Self-Projection Linda Haverty Rugg,2014-03-01 In 1957 a decade before Roland Barthes announced the death of the author Fran ois Truffaut called for a new era in which films would resemble the person who made them and be even more personal than an autobiographical novel More than five decades on it seems that Barthes has won the argument when it comes to most film critics The cinematic author we are told has been dead for a long time Yet Linda Haverty Rugg contends not only that the art cinema auteur never died but that the films of some of the most important auteurs are intensely if complexly related to the lives and self images of their directors Self Projection explores how nondocumentary narrative art films create alternative forms of collaborative self representation and selfhood The book examines the work of celebrated directors who plant autobiographical traces in their films including Truffaut Bergman Fellini Tarkovsky Herzog Allen Almod var and von Trier It is not simply that these directors and many others like them make autobiographical references or occasionally appear in their films but that they tie their films to their life stories and communicate that link to their audiences Projecting a new kind of selfhood these directors encourage identifications between themselves and their work even as they disavow such connections And because of the collaborative and technological nature of filmmaking the director s self projection involves actors audience and the machines and institution of the cinema as well Lively and accessible Self Projection sheds new light on the films of these iconic directors and on art cinema in general ultimately showing how film can transform not only the autobiographical act but what it means to have a self

The Oxford Guide to Literature in English Translation Peter France, 2000 Translation has been a crucial process in world culture over the past two millennia and more In the English speaking cultures many of the most important texts are translations from Homer to Beckett the Bible to Freud Although recent years have seen a boom in translation studies there has been no comprehensive yet convenient guide to this essential element of literature in English Written by eminent scholars from many countries the Oxford Guide to Literature in English Translation meets this need and will be essential reading for all students of English and comparative literature It highlights the place of translation in our culture encouraging awareness of the issues raised making the translator more visible Concentrating on major writers and works it covers translations out of many languages from Greek to Korean from Swahili to Russian For some works e.g. Virgil's *Aeneid* which have been much translated the discussion is historical and critical showing how translation has evolved over the centuries and bringing out the differences between versions Elsewhere with less familiar literatures the Guide examines the extent to which translation has done justice to the range of work available The Guide is divided into two parts Part I contains substantial essays on theoretical questions a pioneering outline of the history of translation into English and discussions of the problems raised by specific types of text e.g. poetry oral literature The second much longer part consists of entries grouped by language of origin some are devoted to individual texts e.g. the *Thousand and One Nights* or writers e.g. Ibsen Proust but the majority offer a critical overview of a genre e.g. Chinese poetry Spanish Golden Age drama or of a national literature e.g. Hungarian Scottish Gaelic There is a selective bibliography for each entry and an index of authors and translators
