elites and Native Americans When these relationships culminated in the granting of rights equal to those of non elite white colonists to Native Americans the elites crossed a line and non elite anger boiled over A call for the annihilation of all Indians in Virginia united different non elite white factions and molded them in widespread social rebellion *The Divided Dominion* places Indian policy at the heart of Bacon's Rebellion revealing the complex mix of social cultural and racial forces that collided in Virginia in 1676 This new analysis will interest students and scholars of colonial and Native American history

No Wood, No Kingdom Keith Pluymers, 2021-05-21 In early modern England wood scarcity was a widespread concern Royal officials artisans and common people expressed their fears in laws petitions and pamphlets in which they debated the severity of the problem speculated on its origins and proposed solutions to it No Wood No Kingdom explores these conflicting attempts to understand the problem of scarcity and demonstrates how these ideas shaped land use forestry and the economic vision of England's earliest colonies Popular accounts have often suggested that deforestation served as a push for English colonial expansion Keith Pluymers shows that wood scarcity in England rather than a problem of absolute supply and demand resulted from social conflict over the right to define and regulate resources difficulties obtaining accurate information and competing visions for trade forestry and the English landscape Domestic scarcity claims did encourage schemes to develop wood dependent enterprises in the colonies but in practice colonies competed with domestic enterprises rather than supplanting them Moreover close studies of colonial governments and the actions of individual landholders in Ireland Virginia Bermuda and Barbados demonstrate that colonists experimented with different often competing approaches to colonial woods and trees including efforts to manage them as long term resources albeit ones that nonetheless brought significant transformations to the land No Wood No Kingdom explores the efforts to knot together woods around the Atlantic basin as resources for an English empire and the deep underlying conflicts and confusion that largely frustrated those plans It speaks to historians of early modern Europe early America and the Atlantic World but also offers key insights on early modern resource politics forest management and political ecology of interest to readers in the environmental humanities and social sciences as well as those interested in colonialism or economic history **British North America in the**

Seventeenth and Eighteenth Centuries Stephen Foster, 2013-11-21 Until relatively recently the connection between British imperial history and the history of early America was taken for granted In recent times however early American historiography has begun to suffer from a loss of coherent definition as competing manifestos demand various reorderings of the subject in order to combine time periods and geographical areas in ways that would have previously seemed anomalous It has also become common place to announce that the history of America is best accounted for in America itself in a three way melee between settlers the indigenous populations and the forcibly transported African slaves and their creole descendants The contributions to British North America in the Seventeenth and Eighteenth Centuries acknowledge the value of the

historiographic work done under this new dispensation in the last two decades and incorporate its insights. However, the volume advocates a pluralistic approach to the subject generally and attempts to demonstrate that the metropolitan power was of more than secondary importance to America in the seventeenth and eighteenth centuries. The central theme of this volume is the question to what extent did it make a difference to those living in the colonies that made up British North America in the seventeenth and eighteenth centuries that they were part of an empire and that the empire in question was British. The contributors, some of the leading scholars in their respective fields, strive to answer this question in various social, political, religious, and historical contexts.

A History of North Carolina in the Proprietary Era, 1629-1729 Lindley S. Butler, 2022-03-10. In this book, Lindley S. Butler traverses oft-noted but little-understood events in the political and social establishment of the Carolina colony. In the wake of the English Civil Wars in the mid-seventeenth century, King Charles II granted charters to eight Lords Proprietors to establish civil structures, levy duties and taxes, and develop a vast tract of land along the southeastern Atlantic coast. Butler argues that unlike the New England theocracies and Chesapeake plantocracy, the isolated colonial settlements of the Albemarle, the cradle of today's North Carolina, saw their power originate neither in the authority of the church nor in wealth extracted through slave labor, but rather in institutions that emphasized political, legal, and religious freedom for white male landholders. Despite this distinct pattern of economic, legal, and religious development, however, the colony could not avoid conflict among the diverse assemblage of Indigenous, European, and African people living there, all of whom contributed to the future of the state and nation that took shape in subsequent years. Butler provides the first comprehensive history of the proprietary era in North Carolina since the nineteenth century, offering a substantial and accessible reappraisal of this key historical period.

The Barbarous Years Bernard Bailyn, 2012. Presents an account of the first great transit of people from Britain, Europe, and Africa to the North American British colonies, evaluating its diversity, the survival struggles of immigrants, and their relationships with the indigenous populations of the Eastern seaboard.

Lethal Encounters Alfred A. Cave, 2011-01-20. This in-depth narrative history of the interactions between English settlers and American Indians during the Virginia colony's first century explains why a harmonious coexistence proved impossible. Britain's first successful settlements in America occurred over 400 years ago. Not surprisingly, the historical accounts of these events have often contained inaccuracies. This compelling study of colonial Virginia is based upon the latest research, shedding new light on the tensions between the English and the American Indians and clarifying the facts about storied relationships. In *Lethal Encounters: Englishmen and Indians in Colonial Virginia*, the author examines why the Anglo settlers were unable to establish a peaceful and productive relationship with the region's native inhabitants. Readers will come to understand how the deep prejudices harbored by both whites and Indians, the incompatibility of their economic and social systems, and the leadership failures of protagonists like John Smith and Powhatan

interaction in the Caribbean from the late 1600s to the early 1800s a period known as the long seventeenth century a time when these encounters varied widely and the diverse actors were not yet fully enmeshed in the culture and power dynamics of master slave relations The events of this era would profoundly affect the social and political development both of the colonies that Europeans established in the Caribbean and the wider world This book is the first to offer comparative treatments of Danish Dutch English and French trading pirating and colonizing activities in the Caribbean and analysis of the corresponding interactions among people of African European and Native origin The contributions range from an investigation of the indigenous colonization of the Lesser Antilles by the Kalinago to a look at how the Anglo Dutch wars in Europe affected relations between the English inhabitants and the Dutch government of Suriname Among the other essays are incisive examinations of the often neglected history of Danish settlement in the Virgin Islands attempts to establish French colonial authority over the pirates of Saint Domingue and how the Caribbean blueprint for colonization manifested itself in South Carolina through enslavement of Amerindians and the establishment of plantation agriculture The extensive geographic demographic and thematic concerns of this collection shed a clear light on the socioeconomic character of the Torrid Zone before and during the emergence and extension of the sugar and slaves complex that came to define this region The book is an invaluable contribution to our understanding of the social political and economic sensibilities to which the operators around the Caribbean subscribed as well as to our understanding of what they did offering in turn a better comprehension of the consequences of their behavior Covering a variety of undertakings especially English but also Dutch Danish French and indigenous this collection makes a welcome contribution to our understanding of a pivotal period in the history of the West Indies Carla Gardina Pestana University of California Los Angeles This illuminating collection of essays brings the Caribbean squarely into the frame of analysis strongly making the case that the experiences and developments of the Caribbean colonies remained crucial to the history of colonial America The contributions cover the centrality of enslaved people s labor and the actions of Indigenous and peoples of African descent who shaped the history of the region through their resistance accommodation and engagement Ignacio Gallup Diaz Bryn Mawr College *Early Modern Virginia* Douglas Bradburn, John C.
