Stress Management for Human Services Richard E. Farmer, 1984 Using a practical preventative approach the authors isolate sources of personal and organizational stress that have been identified in some of the staff employed in the social and human services The conclusion of the authors is that stress management involves individual choice This centres around the question of whether or not one decides to become a victim of one's job family or other interpersonal relationships or situations It has been stated that the effectiveness of a worker is directly related to his or her level of self awareness A decision to deal with stress positively is the responsibility of each individual The book focuses on those issues that produce occupational stress and ways of reducing such stress The principles outlined in this volume of the series SAGE Human Services Guides are applicable beyond human services to public administration and business It will be a useful guide to recognizing and helping to combat stress Understand Social Agency Armand Lauffer, 1984-11 This revised and expanded
