R. F. Maunder,2004 Evidence indicates that the concertos of Vivaldi Bach Haydn etc were performed as chamber music not the full orchestral works commonly assumed The concertos of Vivaldi Bach Handel and their contemporaries are some of the most popular and the most frequently performed pieces of classical music and the assumption has always been they were full orchestral works This book takes issue with this orthodox opinion to argue quite the reverse that contemporaries regarded the concerto as chamber music The author surveys the evidence from surviving printed and manuscript performance material from concerts throughout Europe between 1685 and 1750 the heyday of the concerto demonstrating that concertos were nearly always played one to a part at that time He makes a particularly close study of the scoring of the bass line discussing the question of what instruments were most appropriate and what was used when The late Dr RICHARD MAUNDER was Fellow of Christ s College Cambridge *The Double Disguise. Handel Mrs. Julian Marshall, 1883 **Music-Making in North-East England during the Eighteenth Century**, 2017-07-05 The north east of England in the eighteenth century was a region where many different kinds of musical activity thrived and where a wide range of documentation survives Such activities included concert giving teaching tuning and composition as well as music in the theatre and in church Dr Roz Southey examines the impulses behind such activities and the meanings that local people found inherent in them It is evident that music could be perceived or utilized for extremely diverse purposes as entertainment as a learned art as an aid to piety as a profession a social facilitator and a support to patriotism and nationalism Musical societies were established throughout the century and Southey illustrates the social make up of the members as well as the role of Gentlemen Amateurs in the organizing of concerts and the connections with London and other centres The book draws upon a rich selection of source material including local newspapers council and ecclesiastical records private papers and diaries and accounts of local tradesman as well as surviving examples of music composed in the area by Charles Avison Thomas Ebdon and John Garth of Durham amongst many others Charles Avison's importance is focused upon particularly and his Essay on Musical Expression is considered alongside other contemporary writings of lesser fame Southey provides a fascinating insight into the type and social class of audiences and their influence on the repertoire performed The book moves from a consideration of music being used as a fashion item evidenced by the patronage of big name soloists from London and abroad to fiddlers ballad singers music at weddings funerals public celebrations and music for marking the events of the American War of Independence and the French Revolutionary Wars It can be seen therefore that the north east was an area of important musical activity and that the music was always interwoven into the political economic religious and commercial fabric of eighteenth century life

Monthly musical record ,1888 **Catalogue ...** University of Michigan. School of Music,1917 [Concert Life in Eighteenth-Century Britain](#) Susan Wollenberg,2017-07-05

In recent years there has been a considerable revival of interest in music in eighteenth century Britain This interest has now expanded beyond the consideration of composers and their music to include the performing institutions of the period and their relationship to the wider social scene The collection of essays presented here offers a portrayal of concert life in Britain that contributes greatly to the wider understanding of social and cultural life in the eighteenth century Music was not merely a pastime but was irrevocably linked with its social political and literary contexts The perspectives of performers organisers patrons audiences publishers copyists and consumers are considered here in relation to the concert experience All of the essays taken together construct an understanding of musical communities and the origins of the modern concert system This is achieved by focusing on the development of music societies the promotion of musical events the mobility and advancement of musicians systems of patronage the social status of musicians the repertoire performed and published the role of women pianists and the topography of concerts In this way the book will not only appeal to music specialists but also to social and cultural historians
