Copyright Office, 1975 *Dancing with History* George Lakey, 2022-12-06 A memoir of a Quaker activist and master storyteller on his involvement in struggles for peace civil rights LGBTQ rights labor justice and the environment whose life will be the subject of a new documentary film coming in 2023 From his first arrest in the Civil Rights era to his most recent during a climate justice march at the age of 83 George Lakey has committed his life to a mission of building a better world through movements for justice Lakey draws readers into the center of history making events telling often serious stories with playfulness and intimacy In this memoir he describes the personal political and theoretical coming out as bisexual to his Quaker community while known as a church leader and family man protesting against the war in Vietnam by delivering medical supplies through the naval blockade in the South China Sea and applying his academic study of nonviolent resistance to creative tactics in direct action campaigns From strategies he learned as a young man facing violence in the streets to risking his life as an unarmed bodyguard for Sri Lankan human rights lawyers Lakey recounts his experience living out the tension between commitment to family and mission Drawing strength from his community to fight cancer survive painful parenting struggles and create networks to help prevent activist burnout this book shows readers how to find hope in even

Strategy for a Living Revolution George Lakey,1973 *The Paradox of Repression and Nonviolent Movements* Lester R. Kurtz, Lee A. Smithey,2018-05-15 Political repression often paradoxically fuels popular movements rather than undermining resistance When authorities respond to strategic nonviolent action with intimidation coercion and violence they often undercut their own legitimacy precipitating significant reforms or even governmental overthrow Brutal repression of a movement is often a turning point in its history Bloody Sunday in the March to Selma led to the passage of civil rights legislation by the US Congress and the Amritsar Massacre in India showed the world the injustice of the British Empire's use of force in maintaining control over its colonies Activists in a wide range of movements have engaged in nonviolent strategies of repression management that can raise the likelihood that repression will cost those who use it *The Paradox of Repression and Nonviolent Movements* brings scholars and activists together to address multiple dimensions and significant cases of this phenomenon including the relational nature of nonviolent struggle and the cultural terrain on which it takes place the psychological costs for agents of repression and the importance of participation creativity and overcoming fear whether in the streets or online *Toward Nuclear Disarmament And Global Security* Burns H Weston,2019-06-04 This text is designed to provide students and others with a theoretical and factual base for understanding the complex questions posed by continued reliance on nuclear weapons to protect geopolitical interests In Part One the authors examine the destructiveness and cost of modern nuclear arsenals and offer both normative and systemic explanations **Toward a Living Revolution** George Lakey,2016-03-03 The Arab Awakening and other nonviolent insurrections have often failed to produce lasting democratic change A believer in empowerment Lakey proposes a stage by stage developmental framework to get better more transformational results Still incorporating the nonviolent coercive force that has brought down dictators Lakey uses historical best practices from movements to show how people can grow a revolution that roots itself even while it confronts The five stages begin with consciousness change lifting an intersectional vision that inspires and provides the basis for a critical mass to join the movement as it pushes through each developmental stage Lakey shows how to reconcile prefigurative alternative institutions with confrontive direct action teams making the most of inherent synergistic potentials With actual stories from confrontation with violent authorities he describes what works best for unifying and building the movement to the point where it can carry out the mass noncooperation that opens a power vacuum Earlier democratic organizing structures growing as the strategy unfolds can then fill the vacuum This stage prevents a relapse into the old oppression and defends the new society against counterrevolutionary forces Although focused on how each society can realize its own revolution this book acknowledges the context of global power and proposes a vision for transformed world institutions that are on the side of peace and justice The principles in the book have particular application in the climate crisis humanity now faces which is why the book describes a living revolution
